WORKBOOK CYCLING

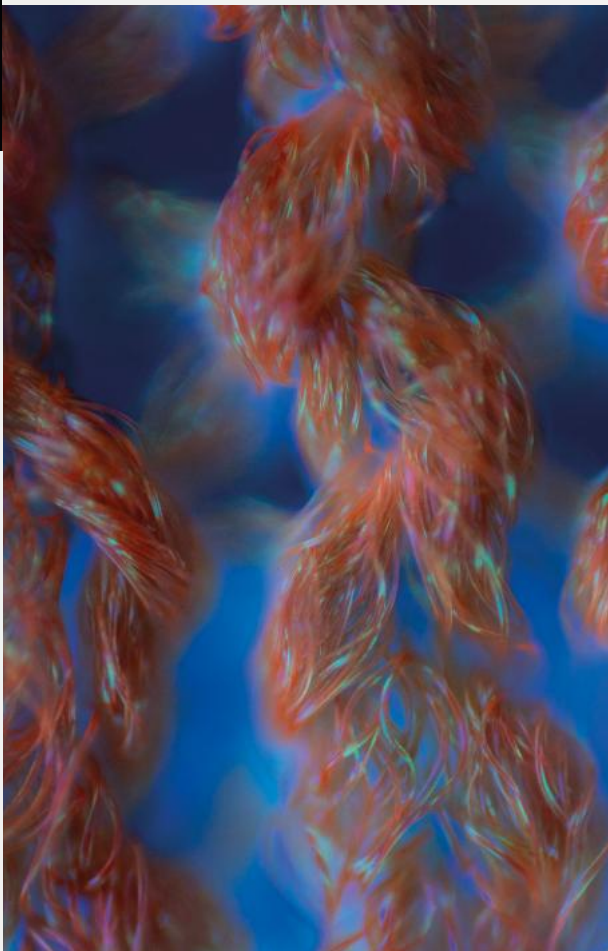

2026

**BORN** and based in Stockholm, Sweden, POC is a safety and performance pioneer on a global mission: protect lives and reduce the consequences of accidents for athletes and anyone inspired to be one. Creating all types of protection for cycling and snow sports, POC uses research, scientific methods and rigorous testing in its pursuit of innovation.

## THE **LEGACY COLLECTION**

Paying homage to some POC classics: a popping colour palette and the iconic propel logo, the Legacy Collection brings back fan favourites to the latest road and mountain bike styles.

## BAROCON CARBON

Made for the most demanding downhill and freeride settings, the Barocon works to keep you protected when the terrain demands your complete focus.

ARTICLE NO. **10884**

S	50–56 CM	TBD G
M	54–59 CM	TBD G
L	56–61 CM	TBD G

DETAILS\_

### Carbon fibre shell

The helmet features a lightweight and very strong carbon fibre outer shell.

### In-mould EPS

Liner The EPS liner features densities optimised for absolute protection in the most demanding scenarios, yet also helps to keep weight low.

### Multi-directional Breakaway Peak

The helmet peak is designed to break away from the helmet in an impact, whether from the front or the side, helping to reduce impact forces transmitted to the head in an accident.

### Works with a camera

The helmet peak is shaped to make it easy to mount an action camera.

### D-ring fastener

The helmet strap features a D-ring fastener for security.

### Adjustable padding

The fit of the helmet can be fine-tuned using the extra padding supplied.

### Mips

The helmet features Mips Evolve to enhance rotational impact protection

### Ear chambers

Extra space around the ears supports better balance and comfort.

### Meets motorcycle testing standards

The helmet is tested to either the NA DOT or European ECE22.06 motorcycle standards, as well as the usual downhill MTB standards, to offer greater protection.

### Lightweight

Despite the extra protection, the helmet weight is low for a full-face helmet.

### Ventilated

Ventilation channels ensure airflow both through and around the helmet, giving comfort.

## CULARIS PURE

Giving trusted protection with an entirely new approach to the helmet peak to offer flexibility for greater weather protection or more ventilation, the Cularis Pure works to keep you fully protected and comfortable on both technical and flow mountain bike trails.

DETAILS\_

**Changeable peak cover**  
The extended peak covers the top of the helmet and can be swapped so that ventilation holes are covered, giving extra protection from rain.

**Breakaway peak**  
The helmet peak will break away in a frontal impact, helping to reduce forces transmitted to your head.

**Ventilated protection**  
The helmet ventilation is optimised to keep you comfortable while riding the trails at any speed.

**PC Shell**  
A lightweight PC Shell adds structural stability to the helmet.

**EPS Liner**  
The expanded polystyrene (EPS) helmet liner is optimised to give extra protection in the areas most likely to suffer from impact forces.

**Adjustable 360°**  
Fit A 360° adjustment system makes it easy to find a secure, comfortable fit.

**Mips Evolve**  
The helmet features the tried and trusted Mips Evolve rotational impact protection system

AMIDAL

A slim, scaled-down silhouette gives the Amidal a streamlined appearance, ensuring you'll always feel fast in the peloton. Reinforced zones placed at the rear of the road cycling helmet enhance crash protection and give a distinct, easily distinguishable style, and lights produced by Knog especially for this helmet make sure you'll always be seen.

ARTICLE NO. 10883

DETAILS\_

**PC Shell**  
The helmet's outer shell is constructed from lightweight polycarbonate, offering structural stability.

**EPS Liner**  
The lightweight EPS helmet liner is optimised to provide crash protection while keeping overall helmet weight low.

**Mips Air Node**  
The latest technology from brain protection specialists Mips enhances rotational impact protection.

**Adjustable 360°**  
Fit A lightweight 360° adjustment system makes it easy to find a secure, comfortable fit.

**CFD Tested**  
Extensive computational fluid dynamics (CFD) testing was used to ensure aerodynamic and ventilation performance at high and low speeds.

**Rear reinforcement zones**  
Exterior reinforcement zones to the rear of the helmet help to provide structural stability and enhance protection in the event of a crash.

**Matching Knog lights**  
It's possible to attach a rear light to the helmet: the matching Knog light (supplied) complements the helmet perfectly

# LENS TECHNOLOGY

## A SINGULAR VISION. MULTIPLE LENSES.

Whether on the road, on the trail, in the sun or in overcast conditions, the right Clarity lens delivers ultimate trust in vision.

### ROAD

Tints tailored to heighten contrast on the road surface to give sharper definition at all times.

### TRAIL

Tints to manage abrupt changes in light and shadow and the colours of forest trails.

### UNIVERSAL

Sharper contrast and definition for a broad range of colours and light conditions.

### OTHER

Other lenses with specific functionalities, like polarized or photochromic lenses, are available.

CLEAR LENS

## CLARITY BY POC™

All lenses are tailored to give the sharpest vision in specific riding environments. The lens guide shows which lenses are best suited to different light conditions.

Lenses for road use have a violet base tint to best heighten contrast on road surfaces. Trail lenses feature a brown base tint to give better definition among trail-

associated greens and browns. Universal lenses are made for all-round use and use a grey base tint for best all-day comfort.

## DEVOUR MID

Scaled down for smaller faces, the Devour Mid combines the best features of goggles and sunglasses to give exceptional eye coverage and protection.

ARTICLE NO. **MA1011**

WEIGHT TBDg

DETAILS\_

**Complete UV Protection (UV400)**

The sunglasses give complete protection from harmful UVA and UVB rays

**Adjustable temples**

The length and grip of the temples can easily be adjusted for a personalised fit on any head shape.

**Clarity lens**

Clarity lens technology, developed in partnership with Carl Zeiss, gives optimum control of the colour spectrum for unparalleled vision on the trails.

**Ripel anti-dirt and -water treatment**

The Ri-Pel hydrophobic and oleophobic treatment protects from dirt, water, sweat, salt, oil and dust, and also makes the lenses easier to clean so your vision is always clear.

**Anti-scratch treatment**

An anti-scratch treatment reduces the risk of surface damage for clearer vision.

**Shaped for exceptional field of view**

The lens shape ensures your field of view is as large as possible, so you can see potential dangers and react in time.

**Interchangeable lens**

It's easy to swap lenses for riding in different light conditions.

**Soft pouch included**

The soft carrying pouch can also be used as a polishing

## ZYGON

Offering an exceptional field of view in every direction, comfort against the face and exceptional vision thanks to the Clarity by POC lens, the new ZYGON MTB goggles inspire confidence in all you see.

ARTICLE NO. 40272

WEIGHT TBDg

DETAILS\_

**Exceptional field of view**

The frame dimensions ensure minimal impact on field of view, so you can see clearly in every direction.

**Cylindrical lens shape**

The cylindrical lens gives a clear, undistorted view that you can trust while racing.

**Clarity by POC lens technology**

All available lens options feature Clarity technology, developed together with Zeiss, for better definition and contrast while riding the trails.

**Removable frame outriggers**

The frame outriggers help ensure the goggles sit as closely as possible next to your face and offer a

better fit next to a helmet.

**Removable ventilation lid**

Ventilation on the upper foam can be adjusted, so you can control airflow.

**DWR-treated ventilation foam**

The ventilation foam is treated with a DWR coating to help repel dirt and water.

**45mm-wide strap**

The strap is slightly wider than average, enhancing the feeling of security.

**Ri-Pel™ Ri-Pel™**

protects from dirt, water, sweat, salt, oil and dust, and makes the lenses easier to keep clean

## VPD AIR TORSO

Flexible, lightweight chest and back protection for every trail ride.

DETAILS\_

**3D-molded protectors**  
 Both the back and chest plates are 3D molded to give the perfect shape.

**Minimalist Design**  
 The minimalist design, with no jacket or vest, ensures you get the protection you need with no added bulk.

**Highly ventilated**  
 Large ventilation ports allow body heat to escape easily.

**Highly flexible**  
 The soft VPD material is highly flexible and moves with the body, ensuring you have complete freedom of movement.

**Certified protectors**  
 The protectors are certified to the toughest EN1621, level 1 standards.

**Modular protection**  
 By swapping the straps, the back protector can be used separately, giving you the best protection for both the ski and MTB seasons. (Adjustment straps sold separately).

## VPD MAX ELBOW

With the VPD Max Elbow protector, your elbows can move freely and stay fully protected while you face the toughest downhill trails.

DETAILS\_

### Double-layer VPD

The protector features two layers of VPD for flexibility and shock protection.

### Perforated protector

The perforated construction of the VPD protectors allows for controlled compression and supports airflow.

### Ergonomically shaped

The pads are shaped to follow the curves of your body while in the riding position.

### Soft casing

The pads are encased in soft and stretchy fabric. Lycra next to the skin allows gives a close yet comfortable fit and absolute freedom of movement.

**NEW** RECYCLED POLYESTER

## M'S MOTION S/S JERSEY

Constructed from high-performance fabric and with a relaxed t-shirt look, the men's Motion short-sleeve jersey is made for versatility, providing function and performance on and off the bike.

DETAILS\_

**Wear anywhere**

The jersey is made from high performance fabric with a casual t-shirt look..

**Lightweight materials**

The drirelease polyester-cotton blend is lightweight with a natural feeling.

**Exceptional wicking capacity**

Superb wicking sits within the fabric so you'll stay dry even through the hardest efforts.

**Casual fit**

A loose fit with slightly drooped shoulders, small chest pocket and discreet logo is ideal for any type of trail ride, and gives casual comfort

**Recycled materials**

The jersey is made with 85% recycled polyester.

**Small chest pocket**

A small chest pocket with POC flag label is included on the left

NEW PFC FREE DWR

## M'S & W'S MOTION PANTS

Lightweight, soft and highly flexible, the Motion Pants are the mountain bike trail pants for every rider and for all disciplines. Shaped for function, the trousers have a slightly tapered leg with a gusset at the bottom hem and have space for knee pads underneath.

DETAILS\_

### Lightweight material

Lightweight and highly durable recycled polyamide fabric with stretch..

### Quick Drying

The material wicks moisture away from the body and is quick to dry.

### Tapered leg with gusset

A tapered leg and elasticated gusset at the bottom hem give more space for pedalling

### Adjustable fit

A thin waistband adjuster makes it easy to find a secure and comfortable fit.

### Zippered pockets

The two zippered pockets are placed for ultimate comfort while riding.

### Fits with body armour

Extra room around the knee gives space for lighter protectors like the VPD Air Flow knee pads.

### Water repellent

A fluorocarbon-free DWR treatment gives protection from spray and light showers

### Recycled fabrics

Constructed from 95% recycled polyamide and 5% elastane main fabric, with a 100% recycled polyester pocket lining.

## M'S & W'S MOTION SHORTS

The Motion Shorts are lightweight and shaped for movement to keep you comfortable during even the toughest rides.

DETAILS\_

**Lightweight**  
Made of a material so light and flexible you'll feel completely free as you pedal.

**Shaped for comfort**  
Two pockets are optimally placed for extra comfort while pedalling.

**Fits with knee protectors**  
There's enough space for POC knee protectors to be worn with the shorts without impacting on your comfort or freedom of movement.

**Durable**  
The highly durable material is built to withstand knocks from trailside obstacles

**Splash resistant**  
CO/PFAS-free durable water repellent treatment ensures water easily pearls off in light showers.

**Waist adjusters**  
Find a comfortable and secure fit with the easy-to-adjust waist adjustment band.

**Recycled fabric**  
Made using 95% recycled polyamide with a 100% recycled polyester pocket lining.\*

## W'S REFORM ENDURO TEE

Experience an environmentally conscious balance of performance, practicality and comfort in this enduro t-shirt made using recycled materials.

DETAILS\_

**Recycled materials**

Recycled polyester weighing 220g/m<sup>2</sup> keeps the jersey lightweight and reduces environmental impact.

**Works with body armour**

The regular fit is cut to give space for both a back protector and elbow pads.

**Raglan sleeves**

The raglan sleeves ensure you can always move freely.

**Quick drying**

The long-sleeve jersey has exceptional wicking qualities and is quick to dry.

**Secure card pocket**

A discreet, zipped pocket on the lower left seam is

## W'S MOTION S/S JERSEY

Constructed from high-performance fabric and with a relaxed t-shirt look, the women's Motion short-sleeve jersey is made for versatility, providing function and performance on and off the bike.

DETAILS\_

**Wear anywhere**  
The jersey is made from high performance fabric with a casual t-shirt look.

**Lightweight materials.**  
The drirelease polyester-cotton blend is lightweight with a natural feeling.

**Exceptional wicking capacity**  
Superb wicking sits within the fabric so you'll stay dry even through the hardest efforts.

**Casual fit**  
A loose fit with slightly drooped shoulders, small chest pocket and discreet logo is ideal for any type of trail ride, and gives casual comfort.

**Recycled materials**  
The jersey is made with 85% recycled polyester.

**Small chest pocket**  
A small chest pocket with POC flag label is

## M'S RACEDAY S/S JERSEY

The lightweight Raceday Jersey works to keep you comfortable, cool and dry through your hardest efforts as you prepare for race day.

DETAILS\_

**Lightweight**  
The jersey is exceptionally lightweight, helping keep you cool and comfortable on every ride.

**Close fitting**  
The jersey is very stretchy, allowing for a very close fit.

**Recycled materials**  
The main jersey fabric is 84% recycled polyester, 16% elastane. The jacquard knitted mesh zones are 80% polyamide, 20% elastane

**Streamlined collar**  
The collar is folded at the front and takes a slight V-shape for ultimate streamlining.

**Rear storage**  
The jersey features three pockets to the rear, making it easy to carry

**Pillowcase openings on pockets**  
The pockets feature pillowcase openings to help keep your belongings secure.

**Moisture wicking**  
The jersey fabric effectively wicks moisture away from your body to keep you comfortable and dry through every effort.

**Shorter front**  
The jersey is slightly shorter than standard at the front to give more comfort while maintaining a lower position on the drops.

## M'S RACEDAY BIB SHORTS

Made to keep you in the race mindset, the Men's Raceday Bib Shorts give comfort and support in a close-fitting silhouette articulated for an aggressive position on the bike.

DETAILS\_

### Patent-pending chamois construction

The patent-pending chamois design is shaped and constructed to give extra support and softness exactly where it is needed most. Shaping and sculpting of the pad gives support and space, with no excess pressure on more sensitive areas.

### Articulated shape

The bibs are articulated in shape to enhance overall comfort while riding.

### 4-way stretch

You'll feel free to move naturally in any direction while wearing these bibs, thanks to the forgiving 4-way stretch built in to the fabric.

### Wicks moisture away

The bibs effectively wick moisture away from your body to keep you feeling dry and comfortable.

### Sun protection

The bibs give UPF50+ sun protection, so you can confidently ride in the sunshine.

### Recycled fabric

The bibs are constructed using 61% recycled polyamide and 39% elastane, weighing 175gsm.

### Crossover suspender

The extremely stretchy crossover suspenders keep the shorts securely in place, and are easy to pull down for essential mid-ride calls of nature.

### Raw-cut leg openings

The raw-cut edges at the leg openings help to keep the legs as slim as possible.

## W'S THERMAL LITE LS JERSEY

Providing optimum thermal regulation and excellent wicking capability thanks to a merino blend, the Women's Thermal Lite Long-Sleeve Jersey provides comfort and performance across the seasons.

DETAILS\_

### Merino blend

A blend of merino wool, polyester and polyamide in a double knit ensures the wool sits next to the body for maximum comfort

### Thermal regulation

The fabric has good thermal regulation properties and excels at wicking moisture away from the body to ensure a feeling of dryness.

### Good storage

Three large open rear pockets and a smaller zipped pocket give plenty of space for ride essentials.

### Secure fit

Broad elastic webbing with a silicone print at the hem gives comfort and security.

## W'S CADENCE L/S JERSEY

The go-to jersey for slightly cooler weather, the Women's Cadence Long-Sleeve Jersey blends technical performance with the kind of comfort that lets you keep riding all day long.

DETAILS\_

**All-day comfort**

The jersey is constructed from a durable polyester that is soft and comfortable against the skin for ultimate comfort all day long.

**Carry your kit**

Three large rear pockets give all the space you need to carry all your ride essentials.

**Improved airflow**

A lightweight mesh on the inside of the pocket next to the skin improves airflow beneath the pocket, helping to keep you cooler.

**UV protection**

The jersey offers UPF 50 sun protection, meaning you can feel confident you are protected from the sun on even the longest rides.

**Recycled materials**

The jersey is constructed using recycled polyester

**Quick to dry**

The lightweight fabric effectively wicks moisture away from the body, keeping you dry through every effort

**Full-length zipper**

The full-length YKK Vislon® zipper is easy to operate with one hand so you can quickly control your temperate while cycling.

**Secure pocket**

Easily keep small valuables or a bank card secure in the small zippered rear pocket

**Elasticated gripper**

A slightly wider elasticated gripper at the waist keeps the jersey comfortably and securely in place for the duration of your ride

NEW RECYCLED POLYESTER

## W'S CADENCE CARGO BIB SHORTS

Developed for absolute comfort without costing performance, these bibs feature a patent-pending chamois to keep you riding at your best. Cargo pockets on the legs make it easy to carry some essential supplies within easy reach at all times.

DETAILS\_

### Patent-pending chamois construction

The patent-pending chamois design is shaped and constructed to give extra support and softness exactly where it is needed most. Shaping and sculpting of the pad gives support and space, with no excess pressure on more sensitive areas.

### Articulated shape

The bibs are articulated in shape to enhance overall comfort while riding.

### 4-way stretch

You'll feel free to move naturally in any direction while wearing these bibs, thanks to the forgiving 4-way stretch built in to the fabric.

### Wicks moisture away

The bibs effectively wick moisture away from your body to keep you feeling dry and comfortable.

### Sun protection

The bibs give UPF50+ sun protection, so you can confidently ride in the sunshine.

### Cargo Pockets

Lightweight mesh cargo pockets feature on each leg.

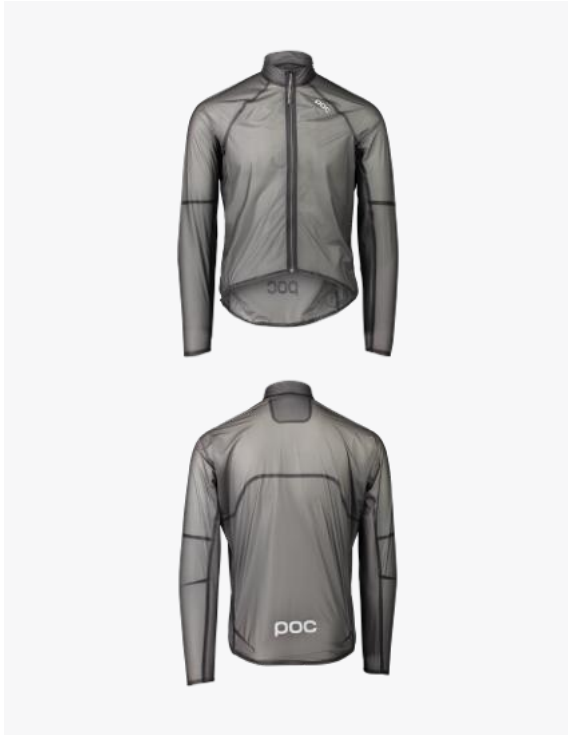

### Overlap suspender

Exceptionally flexible, stretchy and breathable fabric makes it possible to pull down the bibs without having to take off a jersey.

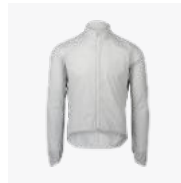

### Breathable torso

A lightweight fabric with perforations on the torso keeps air flowing for extra comfort, and helps keep you cooler beneath the jersey pockets.

# BIBS

Bib shorts can make or break a ride, and the rider. Essential for performance and comfort whether on a short, intense criterium or a long endurance adventure, getting the right bib shorts is vital. We build all our bibs around our unique VPDS inserts with silicone in the chamois. They use silicone for shock and vibration absorption so you can sit more comfortably for longer.

M'S NOVUS CHAMOIS

- The majority-recycled fabric is quick to dry and soft against the skin for ultimate comfort.
- Perforated foam across the entire chamois improves airflow and ventilation.
- Tapered edges give a more gradual transition away from the pad, improving all-round comfort and reducing the risk of chafing.
- A central channel aids improved bloodflow in the perineal area.
- High-density foam offers extra support and reduces pressure.
- Gel inserts embedded into the foam offer extra cushioning and vibration absorption for more comfort on longer rides.

M's Novus chamois will be Patent pending with shape being the novelty.

W'S NOVUS CHAMOIS

- The majority-recycled fabric is quick to dry and soft against the skin for ultimate comfort.
- Perforated foam across the entire chamois improves airflow and ventilation.
- Tapered edges give a more gradual transition away from the pad, improving all-round comfort and reducing the risk of chafing.
- A central cutout creates a deep zone offering extra support and space for genitalia, offering reduced pressure and more breathability.
- High-density foam offers extra support and reduces pressure.
- Gel inserts embedded into the foam offer extra cushioning and vibration absorption for more comfort on longer rides.

W's Novus chamois will be Patent pending with shape being the novelty.

## CADENCE CAP

DESCRIPTION

Made for comfort, the classic road Cadence Cap comes in three sizes and works well underneath your helmet or on its own.

ARTICLE NO.  
**58227**

Sizes  
S, M, L

### Comfortable fit

The cap is made from 100% cotton and has lightweight elastic tension for a comfortable fit.

### Three size options

The cap comes in three sizes (S, M & L) so it fits comfortably under the three sizes of POC helmet.

### Pop-up brim

You have the option of popping up the brim for increased field of vision.

NEW

## CADENCE ARM WARMER

DESCRIPTION

Providing extra warmth and comfort on cooler rides, the Cadence Arm Warmer is a layering essential that gives you the freedom to adjust your kit while on the move.

ARTICLE NO.  
**58225**

Sizes  
One size

### Control your warmth

Easily pack this essential piece in a jersey pocket to give you extra warmth in cooler conditions.

### Excellent wicking capacity

The polyamide/elastane blend efficiently moves moisture away from the body while protecting you from the wind.

### Seamless design

The seamless construction and subtle logo mean these arm warmers work with any jersey.

ABBREVIATIONS & MEASUREMENTS: 1" = 2,5 cm, 1 cm = 0.4", cir. = circumference

**ABS: ACRYLONITRILE BUTADIENE STYRENE**

A very hard plastic used in the helmet shell. It is widely known for its impact resistance, strength and durability.

**PC: POLYCARBONATE**

Stiff and strong material used in the helmet shell. It is well suited to thermoforming to give a secure bond with the helmet liner.

**EPP: EXPANDED POLYPROPYLENE**

A helmet liner material that can withstand multiple impacts, dependent on the severity of the impact. EPP liners tend to be thicker than EPS liners.

**TWICEME® NFC MEDICAL ID**

The twiCEme® NFC Medical ID is an NFC chip located inside the helmet. By using the associated app, wearers can upload their vital info and emergency contact details directly to the helmet. These can then be read by first responders—or anyone—with a smartphone at the scene of an accident.

**EPS: EXPANDED POLYSTYRENE**

The traditional helmet liner material found in most helmets (from all manufacturers). Will compress under force, and tends to only be suitable for one crash. Lighter than EPP. EPS liners can be thinner than EPP liners because EPS has better impact resistance in terms of volume of material used.

**ARAMID**

Exceptionally strong synthetic fibers that provide unsurpassed protection against penetration and enhance the structural stability of a helmet.

**FIBERGLASS**

Strong and lightweight material used in the helmet shell. Highly durable and well suited to thermo-forming, to give a secure bond with the helmet liner.

**CARBON FIBER**

Exceptionally lightweight and very strong material used in the helmet shell.

**UNIBODY SHELL**

Where the helmet shell works as a monocoque to give extra strength and stability to the entire helmet.

**ARMOR**

VPD: Visco-elastic polymer dough

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts. VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection

**VPD**

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts.

VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection.

**CERAMIC PRINT**

Small ceramic dots printed on a fabric to enhance durability and crash protection. The dots work to minimize friction between rider and road surface in a fall, thereby minimizing road rash and reducing damage to the garment itself.

**VECTRAN**

Vectran, a material around 5x stronger than steel, is a liquid crystal polymer much like a strengthened polyester. Its high tensile strength gives excellent cut, tear, abrasion and puncture resistance.

**CORDURA®**

A high-Denier nylon yarn used for its exceptional durability and abrasion resistance.

**AERO FABRIC**

A textured fabric designed to minimize drag and make a rider more easily slip through the air.

**VPDS**

VPDS is our Visco-elastic Polymer Dough blended with silicone. Developed for its exceptional vibration dampening effect, we use VPDS in our bib short chamois to help deliver a smoother ride.

**DWR**

Durable water repellent. A treatment used on our apparel to prevent water being absorbed by the material. The DWR ensures liquid pearls off the material surface for water repellency, not complete waterproofness.

**WATER COLUMN**

The water column indicates the level of water pressure a fabric will tolerate before any water will pass through. The higher the water column, the more waterproof the material is.

**BREATHABILITY**

The level of water vapour that a material will allow to pass through. Generally the measure is given in grams per square meter per 24hours (gsm/24hr). The higher the figure, the more breathable a material is.

**GRS**

Global Recycled Standard: An internationally recognised voluntary product standard that verifies the recycled content in a particular product.

**GRILAMID**

Lightweight, highly impact resistant, strong and weather resistant plastic, making it suitable for goggle and sunglasses frames.

**BIOGRILAMID**

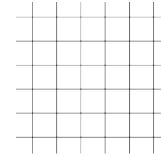

A biologically based alternative to Grilamid, developed using plant oils.

PFC-FREE DVR

RECYCLED POLYESTER

BIO-GRILAMID

RECYCLED POLYAMIDE

**ENVIRONMENTALLY-CONSCIOUS\_**

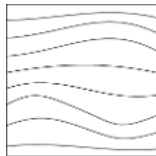

Uses materials or techniques that have less impact on the environment than standard materials or techniques.

**DURABLE\_**

Tougher materials designed to withstand scrapes and minimize the risk of tearing.

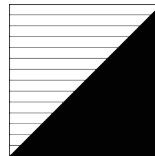

**LIGHTWEIGHT\_**

Constructed in ways or from materials that give a lower weight than comparable products.

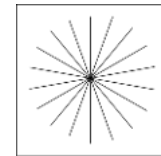

**DYNAMIC FIT**

Uses materials with four-way stretch for enhanced freedom of movement and exceptional comfort in the cycling position.

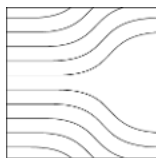

**WIND RESISTANT\_**

Uses fabrics that do not let the wind pass through, giving an effective barrier against the wind.

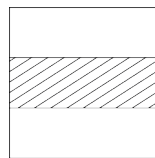

**HIGHLY VISIBLE\_**

Uses materials or technology to ensure riders are easily noticeable.

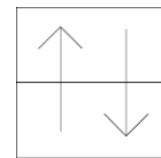

**AERODYNAMIC\_**

Materials, design and construction that work to enhance the aerodynamic properties of the garment.

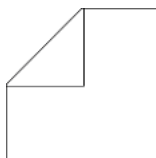

**INSULATED\_**

Uses fabrics or construction methods that trap air to provide insulation.

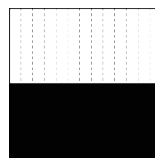

**THERMALLY REGULATIVE\_**

Uses fabrics with properties to aid thermal regulation.

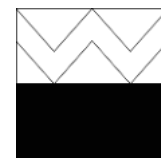

**PACKABLE\_**

Designed and constructed in a way that allows the garment to be packed and stored in its own pocket.

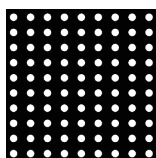

**WATER RESISTANT\_**

Features a DWR (Durable Water Repellent) treatment for protection from light showers.

**IMPACT PROTECTION\_**

Features materials that can absorb or dissipate impact forces to enhance protection.

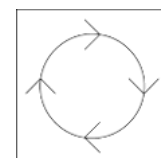

**BREATHABLE\_**

Fabric lets air and vapour pass through for exceptional ventilation.

**WATERPROOF\_**

Made from waterproof fabrics and with taped seams for complete protection from the rain.

**RECYCLED\_**

Made from majority post-consumer recycled materials.
