SUSTAINABILITY

At Lezyne, we pride ourselves on our core values of high-quality, engineered design. Our new packaging solutions are a testament to this commitment to excellence. We believe that every detail matters, from the materials we use to our packaging design. By prioritizing product protection and reducing waste, we're doing our part to contribute to a more sustainable future while maintaining our dedication to innovative and engineered design.

PURE FUNCTION AND CLEAN AESTHETICS

We built Lezyne on a foundation of formidable engineering, award-winning design, and in-house manufacturing. This combination has brought us to the forefront of the bicycle accessories realm, where we continue to lead the way. We are the designers, developers, and producers of every product we sell, so nothing holds us back. Without traditional manufacturing limits, we've innovated and progressed to new heights this year. Our expanded Year 17 Collection features the pinnacle of new tech and designs, refined over nearly two decades.

Lezyne – Engineered Design.

LED LIGHTS

A cyclist is riding away from the viewer on a paved road at night. The road is illuminated by the cyclist's bright white front headlight and red rear taillight. The road has double yellow lines and is flanked by a fence and some vegetation. In the background, there are hills and a utility pole under a dark blue sky.

NEW FEATURES:

Waterproof USB-C

Engineered Optical Lens Design

Increased Battery Capacity

Fresh Form Factor

Improved Heat Dissipation

LED LIGHTS

Our lights continue to lead the industry in quality, design, and safety. All of our lights are designed and produced in-house to meet our strict performance standards and feature advanced programming, the best materials, optimized lenses, and class-leading emitters. They are then verified in our own integrating sphere and each light is quality controlled before leaving our factory. Furthermore, with daytime visibility becoming more important than ever, we offer a full range of head and taillight options to keep you visible at all hours of the day. We've continued to develop "Smart Connect" for our LED platform, giving users even more control and ease of use throughout our line of premium bike lights.

LED ALLY APP

Smart Connect is an innovative technology we developed in-house to control, simplify, and customize compatible Lezyne LED lights. Using the app, Smart Connect lights can be controlled directly and/or programmed (as a combo or individually). Paired combos allow the front light to wirelessly control the rear light.

The Alert feature detects deceleration on the bike.

Control compatible Smart Connect LED lights with our app or GPS.

New lens technology provides up to 270° of visibility.

Disruptive flash patterns for the best daytime visibility.

Infinite Light Power Pack Compatible.

Engineered three-LED system with optimized lens.

Waterproof USB-C fast charge compatible.

IPX7 Waterproof rating.

STVZO LIGHTS

NEW FEATURES:

Waterproof USB-C

STVZO Engineered Optical Lens Design

Increased Battery Capacity

Fresh Form Factor

STVZO LIGHTS

StVZO LEDs are bike lights that comply with the safety standards developed by the German government. These lights feature a special lens that provides a floodlight that's leveled off so as not to intrude with oncoming traffic.

OPTIMIZED BEAM PATTERN

Our innovative StVZO lenses are engineered to provide an optimal light beam for greater visibility and night riding performance while still complying with German regulations.

TIRE REPAIR

PRO TUBELESS KIT
The perfect all-in-one tubeless
tire repair system.

TIRE AND TUBELESS ESSENTIALS

We've developed a collection of reliable tire essentials so you can ride with the assurance of not getting stranded. Our glueless patches use a very aggressive adhesive and our tire levers are made from the best and strongest materials. We sweat the little details, including tubeless-specific tire levers and masterfully engineered tubeless tire valves in the collection.

CYCLING'S ULTIMATE GPS PLATFORM

Our platform provides an expansive array of features and services for every type of cyclist. From basic data recording to extensive workout plan integration, Lezyne's GPS units are simple and ready to use out of the box and also fully customizable to take training to the next level. For navigation, the lineup allows for straightforward, point-to-point navigation or comprehensive offline route building. We offer devices with best-in-class battery runtime (up to 48 hours) or lightweight units from a scant 60 grams. Other features include phone notifications, Lezyne Track (live tracking), and free firmware support and upgrades that constantly refine the technology and operation of our computers.

THE REDESIGNED GPS ALLY PHONE APP

Our link between rider and our GPS computers. Quickly and easily program and customize a Lezyne GPS computer. Wirelessly upload rides and/or auto-sync activities to Strava, Komoot, Today's Plan, TrainingPeaks and Relive. Get notifications on your GPS from many popular social media and messaging apps in addition to standard text, call, and email notifications. Follow Strava Live Segments, load maps from around the world, build custom routes, and activate Lezyne Track (live tracking), all with a touch of a button!

ELEVATED INTEGRATION

Seamless compatibility with Komoot and Relive.
