220 Triathlon Magazine

WHAT MAKES US DIFFERENT?

From first timers to elite-level triathletes, the athlete has always been at the centre of our design process, constantly striving to help them succeed.

At the very beginning this was a personal motive as founder and elite triathlete, James Lock, looked to gain an advantage over the

opposition. This passion and motivation runs through every product in our range today, supporting athletes in all aspects of their racing, training and lifestyle.

In addition to reworking and adding new technologies and innovation to existing products,

we have also added some exciting new, cutting-edge products to ensure we remain at the forefront of product development and innovation.

ZONE GREEN - SUSTAINABILITY

Our sport is made better by nature.

As a brand we are passionate about protecting our environment for future generations to explore through open water swimming and triathlon.

We aim to continue to lead the way on sustainability, forever developing, improving, and innovating, bridging the gap between performance and nature. We have come a long way and offer the most comprehensive range of eco sensitive products in our industry.

LEADING THE WAY IN ECO WETSUIT TECHNOLOGY

New for 2024, we are proud to introduce the first ever biodegradable performance wetsuit. Made of Terraprene, a cutting-edge and ground-breaking biodegradable rubber by Yamamoto. Once it reaches its end of life it can be biodegraded in 522 days. Terraprene retains the level of performance of the widely adopted Yamamoto SCS material utilised in other prominent suit designs.

We continue to use Yamamoto across our entire performance wetsuit collection, which contains only the highest grade of limestone, containing 99.7% Calcium Carbonate as a raw material. Earth mined Limestone is used to replace petrochemicals in the neoprene. It comes from nature and has a lessened impact on the environment.

Recycled tyres are used to make Carbon black, one of the key ingredients of neoprene, which cuts CO2 emissions by 200g per wetsuit.

Water based glue is used instead of harmful solvent-based glue to bond seams and our linings are made from recycled polyester. In fact, 45 plastic bottles are recycled for every wetsuit lining.

NATURAL, RENEWABLE, TRACEABLE - YULEX®

We are excited to be the first triathlon brand to use YULEX®, a natural plant-based rubber sourced from the Havea tree. The sap of the tree is purified, refined, and made into a Yulex® dry solid rubber. This material can then be moulded and sliced to a desired thickness and laminated, ready to be manufactured into wetsuits.

Yulex® as a material has some incredible properties that are leaps ahead of other materials on the market, and by using plant based rubber we can dramatically reduce a suits CO2 emissions by up to 80%.

RECYCLED PRODUCT DEVELOPMENT

SWIMWEAR

The ZONE3 swimwear collection* is crafted sustainably using Xfinity renew fabric, a polyester yarn formed from recycled bottles.

Xfinity renew fabric retains all the performance features you would expect from ZONE3, while enjoying enhanced eco credentials.

*Excludes the FINA approved range and the TI+ range.

THERMO TECH ROBES

Our thermo tech robe collection are made from recycled plastic bottles, including the moisture wicking, inner thermal lining. The same water resistance, wind protection and thermal lining you know and love, but 100% recycled.

RECYCLED BUOYS

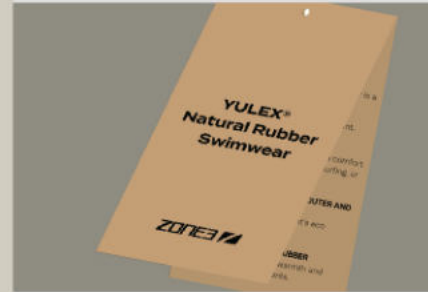

Our collection of buoys is the newest addition to our recycled range. Now made with 100% recycled polyester.

PACKAGING INNOVATION

AQUAPAK BAGS

We are introducing Aquapak bags, a sustainable alternative to single use plastic bags for our product packaging. Developed in Britain, our eco Aquapak bags are fully biodegradable, and dissolve fully in hot water in moments, into an eco-friendly biomass.

HANGTAGS

Our hangtags use recycled paper, we have reduced the amount of information needed on the tag by having a QR code linking to the website for more details. This enables the tags to be smaller and therefore create less waste.

CORE WETSUITS

The core range is a collection of multi award-winning wetsuits. Each style has been refined and improved over the last fifteen years and our reputation continues to grow as being the best triathlon wetsuit brand in the world.

Designed for beginners all the way through to elite athletes, each suit offers the very best performance, comfort and fit for the given price point.

AQUA DYNAMIC COATINGS

All our suits are coated with an aqua dynamic covering which significantly minimises any drag through the water as well as improving durability.

HIGHLY DURABLE

Designed for speed, flexibility and a natural feeling swim; all without loss of strength. Our wetsuits are extremely durable and made to last as part of our commitment to the athlete.

SPRING LOADED DESIGN

All our suits offer a spring loaded shoulder design to generate a more rhythmic swim stroke, enabling faster and more energy efficient swimming.

ULTRA THIN & LIGHTWEIGHT

We developed a neoprene that is extremely lightweight, thin and comfortable, allowing the user to feel as if they aren't wearing a wetsuit at all.

PRO SPEED CUFFS™

Pro Speed™ arm and leg cuffs use a specifically formulated silicone coating to make the wetsuit come off extremely quickly. Perfect to increase transition speed.

MEASURED BUOYANCY

All our suits feature balanced neoprene thickness to give you maximum buoyancy and core support without disturbing your stroke.

ECO-FRIENDLY NEOPRENE

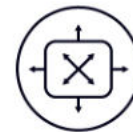

Selected wetsuits combine earth mined limestone with scrap rubber tyres to reduce energy consumption and CO2 emissions by 200g per suit.

In 2023 we are pleased to be the first tri brand to introduce Terraprene by Yamamoto on our Vision wetsuit. Terraprene is a cutting-edge biodegradable rubber, a ground-breaking leap forward in performance wetsuit manufacturing.

BIO RUBBER

With exclusive use of the Bio Rubber material on our Vanquish-X wetsuit, this cutting edge material collects energy from the atmosphere and re-emits this energy for absorption into the body. A design proven to increase blood flow, reduce lactic acid build up and fatigue.

UNPARALLELED FLEXIBILITY

The Yamamoto neoprene used in all our wetsuits has been developed to allow for maximum flexibility with a 4-way stretch. This provides unrestricted movement stroke after stroke, minimising fatigue and muscular tension in the shoulders, chest, abdomen and legs.

VANQUISH-X

BEST

The Vanquish-X boasts the title of the world's fastest and most technologically advanced wetsuit. Taking performance to a totally new level, the Vanquish-X gives the athlete the edge both in and out of the water.

- + Exclusive to ZONE3 - NEW technologically advanced Yamamoto Bio-Rubber material.
- + Exclusive to ZONE3 - NEW ALPHA TITANIUM LINING on the upper body to improve circulation and warmth.
- + Silk X lining - To aid smoother transitions and provide unrivalled comfort against the skin.
- + B.R.E Body Rotation Enhancement positioned on the chest to improve distance per stroke by limiting the body's rotation in the water.
- + Maximum buoyancy with Aerodome and NBR panels (a buoyant material usually used in life jackets).
- + BRS MARK 0.3MM SCS on the sleeve for an ultra-lightweight arm rotation.
- + Cool-spot forearm panels for improved feel and catch in the water.
- + DRY BAG INCLUDED - Keep your Vanquish-X safe to and from your next race with the limited edition ZONE3 Vanquish-X drybag.

“

This suit is fast, comfy and the new improved features make it a stand out suit to race and train in. I would 100% recommend it

CORE WETSUIT

ASPIRE

BETTER

The Aspire is our most loved wetsuit, commended for its flexibility, buoyancy, and speed of removal. The newest version goes even further than before and delivers an upgrade in comfort, flexibility and feel. The Aspire holds over 10 years of awards and is perfect for both beginners and pros.

- + One of the highest-rated wetsuits of the last decade.
- + Silk X lining - To aid smoother transitions and provide unrivalled comfort against the skin.
- + X-10 Extreme - Enhanced integrated one-piece shoulder and chest.
- + COOL-SPOT FOREARM PANELS for improved feel and catch in the water.
- + Aerodrome buoyancy panels on the legs and hips.
- + Improved laser-cut collar design.
- + Made with 100% Premium Yamamoto materials for comfort & flexibility.
- + Pro Speed Cuffs for rapid removal after the swim save you vital time on any course.
- + SCS Nano coating.
- + Designed for a fast, smooth and natural feeling swim.
- + Comes with a free dry bag to store the suit in.

Possibly the most comfortable wetsuits we've ever worn

2019 BEST IN CLASS AWARD
Triathlete Magazine USA

CORE WETSUIT

VISION

BETTER

The new Vision wetsuit makes a giant leap forward in the ZONE3 sustainability journey. The first of its kind, it features a ground-breaking new material by Yamamoto – Terraprene.

Terraprene is a cutting-edge biodegradable rubber which, once it reaches its end of life, can be biodegraded in 522 days. Terraprene retains level of performance of the widely adopted Yamamoto SCS material utilised in other prominent suit designs.

The ultra-stretch material allows for a maximum range of motion, providing you with the freedom to move unrestricted and perform at your best. Perfect for beginners, experienced swimmers and those looking to upgrade to a higher performance, or more flexible wetsuit.

WS24WVIS101

- + New for 2024, Ground-breaking terraprene biodegradable neoprene, and an adapted buoyancy profile.
- + X-10 one-piece shoulder panel design extends across the chest and shoulders to give even more flexibility and stroke efficiency.
- + B.R.E Body Rotation Enhancement panel on the front chest to help maximise distance per stroke and body roll during the swim.
- + Use of 10 different materials to maximise performance, comfort and durability.
- + Men's suit featuring 5mm buoyancy panels on the torso and front legs as well as Aerodome on the hip panels to offer significant core support.

MENS'S ADVANCE WETSUIT
WS21MADV101

WOMENS'S ADVANCE WETSUIT
WS21WADV101

CORE WETSUIT

ADVANCE

GOOD

A huge step forward has been made for the Advance wetsuit including the use of the world's highest performance YAMAMOTO foam. Recognised as the best entry-level wetsuit on the market, the Advance takes performance to the next level, and maintains a premium look at a reasonable price point.

The Advance is an amazing value suit that certainly doesn't lack in performance - punching well above its price tag. The perfect suit for open water swimmers or triathletes looking for a high performance entry-level wetsuit.

- + Yamamoto #39 SCS Free-Flex shoulder panel.
- + Weight reduced by 16% versus the previous version whilst offering same buoyancy and warmth.
- + Use of 10 different materials to maximise performance, comfort and durability despite the low price point.
- + A mixture of SCS and Smoothskin used according to the panel position.
- + 4mm buoyancy panel on torso and legs for core support.
- + Pro-Speed cuffs on the legs for easy removal.
- + Laser-cut collar.
- + Raglan sleeve panel layout for flexibility and stroke efficiency.
- + Premium graphics including black gloss and gunmetal finishes contrasting with contemporary colour contrasts.

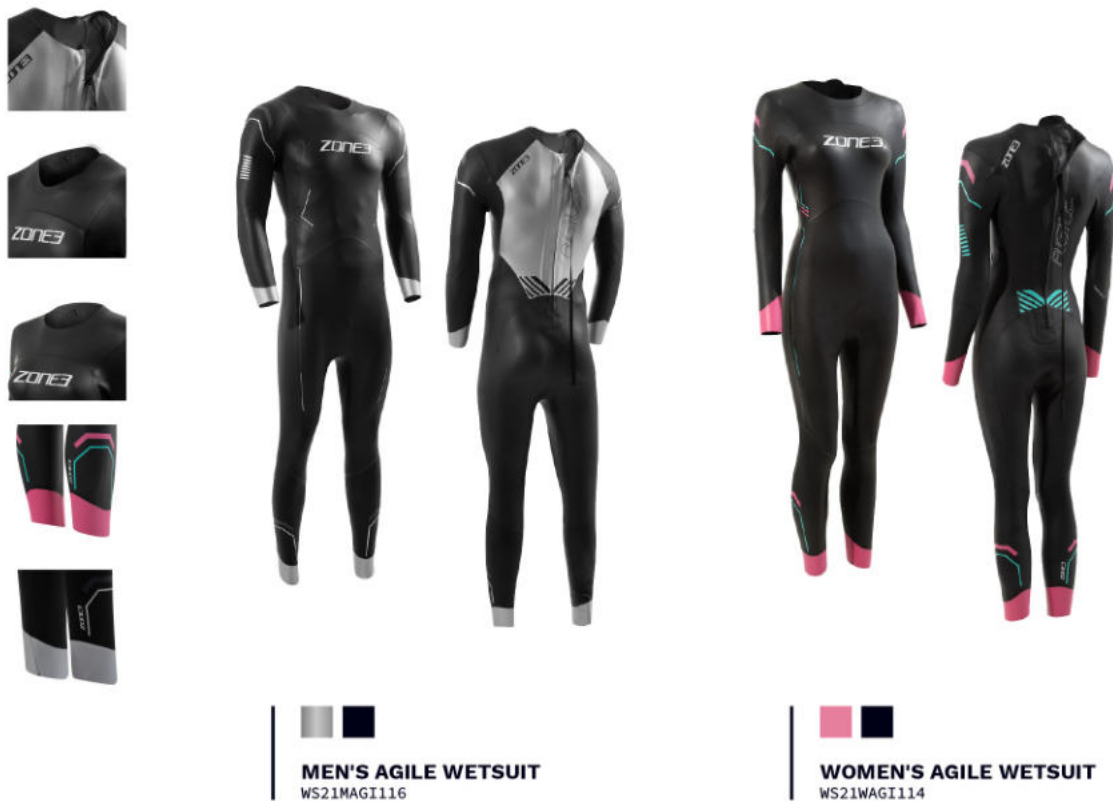

“

A BRILLIANT ALL-ROUNDER
THAT COMES AT A GREAT PRICE

220 Triathlon Magazine

CORE WETSUIT

AGILE

GOOD

The Agile was created to meet the growth in demand of a high quality, entry-level wetsuit.

- + No flatlock stitching. Fully glued and blind stitched to ensure waterproof seams, flexibility through the suit and no internal seam discomfort.
- + No nylon neoprene panels. The Agile is made from a mixture of Speedflo and Smoothskin coatings to ensure water doesn't enter the suit or get heavy and cause drag.
- + Performance focus. Like all ZONE3 products, even though the materials and thickness can't compare with the likes of our Aspire, the Agile is designed for speed and comfort.
- + Talon Resistant Coating. A unique formula applied to the leg and side panels to improve durability and reduce customer service or warranty questions when beginners create fingernail tears by accident.
- + 2mm Flex-Fit shoulder panels for flexibility and a 4mm legs panel for core buoyancy support.
- + A combination of 2mm, 3mm and 4mm panels and appropriate linings to offer a well-balanced and comfortable swim.
- + Slimline Pro Speed Cuffs for speed of removal.
- + Modern styling and graphics which align with our Advance and Vision models.

SPECIALIST WETSUITS

SPECIALIST WETSUIT

ASPECT BREASTROKE

BEST

For 2024 we continue to improve our much-loved open water favourite, aspect breaststroke wetsuit, by introducing a more diverse size range.

The aspect is now available in two new sizes, SXL and MXL. A first for ZONE3, and in direct response to our consumers request, they offer the more generous fit of an XXL, but without the increase in height.

Utilising a mixture of high performance Aqua-X, Smoothskin and High-Stretch Nylon panels, this wetsuit is designed to allow an extended range of movement between the legs and across the chest. To reduce drag and improve durability, a coating of Aqua-X is applied to the neoprene.

- + Specifically designed for breaststroke swimming but equally suitable to front crawl.
- + Excellent warmth, comfort and flexibility.
- + High-stretch inner leg panels required for breaststroke leg kick.
- + Reduced lower leg buoyancy allows legs to stay submerged.
- + Mixture of Smoothskin and high-stretch nylon panels reduce drag.
- + Updated construction to improve durability.
- + Pro-Speed wrist cuffs to allow easier removal.
- + Easy to use downward YKK zipper.

SPECIALIST WETSUIT

YULEX® SWITCH

BEST

The revolutionary Yulex® SWIM SURF SUP Wetsuit is the first of its kind, and ZONE3 are proud to lead the way by creating a sustainable multisport wetsuit.

The Wetsuit makes a statement. The main body comprises Yulex®, a natural plant-based rubber sourced from the Havea tree, coupled with speedflo shoulders for reduced drag.

The shoulder and collar design provide a perfect fit specifically tailored for swimming. Additionally, the flexible body construction accommodates a more generous fit, catering to a diverse range of body types and ensuring the utmost comfort and freedom of movement.

WOMEN'S VENTURE WETSUIT
WS22WVEN101

SPECIALIST WETSUIT

THE VENTURE

GOOD

Designed with a combination of 2 and 3mm SCS neoprene and high stretch nylon-lined neoprene, the ZONE3 Venture Wetsuit is incredibly comfortable. Core support buoyancy panels on the upper legs work to enhance performance, reduce fatigue and keep a neutral body positioning in the water to reduce drag, while nylon-lined neoprene on the back and arm panels gives added comfort and durability. The Venture is a great value entry-level wetsuit perfect for starting your adventure in the open water, delivering a comfortable fit and finished with high visibility orange panelling to make you stand out.

Comfortable and flexible, the Venture Wetsuit from ZONE3 is a great value entry-level wetsuit that provides a full range of movement for an efficient stroke alongside optimal buoyancy for a drag-reducing neutral swimming position.

SPECIALIST WETSUIT

THERMAL AGILE

GOOD

The Thermal Agile will keep you warm on your cold-water journey. Inner fleece lining on key panels provides insulation where you need it, ensuring you will be comfortable and supported. The suit not only provides superior warmth, but incredible flexibility thanks to the 2mm Flex-Fit Shoulder Panels which will keep you swimming for longer in colder waters. Finally, with safety in mind and ensuring full visibility in the water the on-body graphics have been carefully developed to keep you always seen.

- + Warmth: Key panels utilise an improved fleece lining, adding greater heat retention when swimming.
- + 2MM FLEX-FIT SHOULDER PANELS improve range of motion allowing you to conserve energy and reduce fatigue.
- + 2MM, 3MM AND 4MM PANELS provide a well- balanced profile to get the most out of your swim plus the fleece lining on key panels.
- + CORE SUPPORT BUOYANCY PANELS on the upper legs help to keep the legs towards the surface of the water reducing fatigue.
- + HIGH VISIBILITY GRAPHIC PANELS to stand out when in the water.
- + 100% SPEEDFLO AND SMOOTHSKIN COATING for waterproofing and minimal drag.
- + FULLY GLUED AND BLIND STITCHED for increased comfort and warmth.
- + NEW TALON RESISTANT COATING applied to the front leg to help improve durability and reduce accidental fingernail tears.
- + SLIMLINE PRO SPEED CUFFS offer superior removal speed.
- + ECO-FRIENDLY NEOPRENE derived from limestone.

SPECIALIST WETSUIT

THERMAL ASPIRE

BEST

Designed in response to the ever-increasing demand to swim outdoors all year around. Sometimes we need to swim in conditions that our normal wetsuits just weren't made for. For those colder swims, we have taken one of the highest-rated wetsuits of the last decade - the Aspire and added a carefully upgraded flexible Thermo Tech Thermal lining to enhance its warmth properties without compromising swim experience.

- + **Warmth:** Staying warm is the key feature of the Thermal Aspire Wetsuit, to achieve that we have combined Premium SCS #39 Yamamoto fabrics known for their high heat retention, with Thermo Tech Thermal lining added to the key muscles groups which require extra warmth when swimming in colder conditions.
- + **Neoprene:** Chest, legs and body panels use a combination of 3mm, 4mm and 5mm neoprene with the addition of our plush Thermo Tech Thermal lining on the interior. The Flex-Fit shoulder panels and arms consist of 1.5mm thickness with a high stretch lining for flexibility.
- + **High Visibility:** Neon orange and silver graphics increase visibility in the lower light conditions of Autumn and Winter.
- + **Pro-Speed Cuffs** on wrists and ankles offer superior removal speed.
- + **Speed:** Fast in the water, the aqua dynamic 'SCS' Nano coating reduces the drag of a regular wetsuit from 0.4 to just 0.021.
- + **Flexibility:** A massive 480-580% in elongation, compared with human skin (underarm) which is just 60-70%. Superior flexibility and comfort with an expansion of 7x conventional wetsuit materials.
- + **Environmentally Friendly & Buoyant:** Derived from limestone that increases buoyancy levels for the swimmer.

SPECIALIST WETSUIT

EVOLUTION SWIMRUN

BEST

The concept design of the Evolution has shifted from a swimming wetsuit you can run in, to a running wetsuit which you can swim in. This sounds simple but has involved a full redesign process carefully balancing the flexibility, buoyancy and a 30% weight reduction. We believe we have found the perfect combination and have built a market leading Swimrun suit ready to take on the competition and excel in the sport.

- + Each suit features removal arm sleeves and calf sleeves available for purchase separately.
- + Yamamoto #39 SCS shoulder panels for ultimate flexibility.
- + Weighing only 650 grams whilst still offering great buoyancy panels and core body warmth properties. This is the lightest full neoprene Swimrun suit on the market with over 2 pockets.
- + Sandwich panels chest construction providing 3mm buoyancy panels within a 1.5mm panel to give the buoyancy and warmth required without sacrificing flexibility for chest expansion and comfort during the run.
- + 5mm Aerodome torso panels for maximum buoyancy within the small space available.
- + Ultra-lightweight and high stretch leg panels in nylon material with internal silicone leg grippers for comfort and durability.
- + 6 storage pockets – Double zipped pockets on back, inside pockets as well as side of legs.
- + Smaller and lighter weight zipper compared to swimming wetsuits.
- + A combination of high visibility silver back panel to reflect the sun's heat during the run and gunmetal metal panels for a premium and functional look.

“

This is an excellent performance oriented swimrun wetsuit. It is extremely comfortable for both running and swimming in and looks phenomenal. You would happily wear it all day and then to the after-party!

SWIMRUN.COM

YULEX® SWIMWEAR

Designed for your wild swimming, surfing, or paddle boarding adventures, the ZONE3 Yulex® Swimwear range will keep you warm without that restrictive wetsuit feeling. It is eco-friendly too; by using natural rubber, the suit's CO2 emissions are reduced by up to 80%.

New for 2024. In response to our consumer feedback, we have extended our size range to be more inclusive, meeting the needs of the growing and diverse open water swim community as this range is designed for recreational open water swimming rather than performance.

Designed for more recreational Open Water swimmers rather than performance speed swimmers.

Yulex® swimwear products offer great versatility, they can be used as an outer or base layer for added warmth.

MEN'S YULEX® TOP

NA23MYT103

The Men's Yulex® Natural Rubber Long Sleeve Top is made for all your open water adventures. Featuring 1.5mm thickness throughout and full coverage across the back and arms, it provides core warmth and protection from the elements while allowing great freedom of movement, whatever the activity. It is eco-friendly too; by using natural rubber, the suit's CO2 emissions are reduced by up to 80%, paving the way for a brighter and greener future.

MEN'S YULEX® JAMMER

NA23MYJ103

The Men's Yulex® Natural Rubber Jammer is made for all your open water adventures. Featuring 1.5mm thickness throughout and an adjustable drawstring they provide core warmth and protection from the elements while allowing great freedom of movement, whatever the activity. They are eco-friendly too; by using natural rubber, the jammers CO2 emissions are reduced by up to 80% supporting the global mission to reducing our carbon footprint.

MEN'S YULEX® KNEESKIN

NA24MYKS103

The New Yulex® Kneeskin is designed to keep your core warm, the sleeveless style allows for full movement around the arms, plus it's made fully out of Yulex. The centre back zip fastening allows ease of wear, and it is designed to keep you warm and dry during your various activities. This piece of swimwear features a high-quality Yulex® material with two way stretch technology for enhanced fit and flexibility, helping you move more freely in the water.

YULEX® SWIMWEAR

BEST

Yulex® Natural Rubber

A first for ZONE3, Yulex® natural rubber is a plant-based alternative to traditionally produced neoprene that dramatically reduces the garment's carbon footprint.

- + Provide freedom of movement and comfort whether you are wild swimming, surfing, or paddle boarding.
- + 100% recycled polyester outer and inner fabric. Further enhancing the garment's eco credentials.
- + 1.5mm Yulex® Natural Rubber.
- + 1.5mm thickness provides warmth and protection from the elements.
- + Flatlock seams.

NEOPRENE APPAREL

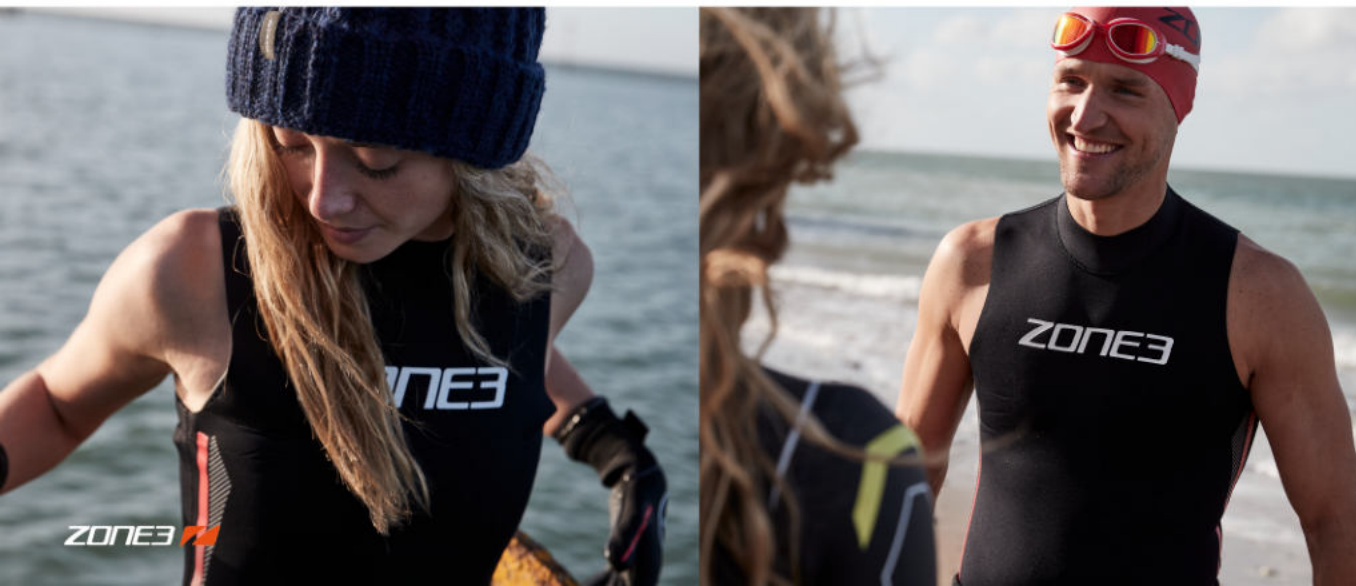

The neoprene apparel range has been designed to help swimmers continue training throughout the year. Many unheated pools get cold during the winter months so this range helps to maintain body heat and protect from the cold. Also, great for open water swimming when it's too hot for a full suit.

WARMTH VEST

Like the baselayer, this vest is designed to be either worn underneath a wetsuit during cold water conditions or instead of a wetsuit in warmer conditions. Made from 2mm neoprene with soft comfort lining and a higher neck for additional warmth.

BUOYANCY SHORTS

THE ACTIVE : 3/2MM
NA24UABS101

Introducing the Active Buoyancy Short, a must-have for beginner swimmers. This innovative alternative to pull buoys improves body position and swim technique while providing a natural feeling experience. The Active Buoyancy Shorts are made with a smoothskin front panel and nylon side and back panels, with enhanced core support. The perfect choice for those looking to develop their skills and maximise value. ZONE3 were the original designers of this product concept and the Active Buoyancy Short is designed to drive a high volume of sales as a result of the low price point. Dive into the world of swimming excellence with the Beginner's Buoyancy Short and experience improved performance in the water.

THE ORIGINALS : 5/3MM
NA18MBS0101

Made from top quality Yamamoto Smoothskin neoprene and stitched the same way as our wetsuits. Designed using 3mm neoprene down the centre and 5mm neoprene on the sides. The shorts offer core body buoyancy and help to promote hip rotation through the stroke.

THE PREMIUM OPTION : 5/3MM
NA18MBS0101

The Premium version utilises combination of Yamamoto #39 SCS on the front and back panels, and Yamamoto SCS Aerodome on the side panels. This gives a softer, lighter and more flexible fit along with more buoyancy and hip rotation that is suited to heavy legged swimmers looking to refine their technique.

NEOPRENE ACCESSORIES

For those wanting to train year-round, our neoprene accessories range is your go-to. Perfect for maintaining flexibility across a wide range of temperatures, neoprene fabric offers many advantages that make it the ideal fabric for training in those cooler months.

NEOPRENE CAPS / HEADWEAR

NEW
DESIGN

THERMO TECH BALACLAVA V2

OW22UMFP103

The ultimate thermal protection for open water swimming. The ZONE3 Neoprene Swim Cap provides warmth whilst maintaining good hydrodynamics through the water. It has a Velcro strap which joins under the chin so optimum fit is ensured.

A thermal head cover designed to fit underneath any wetsuit and provide warmth to those swimming all year round. Designed to provide a secure seal to prevent water entry along with a high stretch lining for optimum comfort.

NEOPRENE HEADBAND

SA20UNHB101

The ZONE3 Headband is constructed using 2mm thick high performance neoprene for warmth and low-profile Velcro for fit adjustment. A perfect addition to any cold water swim; helping to keep your ears and head warm.

SOCKS AND GLOVES

NEOPRENE SWIM SOCKS

NA18UNSS116

An essential product to keep the feet warm whilst swimming in cold water. With a longer cut to tuck into a wetsuit and a Velcro strap to ensure they stay in place, with minimal water entry. The sole is made from a durable and gripping fabric to help with protection and grip when walking to or from the water.

NEOPRENE SWIM GLOVES

NA18UNSG116

The primary function of the ZONE3 open water swimming gloves is to keep your hands insulated from the cold. They are designed to be long enough to fit underneath a wetsuit and also feature a Velcro strap to hold them in place. There is no webbing between the fingers to improve the feel in the water and there is also a silicone print on the palm for grip.

THERMO TECH NEOPRENE SWIM CAP
NA21UHTC116

A thermal version to complement our socks and gloves. 4mm in thickness with fleece lining to help get through those colder swims.

THERMO TECH NEOPRENE SWIM SOCKS
NA18UHTS101

Our warmest sock made from a slightly thicker neoprene with a thermal lining for improved insulation. There is a zip on the side for a snugger fit, and easier access. The socks also have a Velcro strap to help minimise water entry and a gripped sole.

THERMO TECH NEOPRENE SWIM GLOVES
NA18UHTG101

Our warmest glove made from a slightly thicker neoprene with a thermal lining for improved insulation. Constructed using liquid seal waterproof seams to help prevent water entry with a Velcro strap and longer Lycra sleeve to enable a secure fit.

THERMO TECH WARMTH SWIM MITTS
NA24UHTM101

The main function of the Thermo Tech Warmth Swim Mitts is to allow great ease when putting on and off the mitts. Suited for extremely cold conditions where they can be worn over neoprene gloves to keep your hands insulated from the cold. With 3.5mm neoprene and a double lined palm for added warmth and a printed gripper on the palms for added grip. Extended wrist for extra coverage allows you to stay warm and dry with the padded neoprene material and secure fit.

THERMO TECH ACCESSORIES

100% NATURAL GLIDE
NA18UGLI107

Made in Canada with 100% natural ingredients to prevent chafing and irritation, inflammation and skin problems caused by friction such as blisters, skin burns and dehydration.

**NEOPRENE CYCLE SHOE
TOE CAP WARMERS**
NA21UNTC101

The ZONE3 toe covers are designed to give just the right amount of warmth on cooler rides. Perfect for spring and autumn riding and a kit bag essential for any early morning races.

OTHER ACCESSORIES

RECYCLED THERMO TECH ROBES

Our 100% Recycled Thermo Tech Robes are your essential companion when you're by the water's edge. Giving you instantaneous insulation before and after all of your training sessions and open water activities.

**RECYCLED THERMO TECH
CHANGING POLAR FLEECE PARKA ROBE**
CW23UHTCR101

RECYCLED THERMO TECH CHANGING ROBE

Our 100% recycled Thermo Tech Changing Robe is your essential companion when you're by the water's edge. Its versatile design protects you from the elements and keeps you warm, whatever the activity. Perfect for outdoor changing, wearing as a relaxed outer layer or keeping warm between swims, the robe offers a comfortable and weatherproof fit. The oversized design with a longer length allows for ample changing room and maximum heat retention. Now made with 100% recycled materials. This high-tech robe features a Thermo Tech Fleece on the interior, so the jacket will help regulate your core temperature and wick away moisture to get you dry faster. The outer Water-Block shell is wind and water resistant, shielding you from chills as you change.

- + Wind guard protection panel around the neck and chin.
- + Fitted hood and a popper design along the front protect the zip from water and wind.
- + 100% Recycled outer shell is breathable, waterproof and provides wind protection whilst allowing moisture to escape.
- + 100% Recycled Thermo Tech Fleece lining wicks moisture away from the wearer and improves warmth.
- + Full length sleeves with adjustable Velcro straps to protect from the elements.
- + Front and internal pockets to keep your hands warm and valuables safe.
- + Two-way YKK zipper with pull cords for easy use.

RECYCLED SWIM SAFETY BUOY / TOW FLOAT
SA23RSBTF114

RECYCLED SWIM SAFETY BUOY / TOW FLOAT
SA23RSBTF113

RECYCLED 28L SAFETY BUOY / DRY BAG

Now made with 100% Recycled Polyester, the ZONE3 dry bag features dual air bladders that inflate around the storage compartment with a large 28L capacity. The adjustable dual belt design attaches securely around the swimmer's waist and the leash ensures that the product remains out of your stroke range whilst swimming. In addition, the Buoy's now have reflective logos for added visibility.

RECYCLED SWIM SAFETY BUOY / TOW FLOAT

Now using 100% Recycled Polyester (rPET), this tow float design is perfect for new open water swimmers or those who are required to wear them during races or training sessions. The tow float lacks any storage area and is smaller than our bestselling 28L Safety Buoy Dry Bag but still does give great visibility and functionality with a leash strap and carry handle. In addition, the Buoy's now have reflective logos for added visibility.

WETSUIT CHANGING MAT
RA22WSCM101

LARGE MICRO FIBRE TOWEL
OW22LMFT103

ON THE GO SWIM BUOY / BAG

For swimmers who want a smaller area to store personal items whilst still having the visibility and safety of swimming with a buoy. The beauty of this product is that all items placed in the bag are easily accessible, even whilst in the water.

WATERPROOF PHONE POUCH

An extra layer of protection for your phone or valuables during open water swimming. Simple to use and combine with the Swim Safety Buoy Dry Bag product.

CHANGING MAT

A durable and convenient changing mat that quickly turns into a bag to store wet items. Ideal for open water swimmers and usable on all surfaces.

MICRO FIBRE TOWEL

Super absorbent towelling material which folds up neatly and is perfect for packing and using straight after a swim. Anti- bacterial properties also help to keep the towel fresh after swimming in open water.

Measures 80cm x 150cm when folded out.

**RECYCLED 2 LED LIGHT 28L BACKPACK
SWIM SAFETY BUOY / DRY BAG 28L**
SA23R2LBP113

RECYCLED 2 LED LIGHT 28L BACKPACK SWIM SAFETY BUOY / DRY BAG 28L

With straps that allow the drybag to be converted to a backpack, swimmers can carry their kit to swim, hassle-free. The buoy now uses Recycled Polyester (rPET) and offers reflective logos and 2 LED light strips for increased visibility.

**RECYCLED 2 LED LIGHT SWIM SAFETY BUOY /
DRY BAG 28L - WATERPROOF PHONE POUCH INC**
SA23R2LDB113

RECYCLED 2 LED LIGHT SWIM SAFETY BUOY / DRY BAG 28L - WATERPROOF PHONE POUCH INC

Offering both reflective logos and LED lights, this tow float now utilises Recycled Polyester (rPET) for the main body material. It includes additional storage capabilities with a waterfront pouch for phone storage and comes complete with a free waterproof phone pouch.

GOGGLES

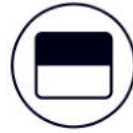

HIGH PERFORMANCE GOGGLES FOR POOL AND OPEN WATER SWIMMING

It took years of testing to find the perfect goggles to complement the ZONE3 range. They are packed full of great features, including 100% UVA/UVB protection and wide angle anti-fog lenses. We pride ourselves on offering a range of lense types that offer clarity in all types of swimming; There is a style and shape to suit every swimmer.

ULTRA-SOFT GASKET

Ultra-soft silicone gaskets are used on all our goggles; perfect for long distance swims and protecting against wayward limbs. They provide a brilliant seal whilst causing less pressure around the eye.

POLARIZED LIGHT MANAGEMENT SYSTEM

We use premium polarized lenses that reduce the effect of glare from the water and surrounding objects; producing fantastic clarity in all weather.

100% UVA/UVB PROTECTION

All our goggles offer 100% UVA/UVB protection; blocking out the sun's harmful rays.

HORIZON

HORIZON

Our wide angle lenses feature a one-piece curved surface to aid your peripheral vision whilst swimming. This unrestricted view allows you to concentrate on your technique and gives you the full picture of what's around you.

LUCID

LUCID

Ultra clear lenses that utilise a combination of the latest polycarbonate materials and high quality finishes to reduce fogging and guarantee crystal clear vision in all conditions. Paired with our Polarized Light Management System, our goggles offer unparalleled clarity of vision.

eclipse

ECLIPSE

Our most advanced technology. Utilising photochromatic technology to automatically adjust to changing light conditions. The weather is an untameable and fickle force that can have a great effect on your performance. By reacting to changes in the brightness levels, our eclipse lenses ensure uninterrupted vision whilst outside.

GOGGLES

VOLARE

Volare racing goggle is the ultimate hybrid goggle, the low-profile design and performance of a pool racer is perfectly complemented by the comfort afforded by the cushioning of the ultra-soft silicone gaskets usually only featured in open water swimming goggles. This allows the Volare to give outstanding performance in the pool and open water.

- + Interchangeable nose bridge for customised fit.
- + LUCID lenses with anti-fog treatment.
- + HORIZON wide angle lenses.
- + Ultra-soft silicone gaskets for comfort and protection.
- + Polarized Mirror Lens option.
- + 100% UVA/UVB Protection.
- + Twin-adjustable head strap.

GOGGLES

VAPOUR

You won't know how soft and comfortable these goggles are until you try them. Ultra soft silicone combines with a great fit making them the perfect goggle for open water and pool training sessions. The large curved lenses give an excellent field of vision allowing you to carefully navigate your direction and spot any other swimmers. If you are unlucky enough to get hit during a mass participation swim then the ultra-soft silicone gaskets will cushion the blow, whilst also minimising pressure around the eyes keeping you comfortable during those long swims.

- + Ultra-soft silicone gaskets for comfort and protection.
- + Anti-Fog treated lenses and 100% UVA/UVB protection.
- + Large curved lenses for outstanding peripheral vision.
- + Easy adjust strap.
- + Unique & stylish colour options.

GOGGLES

APOLLO

For swimmers who find standard goggles a little too big for them, the Apollo goggles have a smaller frame allowing for a better seal around the eyes on those with a smaller head/ face; ideal for junior swimmers. The ultra-soft silicone seals allow for a comfortable swim over any distance and also minimise the risk of an eye injury from the impact of a flailing limb of another swimmer.

- + Low profile frame.
- + Ultra-soft silicone gaskets for comfort and protection.
- + LUCID lenses with anti-fog treatment.
- + Two different lens options for various light conditions.
- + HORIZON wide angle lenses.
- + 100% UVA/UVB protection.

GOGGLES

VISION-MAX

For swimmers who are looking for comfort above all else, a mask style swim google is the perfect solution. The ultra-soft silicone seal sits on the forehead and below the eyes taking all pressure off the eyes and delicate eye sockets. The position and size of the seal also takes the impact of any stray limbs of other swimmers allowing the wearer confidence in mass starts and swimming in crowded waters that their mask won't get dislodged.

- + LUCID lenses with tinted finish and anti-fog treatment.
- + Low profile mask style design for minimal drag.
- + HORIZON wide angle lenses (180 ° Panoramic Vision).
- + Scratch resistant lenses.
- + Ultra-soft silicone seal for comfort and protection.
- + Split yoke strap.

MESH TRAINING BAG

SMALL: SA18SMTB101 | LARGE: SA18LMTB101

An essential accessory for all swimmers, our mesh bags are created to store your training accessories in and has been designed using mesh fabric to enable excess water to dry out. The bags have a large strap to carry the bag over your shoulder as well as a short strap for hanging on pegs and a draw-string cord for easy access.

TRANSITION BACKPACK

RA18TRANB103 | RA18TRANB108

Scoring a 90% rating and described as 'brilliant' by 220 magazine. The multi-award winning ZONE3 Transition Bag has been carefully engineered to fit all of your triathlon gear into one stylish and comfortable product, meaning less to worry about come race day.

10L AND 30L WATERPROOF DRY BAG

10L - SA22WPDB113 | 30L - SA22WPDB113

Perfect for those going to and from the open water. 100% waterproof welded seams and folding seal so suitable for keeping things dry whilst you're swimming and then for putting wet swimwear or wetsuits in post-swim. Made from 500D PVC material with shoulder straps and handle for easy storage and carrying.

- + Durable 500D PVC
- + Shoulder strap
- + 100% Waterproof welded seams

BAGS

EVERYDAY TRANSITION BACKPACK
RA22WPBP101

Versatile performance backpack for training, racing or everyday use. Multiple compartments and zipped pockets and a 40L capacity making it perfect for keeping all kit organized and clean. There is a waterproof storage area, shoe compartment, laptop area, external mesh pockets and accessories such as carabiner to allow for bike helmets to be secured. Perfect for going to and from the gym, lake or for racing and complete with front, back and side reflective details for low light conditions. Comfortable and lightweight shoulder straps and padded pack panels complete this superb all-rounder.

30L OPEN WATER DRY BAG TECH BACKPACK
SA22DBTB101

The perfect companion for when you're going to the beach, lake, river or pool. 100% waterproof welded seams and folding seal so suitable for keeping things dry whilst you're swimming and then for putting wet swimwear or wetsuits in post-swim. Features include:

- + Front mesh pocket for all essentials and quick release cord closures.
- + Elasticated side pockets for drinks and further internal pocket areas.
- + Combination of a matt black and high visibility orange 500D PVC material.
- + Lightweight, breathable back panel and shoulder straps.
- + Chest straps and front buckle closure system.
- + Reflective front and back detailing.

BAGS

FRONT FACING SNORKEL
SA18FFS

A streamline shaped, front facing snorkel to allow you to focus on technique without the need to worry about your breathing.

PROTECTIVE SWIM GOGGLE
SA19GPC

No more hunting around for your goggles at the bottom of your bag and having to replace them every season due to scratched lenses, it's time to start taking care of your goggles with a protective case.

ERGO HAND PADDLES
SA19EPAD113

Ergonomically shaped for optimal catch to develop upper body strength. A great workout with leg bands and buoyancy shorts.

SILICONE V-FLEX FINS
SA18UFIN

100% silicone monocoque fins designed to improve ankle flexibility and strength, a hugely important part of improving a swimmers efficiency and speed in the water. Five sizes available and designed with comfort in mind.

POWER STROKE PADDLES
SA18CPAD

Designed to develop hand positioning through the water, hi-vis orange on the inside gives a visual aid to the swimmer to help correct swim stroke technique - with thumb & index finger entering the water first.

TRAINING KIT

SWIMWEAR

Made up of five exciting categories; with Kona Speed, Pacific Koa, Iconic, OWS Renew, and an all-out Race Range, there is something for all tastes and abilities this year as we further expand into the swimwear market. Working with experts within swimwear design, the range not only looks the part but performs to the highest level.

The ZONE3 Swimwear* collection is crafted sustainably using XFINITY Renew Fabric.

This cutting-edge fabric offers superior performance and is specifically engineered to produce swimwear that is both breathable and non-see-through, guaranteeing an impeccable fit and unparalleled freedom of movement.

XFINITY Renew Fabric encompasses all the essential qualities required for top-tier competition swimwear. It exhibits remarkable resistance against sunscreen, oils, and is chlorine proof; ensuring its longevity. Additionally, this fabric is fast-drying and provides UV protection of UPF50+.

*Excluding the FINA approved range and the Ti+ Range.

The Open water swimming range, which is designed for more leisurely swimming, now has an increased size range, and offers a more generous fit, so that everyone can experience the benefits of high quality swimwear.

ICONIC RANGE

The Iconic range is our core collection of swimwear. Featuring performance fabrics and fit and a black base with a geometric metallic gold print for a stylish and subtle look. Available in all of the most popular styles of swimwear to ensure there is something for everybody.

Now made from Xfinity Renew, exclusively made in Italy. It retains the performance of our original Xfinity material while enjoying enhanced eco credentials.

- + Xfinity renew fabric
- + UPF 50+ Protection
- + Breathable
- + 100% chlorine proof and sunscreen resisant
- + Flat-lock seams
- + 100% recycled material formed from recycled bottles

OWS TI+ RANGE

The New Women's OWS Ti+ Thermal high neck costumes boast a Titanium lining in body which offers improved thermal efficiency. The costumes are 100% no neoprene but still offer the same warmth benefits. The centre rear zip fastening provides easy access. A high neck design increases warmth and coverage, while an inner bra shelf provides added support. The seams are concealed to provide maximum comfort against the body and supreme hydrodynamics.

The outer material is an extraordinarily glossy surface, which guarantees a perfect fit over time.

TRIATHLON APPAREL

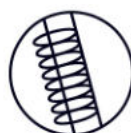

No triathlon is won in the water which is why our tri apparel has been designed to help get you to finish line in the fastest time possible. Performance fabrics and design features ensure maximum comfort and breathability – helping you push harder.

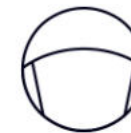

COVERAGE

We carefully select the denier rating and compression of our fabrics so they offer optimum coverage for body confidence.

CONSTRUCTION

The suits use either an innovative glue-bonded seam structure or flat-lock stitching designed for maximum strength and comfort.

POCKETS

Pockets have been carefully positioned onto some suits to store nutritional products or other race accessories whilst not creating excessive drag.

SILICONE LEG GRIPPERS

Positioned on the leg hem of each suit to prevent any movement of the shorts whilst also helping to prevent irritation. Unique design to offer just the right pressure.

TOTAL ZIP PROTECTION

Each of our suits has had a lot of care and attention put into it, this includes the inner protection system which ensures no rubbing on the sharp edges along the zip.

AERODYNAMICS

The suits use either an innovative glue-bonded seam structure or flat-lock stitching designed for maximum strength and comfort. Waterproof coating minimises the suits drag and increases speed through the water.

PADS

All suits use Italian designed pads to minimise water absorption and provide protection during the cycling phase, without impeding your swim or run. Fineline stitching is used to ensure maximum comfort and avoid risk of chafing.

FABRICS

We utilise the finest fabrics from all over the world to offer the highest performance and comfort during the swim, bike and run. Every product is tried and tested to ensure it meets our high standards – if it's not something our athletes would use, it's not something we'd sell.

ELASTIC TECHNOLOGY AND PIPING

Anatomically designed following flatlock or bonded construction for an unrestricted range of movement and reduced chafing. The fabrics are chosen on their performance and elastic properties further enhancing human body movement.

AEROFORCE-X II

We have collaborated with **NOPINZ**, specialists in creating aerodynamically optimised cycling speedsuits, to develop the world's fastest tri suit. European performance fabrics have been put through their paces under numerous conditions, including wind tunnel testing, to ensure each fabric selected utilises all the properties required to improve race times. 3D fabrics disrupt the airflow to cut through the air reducing drag, whilst ultra-lightweight and breathable fabrics, incorporated with ColdBlack technology is used across the body's core which is combined with a water repellent finish to give speed through the water. These fabrics are also designed to increase the range of motion to reduce fatigue across the shoulders and helps to regulate the body's temperature during the bike and run. Targeted compression on the legs help reduce fatigue and aid recovery time and pads have come from the Italian experts.

- + The most advanced development of our Aeroforce fabric.
- + Lowest drag on wind tunnel tests against competitors.
- + Extremely lightweight, water repellent and breathable.
- + Compression on lower body, Aero pockets, stretch zipper
- + Speedscalez™: Developed with Aero specialist NoPinz, this innovative triangle textured fabric is used on the legs, supporting core muscles, disrupting airflow, and improving the overall aerodynamics of the suit.

TRIATHLON APPAREL

AEROFORCE-X II TRISUIT

BEST

Designed to be the World's Fastest Tri Suit, the new Aeroforce X-II Trisuit has been fully tested in the wind tunnel, velodrome and by elite athletes. Exclusively manufactured in the UK, the suit features an innovative fit and fabric technology, including Speedscalez™, to maximise performance across each discipline. Utilising the facilities at the Boardman performance centre and Aerocoach (our aerodynamic partner) we have performed extensive fabric, pattern layout and competitor testing to help us produce the fastest possible bike time, without sacrificing swim and run comfort.

BEST

The perfect complement to your AF-X SS tri-suit utilising our revolutionary 3D textured Aeroforce fabric. Ideal for those racing long distance, in cooler conditions or for time trial use.

LAVA

Designed and developed for long distance triathlons using the finest quality European fabrics with targeted ColdBlack technology to regulate temperatures with maximum breathability and freedom of movement. Our pads come from the Italian experts, Elastic Interface. These low profile pads, coupled with targeted foam structures, ensure comfort on the bike while draining quickly after the swim and being unnoticeable on the run. Integrated grippers that are woven into the fabric keep everything in place while being unnoticeable and less restricting than standard sewn in grippers.

The Lava suits boast an impressive selection of features including new sleek styling and ultra lightweight, breathable fabrics with ColdBlack technology. Aerodynamic fabrics on the sleeve and upper back disrupt airflow, helping to cut through the air quicker. The water repellent coating will help to move through the water faster, and the graduated compression assists in getting the most out of each race.

SHORT SLEEVE SWIMSKINS

BEST

RACE APPROVED

The ZONE3 Swimskin has been designed to be the world's fastest because it's used by the world's fastest. By working with our partners at Yamamoto, we set out to find ways to make our Swimskin even faster by integrating a revolutionary SCS swim fabric which is extremely fast through the water.

The key features of this material include:

- + High-density knitted structure with 100% water repellent SCS coating.
- + SCS technology allows only the surface of suit to have hydrophilic property therefore meeting FINA approval.
- + Normally, swimskin surface frictional resistance is 1.8cdf whereas this innovative new SCS material has a surface frictional resistance of only 0.025cdf making it the world's fastest through the water.

Whilst this material is featured on the chest panel, the rest of the suit continues to offer extra core support and reduced drag. The remaining panels are made up from a selection of our X2R fabrics, a premium revolutionary woven fabric which is one of the lightest and most compressive fabrics available. It is extremely hydrophobic with only a 5% water absorption rate. To minimise drag, seams have been kept to a minimum and are fully seal bonded. The unique short sleeve panel design allows for maximum freedom of movement whilst providing full tri-suit coverage whatever you race in.

RA18RBGL112 | RA18RBGL113

The original belt with 3x energy gel storage loops and 3x race number clips.

KID'S RANGE

We have always been passionate about grassroots and understand how important those first experiences are. Our children's collection has been developed to the same standard as our adults range – offering perfect fit, supreme comfort and maximum performance.

KID'S RANGE

ADVENTURE WETSUIT

BEST

The Adventure wetsuit from ZONE3 is designed to provide quality and performance. It combines 1.5 – 4mm neoprene thicknesses and a panel design based on ZONE3's Advance adult wetsuit but with some slight adjustments to make it more age group specific.

Featuring an enhanced shoulder panel design, the Adventure has seen an upgrade to bring it line with ZONE3's best performing wetsuits, with an enhanced shoulder panel design using 1.5mm Yamamoto #39, a laser cut low neckline and hi-vis colourway.

ADVENTURE WETSUIT
WS21KADV101

ASPECT WETSUIT
WS22JASP101

ASPECT WETSUIT

BEST

The ZONE3 Aspect wetsuit has been developed in response to the high volume of swimmers searching for a wetsuit in which they can swim breaststroke as well as front crawl. The large majority of wetsuits on the market are only designed for surface swimming and don't allow for the lateral leg movement required for the breaststroke technique. This is where the Aspect is different, utilising a mixture of high performance Aqua-X, Smoothskin and High-Stretch Nylon panels, this wetsuit is designed to allow an extended range of movement between the legs and across the chest. Aqua-X is a coating applied to the neoprene which significantly reduces drag in the water whilst also improving durability.

KID'S RANGE

TRISUIT DIGITAL

BEST

The children's Adventure range of tri-apparel is designed for those younger triathletes looking to get started at an early age. This range will hopefully help to encourage participation in multisport events and give new entrants to the market a high quality product but at an affordable price. Taking inspiration from the adults collection, the Adventure is made using a Lycra sport fabric to ensure breathability, comfort and performance. Features include a children's specific Tri pad, easy-to-use front zipper, silicone UFO leg grippers and flat locked stitching to ensure maximum comfort.

Children's Sizing: S (8-10), M (10-12) and L (12-14).

Kids top and shorts are not available

XXL	178-196	5'10-6'5	90-105	198-231	117-127	46-50

FIT TIPS:

- + Triwear should be tight fitting in order to fit under wetsuits and be streamlined throughout a race.
- + Some suits are made of water repellent fabrics which has a little less stretch so if between sizes better to go one up.
- + The suit should feel tight, but if it constricts your breathing then you need to size up.

XXL	178-196	5'10-6'5	90-105	198-231	91-107	36-42

FIT TIPS:

- + Our compression garments follow a similar sizing strategy to our wetsuits. This is so we can offer the best possible fit for every body type.
- + Remember that to get the full effect of the medical grade fabric you need a good tight fit without being uncomfortable.
- + Working across the size chart should lead to your size.

WOMEN'S COMPRESSION SIZE CHART
