COMPANY

ITALIAN FAMILY COMPANY SINCE 1970

In 1970 MICO SPORT SPA started to produce technical sport socks. The most modern technologies and the most innovating materials together with the world famous sport testers and a strong selling network made of MICO SPORT a leader company on the national market. In the 80s MICO SPORT adds a complete range of "technical under-wear" to its collection. Situated in Brescia, the most industrialized province of Italy, the birthplace of the first circular knitting machines for socks and seamless products, Mico's mission is to follow sportsmen closely, with the intent to optimize and improve their efforts in daily practice. **The Mico brand has chosen to focus on body protection to ensure better performance.**

CERTIFICATIONS

OUR PERFORMANCE CERTIFICATES:

Excellence is a commitment written into our professional and ethical DNA, this is why we constantly strive to respect all quality standards in collaboration with the most important research laboratories, selecting the most innovative yarns and technical analysis of fitting. Every item of clothing we produce complies with requirements for traceability and conformity of materials, continuously improved in terms of health and safety. This is how we satisfy the Health Ministry and international certifying bodies, guaranteeing consumers the transparency we have always upheld.

Every item tested by the experts, the greatest world athletes.

MISSION

THE GLOBAL PROTECTION FORMULA

To win means not only outdoing oneself, but the others, too.

Humidity, sweat, changes in temperature, bad odours and skin irritation are the first adversaries to overcome, on any ground. With its Global Protection Formula, Mico Sport sets new standards for even the most extreme performances. Technical clothing perfect in every detail: comfort, stretch and heat control, studied for the perfect protection of all sports enthusiasts.

Only passion and concentration remain in the race, right to the final post and victory.

The MicoSport Global Protection Formula is official supplier for:

CROSS SELLING

MICO ONLY TECHNICAL

Athletes all love to beat their own record.

To do so, keeping trim is not simply ambition but a necessity. The choice of suitable technical clothing also plays on performance because dressing in layers allows you to maintain the right degree of humidity and body heat. Wellness that comes from the first layer of fabric in contact with the skin, studied to expel sweat through the second and third layers to outside. Leaving bad weather conditions trailing in our wake.

P E R F O R M A N C E

A collection of innovative and high-performance products is born from Italian Mico Sport technology and design. Engineered technical sports garments approved by the greatest champions of all time.

One tenth less.

In the race, but also in training, a tenth less makes the difference between winning and finishing second. How to guarantee that tenth less?

In addition to training, self-sacrifice and talent, there are technical tools.

In the world of Mico, where all garments are professional and high-performance, we felt the need to create an even better line, capable of embodying the pinnacle of innovation and performance research. M1 is the hyper-professional range, specially developed in collaboration with one of the greatest ski champions ever: Alberto Tomba. Conceptual godfather, inspirer and actual tester.

M1 starts with skiing and will include those sports areas where a garment created to ensure maximum performance makes all the difference.

How we do it is our secret, but it is easy to imagine that in our market the difference is made by the quality of thread, the attention to detail during production, the field tests and a spasmodic and incessant research of technology.

Trying M1 means getting into a formula one and experiencing the thrill of a racing car.

**MAN FULL ZIP HOODY JACKET
X-PERFORMANCE OUTDOOR**

This garment is made with Storm Block protective technology to offer excellent waterproofing performance, water repellence and exceptional durability thanks to the ripstop fabric. Designed for a wide range of outdoor activities, it is highly resistant to wear and tear and offers maximum comfort in all situations. Thanks to its innovative polyurethane membrane and specially designed protective layer, it allows water vapour to escape and prevents rain and wind from penetrating (12.000 water columns). A guarantee of benefit and real protection. Large zipped side pockets, adjustable hood with drawstring.

COMPOSITION: TESSUTO/FABRIC: 100%PL RIPSTOP - MEMBRANA/MEMBRANE: 100%PU SIZES **S M L XL XXL**

PROTECTION FOR PERFORMANCE

mico[®]

SOCKS

NO TECHNICAL SOCKS, NO PERFORMANCE.

Mico Sport provides protection and ensures improved performance. The right shoe with the wrong sock is worth nothing.

The lightweight technical garments by Mico Sport guarantee comfort every time, with invisible seams, muscle support technology, thermal control, breathability and oxygenation to maintain ideal skin function in any climate and location, from departure to finish line.

From aspiration to performance.

#socksfirst

PROTECTION FOR PERFORMANCE

mico[®]

MICO SOCKS SYSTEM

Innovation has always belonged to us. Is the building block of our dna and it is thanks to this historical dna that BE3 has taken shape: the mico sport 'sock system'. This is how we have given shape to a new fit concept that adapts to the anatomy of the foot while protecting performance. This is how we have given shape to a new concept of comfort, volume, fit and elasticity, in which excellence is made to last over time. Try the BE3 system, wear socks designed in a 100% made in italy vertical cycle, eco-friendly and zero waste.

JUST THINK OF YOUR NEW GOAL, WITH BE3.

- INTERLOCKING THREAD KNIT**
Stabilized and snug fit - easier to wear.
- ELASTIC ARCH SUPPORT**
Muscle stimulation that helps prevent plantar fasciitis.
- ELASTIC ANKLE SUPPORT**
Motion support with reduced vibrations.
- ERGO TOES / INVISIBLE FLAT SEAM**
Freedom of toe movement by eliminating friction and improving propulsion.
- CUSHIONING**
'Shock absorber' effect: localized protection against the impacts of different sports and types of footwear.
- CUSTOM FIT**
Perfect adaptability to any foot or leg (men, women and children) for superior comfort even after washing.
- ACTIVE SUPPORT**
Active second-skin to support every performance.
- DURATION OVER TIME**
Quality and performance guaranteed constantly over time with consequent reduced impact on the environment and long-term economic advantage.

LONG LIFE PRODUCT 100% MADE IN ITALY	DURATION OVER TIME

DESCRIPTION	BENEFITS FOR THE USER
Internalized process with special machinery that enables the adjustment of the quantity of LYCRA® to be interlocked with the polyamide using a jet of air that opens and closes the fibre.	Stabilized and snug fit - easier to wear.
Special knit with selected stretch yarns and differentiated from other areas of the sock.	Muscle stimulation that helps prevent plantar fasciitis. Motion support with reduced vibrations.
Toe of the sock modelled according to the anatomy of the toes without excess material. Toe closure with super-flat double linking technology to eliminate friction.	Freedom of toe movement by eliminating friction and improving propulsion.
Varying terry cloth knitting thickness depending on the intended use.	'Shock absorber' effect: localized protection against the impacts of different sports and types of footwear.
The construction system for each sock is calibrated to fit every size as best as possible - the stabilizing pre-wash fixes the sock fit, preventing shrinking or stretching in domestic washes.	Perfect adaptability to any foot or leg (men, women and children) for superior comfort even after washing.
Originally engineering elastic structures designed to guarantee the right support for the foot and ensure optimum performance.	Active second-skin to support every performance.
Production technology (latest generation machinery): for reinforced textures and construction solutions that reduce wear in the critical points (toe and heel) as for example covering noble materials with invisible LYCRA®. High quality raw materials (selection of the highest quality available for all raw materials used) for superior performance and durability. Know-how & expertise (our people) thanks to continuous development over 50 years as sector leader, the products are created to last and perform equally over time, for maximum savings in production waste.	Quality and performance guaranteed constantly over time with consequent reduced impact on the environment and long-term economic advantage.

OUTERWEAR SHIRTS&JACKETS

BLAZE

A two way stretch fleece made from polyester yarn that is Space dyed: a type of dying process that gives the fabric a unique look as each part of the fabric has a different shade using 5 alternate colours, combined with an extremely light, soft to touch and stretch polyester yarn, that guarantees quick drying and freedom of movement in all sports. Produced in Italy.

BRAIDED

Bi-elastic micro polyamide interlock fabric with "honeycomb" effect. Soft, fully formed and elastic, externally it has a matted appearance with a soft feel but extremely resistant to wear. The light inner brush provides excellent thermal insulation. The high elastomer content ensures excellent comfort and a perfect fit.

FURRYFLEECE

Warm, soft and breathable fabric, on the outside it has a rhombus patterned surface to ensure greater breathability. The inside has a smooth brush, ensuring excellent thermal insulation and comfort during sports activities. Quick-drying and easy care.

JUMPER

Four-way stretch fabric with flat external surface and brushed internal lining for better comfort and heat retention. It adjusts perfectly to the body shape and allows freedom of movement. It is quick drying, soft touch and warm. Produced in Italy.

MELANGE

Two way stretch fabric with externally a flat surface and internally a rhombus pattern that helps breathability while maintaining a constant level of warmth. It offers an excellent level of protection and fit on the body. It operates as a "second skin": lightweight, soft and quick drying.

MICROSENSE

Technical bi-stretch microfiber fabric, structured on the outside with diamond pattern. Internally raised to ensure warmth and comfort during sports activity. It is breathable, lightweight and it has high pilling and abrasion resistance.

POWERFLEECE

fabric made with recycled polyester. Smooth outer surface and soft inner brush, guaranteeing high elasticity, ideal thermal comfort and excellent breathability.

PRIMALOFT® Black Insulation

Primaloft® Black Insulation is composed of 80% recycled materials (coming from processing waste) offering a high performing eco-friendly insulation for immediate warmth without the bulk. Soft and lightweight padding offering protection in variable weather conditions. This insulation delivers all the performance needed to face the adventures of everyday.

QUANTUM

Fabric with an external surface that is structured with a waved construction that helps insulation. The internal brushed lining guarantees warmth and comfort. It adjusts perfectly to the body shape. Highly breathable and soft touch. Produced in Italy.

SCUBA

Fabric composed of three parts: 1-outside water repellent layer 2-intermediate padded layer 3-inner stretch layer. Highly stretchy, resistant to pressure and wrinkling. Flexible and insulating, it guarantees excellent thermal protection and high comfort.

SHIELD

A very high stretch fabric that is made up of various types of polyester fibres that acquire a shade effect when they are dyed, leading to the melange colour. A stretch fabric, soft touch, with high heat retention thanks to its brushed internal lining. It dries quickly and is easy to look after and maintain. Made in Italy.

OUTERWEAR SHIRTS&JACKETS

STORM BLOCK

The Storm Block protective technology is designed to offer excellent waterproofing and water repellency performance, combined with exceptional durability. Designed for a wide range of activities, it is highly resistant to wear and tear offering maximum comfort in all situations. Thanks to the innovative membrane the Storm Block technology allows water vapor to breathe and prevents rain and wind from seeping inside. A guarantee of benefit and real protection in all outdoor activities. TECHNICAL FEATURES - Waterproofness - wind protection - breathability -anti abrasion - durability.

TECHNOFLEECE

TECHNO FLEECE 100% Italian fabric. Exterior side with a clean highly technical appearance, abrasion resistant, while the reverse side on the interior provides excellent heat insulation. The elastomeric fibre between the two layers gives the fabric maximum comfort and wearability. Resistant to friction with high thermal insulation coefficient. Incredibly light, soft and easy care.

VELOUR

A two way stretch fabric that has a special interlocking construction that prevents heat escaping from the body and helps warmth insulation. The micro fibers in the fabric help to maintain a high level of breathability. The two way stretch adapts perfectly to body shape while allowing freedom of movement. The brushed lining ensures both warmth and comfort during any sport.

OUTERWEAR SHORTS&PANTS

OUTDOOR

A two way stretch fabric used specifically for Outdoor trousers and shorts. This fabric has an excellent level of breathability and also has thermoregulation in order to keep the body's temperature stable. In addition the fabric is water resistant, strong and robust yet the fabric is soft and comfortable to wear all day. The water repellent finish on the fabric is PFC free for an environmentally friendly product.

OUTDOOR HYPERSHELL

Resistant to abrasions and tears, warm inside thanks to its diagonal braiding. Externally the fabric is windproof, elastic and easy to care for.

RUNNING ENDURANCE

High-tenacity bi-elastic fabric used for making running pants. Fast-drying, it is resistant to pilling and chlorine. Due to its high elasticity, it allows the construction of extremely tight-fitting garments that support the muscles during active phases of performance.

RUNNING

A lightweight two way stretch fabric used specifically for running shorts. This fabric enjoys a very high level of breathability and adjusts to the contours of the body for an excellent fit. In addition the fabric is water repellent, strong and robust which will keep the body protected even in the most extreme of weather conditions. The water repellent finish of the fabric has been done through a PFC free process for an environmentally friendly product.

TRAIL

A two way stretch fabric used specifically for trail running shorts. This fabric enjoys a very high level of breathability and adjusts to the contours of the body for an excellent fit. In addition the fabric is water repellent, strong and robust which will keep the body protected even in the most extreme of weather conditions. The water repellent finish of the fabric has been done through a PFC free process for an environmentally friendly product.

WORKOUT

Super-light microfibre fabric with a very soft hand feel. Thanks to its characteristics it keeps the body cool and dry, guarantees maximum comfort and does not stick. Its micro-section polyester fibres absorb and evaporate moisture quickly, preventing concentrations of body heat.
