poc WORKBOOK SNOW 2026

Born and based in Stockholm, Sweden, POC is a safety and performance pioneer on a global mission: protect lives and reduce the consequences of accidents for athletes and anyone inspired to be one. Creating all types of protection for cycling and snow sports, POC uses research, scientific methods and rigorous testing in its pursuit of innovation.

ARCUS

Inspired by the uncompromising attitude of race helmets and the raw functionality of hockey design, Arcus redefines what snow protection can be. Built for skiers who chase speed and precision, it balances race-ready performance with freeride versatility.

ARTICLE NO. 10418

XS–S	51–54 CM	TBD G
M–L	55–58 CM	550 G
X–XXL	59–62 CM	TBD G

DETAILS

BOA® fit system
The BOA® fit system gives flexible, evenly distributed adjustment, reducing pressure points and improving comfort.

Adjustable ventillation
A central channel with magnetic three-step adjustment allows seamless control, even with gloves on.

Hybrid shell construction
A defined ABS lower shell with a finely sculpted PC in-mould top combines durability with lightness.

EPS liner
The EPS liner gives optimized, lightweight protection.

Detachable ear pads
Detachable ear pads give comfort across a wider range of temperatures.

Goggle Chimneys
Goggle chimneys allow heat from goggles to escape through the helmet, minimizing goggle steaming.

Integrated goggle clip
A flexible clip at the rear of the helmet keeps goggles securely attached.

Mips®
The inclusion of Mips® supports enhanced rotational impact protection.

Seamless fit with POC Goggle

OBEX CONTOUR

Designed for all the contours of the slopes, from the piste to the backcountry, Obex Contour blends clean, purposeful design with advanced protection.

ARTICLE NO. 10417

XS–S	51-54 CM	TBD G
M–L	55–58 CM	480 G
X–XXL	59-62 CM	TBD G

DETAILS

EPS liner
The EPS liner gives optimized, lightweight protection.

PC shell
The strong, durable PC shell gives a strong bond with the helmet liner for exceptional structural stability.

360° fit system
A 360° adjustment system makes it easy to find a comfortable, secure fit.

Ventilated
Ventilation channels ensure optimized airflow through the helmet for increased comfort.

Goggle chimneys
Goggle chimneys allow heat from goggles to escape through the helmet, minimizing goggle steaming.

Goggle clip
A flexible clip at the rear of the helmet keeps goggles securely attached.

Detachable ear pads
Detachable ear pads give comfort across a wider range of temperatures.

Headset compatible:
The helmet is compatible with the Obex Communication Headset.

Seamless fit with POC Goggle

CLARITY BY POC

GOGGLES

INTENSITY MATTERS

Whether racing, in the backcountry or on the piste; in bright sun, in the clouds or somewhere in between, the right Clarity lens gives you ultimate trust in your vision.

[1] UNIVERSAL

Ultimate eye comfort all day long.

[2] INTENSE

Detail to make choices about your lines and speed.

[3] HIGHLY INTENSE

Hyper-real view so you can read the piste at race speeds.

[4] POCITO

Gentle on young, developing eyes.

WHAT IS VLT

VLT stands for Visible Light Transmission, and is always given as a percentage. The higher the percentage, the more light can pass through the lens.

LENS CATEGORIES

Lenses are categorized based on their VLT, with each category being best suited to a particular type of use.

Category 0 have little to no tint, whereas category 4, are strongly tinted and let only a very limited amount of light pass through.

In ski goggles, category 2 lenses are best suited to days with extensive cloud cover, while category 3 are better on sunnier days. The darkest category 4 lenses are designed for use on glaciers where the conditions are very bright.

LENS CATEGORY	VLT
CAT. 0	80%+
CAT. 1	43–80%
CAT. 2	18–43%
CAT. 3	8–18%
CAT. 4	3–8%

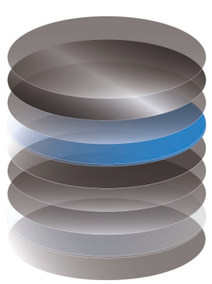

GOGGLES

LAYERS OF THE LENS

Each mirror tint serves a purpose; and it's not to grab attention. The mirror finish is carefully constructed to reflect light away from the eye and reduce glare.

Beneath the mirror lie layers of extra protection. Hydrophobic and oleophobic coatings, including Ri-Pel™, help keep the surface of the lens as clean and free of blemishes as possible. Lens surfaces may also be treated with anti-scratch and anti-reflection coatings to keep the lens pristine. POC goggles feature a double-layer lens to help minimize fogging and provide extra eye protection. A thicker, 1.8mm outer lens enhances penetration protection.

The Clarity Night Vision lens has extra layers of anti-reflective coating to reduce glare from floodlights to give ultimate focus while racing at night.

01. HYDROPHOBIC/OLEOPHOBIC

09. ANTI-FOG

LENS TINTS

Our lens tints are carefully chosen to best manage specific light conditions. The lens guide demonstrates the best base lens colors and mirror coatings for different riding conditions.

CYLINDRICAL SHAPE

These lenses allow for a more low-profile goggle to be designed because it is only curved along the horizontal axis. They can provide a very wide field of view.

TORIC/SPHERICAL SHAPE

These lenses offer a number of benefits to support visual comfort:

- Bigger lens surface supports improved peripheral vision in every direction.
- The lens follows the shape of the eye, and is a uniform distance from the eye, which minimizes distortion.
- Better antifog properties because there is more room between the lens and the eye.

SIZE MATTERS

Consider the size of your goggles in relation to your helmet if you want to achieve a fully aligned fit. A smaller helmet is best paired with a smaller goggle model, and a larger helmet with a larger goggle, so that features can fully align.

NEW BIO TPU

CIASMA

When the weather turns, you need gear that keeps pace. The Ciasma ski goggle features an advanced magnetic lens change system for effortless, secure swaps on the mountain, helping you maintain perfect vision in every condition.

ARTICLE NO. 40920

DETAILS

Magnetic lens bumper
The lens is fitted into a bumper that attaches to the frame with magnets to enable easy lens changes.

Clarity lens
The supplied lens features Clarity by POC lens technology for an enhanced visual experience.

Extra-large field of view
The frame shape ensures an extra-wide field of view and extends further down the cheek for uninterrupted peripheral vision.

Mono-material frame
The frame is constructed entirely from TPU, giving strength and durability.

Shaped face foam
Heat pressed face foam gives a more precise fit, increased field of view and a more premium feel.

Extended TPU protection zones
Extended TPU zones of protection provide extra durability and impact resistance without adding weight.

Anti-scratch treatment
An anti-scratch treatment on the outer lens reduces the risk of surface damage, helping ensure you always have uninterrupted vision.

Anti-fog treatment
An anti-fog treatment on the inner lens helps reduce internal fogging.

Two sets of lenses and bumpers
The goggle comes with two sets of lenses and bumpers, so you can prepare your setups in advance and swap between them with ease.

NEW BIO TPU WF

VITREA

Being able to have the right lens for the conditions – not for the day or the hour, but for the moment – is a necessity made possible by the Vitrea. The quick-change lens system can be operated while the goggles are still on your face, allowing you to explore the mountains with the best possible vision in all conditions, always.

ARTICLE NO. 40921

DETAILS

Easy-change magnetic lens system
A magnetic lens system makes it possible to change lenses without removing the goggles and while wearing gloves.

Anti-scratch treatment
An anti-scratch treatment on the outer lens reduces the risk of surface damage, helping ensure you always have uninterrupted vision.

Anti-fog treatment
An anti-fog treatment on the inner lens helps reduce internal fogging.

Clarity lens
The supplied lens features Clarity by POC lens technology for an enhanced visual experience.

Extra-large field of view
The frame shape ensures an extra-wide field of view and extends further down the cheek for uninterrupted peripheral vision.

Toric lens
The shallower angle of this toric lens, coupled with the oversize frame, gives exceptional vision in the lower periphery.

Dual-material frame
The frame is constructed from both Nylon and TPU, giving strength and flexibility.

Triple-layer face foam
Thick triple-layer face foam easily molds to the shape of your face for comfort in all conditions.

Silicone grippers
Silicone grippers on the inside of the strap help keep the goggles secure against a helmet.

Complete UV protection
All lenses offer complete UVA and UVB protection (UV400).

Comes with additional lens

VITREA MID

Being able to have the right lens for the conditions – not for the day or the hour, but for the moment – is a necessity made possible by the Vitrea Mid. The quick-change lens system can be operated while the goggles are still on your face, allowing you to explore the mountains with the best possible vision in all conditions, always.

This mid-sized goggle is a slightly smaller version of the regular Vitrea goggle.

ARTICLE NO. 40832

DETAILS

Easy-change magnetic lens system
A magnetic lens system makes it possible to change lenses without removing the goggles and while wearing gloves.

Anti-scratch treatment
An anti-scratch treatment on the outer lens reduces the risk of surface damage, helping ensure you always have uninterrupted vision.

Anti-fog treatment
An anti-fog treatment on the inner lens helps reduce internal fogging.

NEW BIO TPU WF

TARSAL

Ideal for skiing anywhere on the mountain, Tarsal's oversize frame extends down over the cheeks for extra coverage. With a shallow-angle toric lens enhanced by POC's Clarity technology, it delivers crisp, high-definition vision across your entire full field of view.

ARTICLE NO. 40836

DETAILS

Clarity lens
The supplied lens features Clarity by POC lens technology for an enhanced visual experience.

Large field of view
The frame shape ensures an extra-wide field of view and extends further down the cheek for uninterrupted peripheral vision.

Toric lens
The shallower angle of this toric lens, coupled with the oversize frame, gives exceptional vision in the lower periphery.

TPU frame
The frame is constructed from TPU, giving it a soft, flexible feel.

Triple-layer face foam
Thick triple-layer face foam easily molds to the shape of your face for comfort in all conditions.

Lens by ZEIZZ

Dual-material frame
The frame is constructed from both Nylon and TPU, giving strength and flexibility.

Triple-layer face foam
Thick triple-layer face foam easily molds to the shape of your face for comfort in all conditions.

Anti-scratch treatment
An anti-scratch treatment on the outer lens reduces the risk of surface damage, helping ensure you always have uninterrupted vision.

Ri-Pel anti-dirt and -water treatment
The Ri-Pel hydrophobic and oleophobic treatment protects from dirt, water, sweat, salt, oil and dust, and also makes the lenses easier to clean. It features on all lenses apart from the Clarity Intense Partly Sunny Orange, which features a hydrophobic coating only.

VPD MAX RACE VEST

Engineered to meet the demands of high-speed racing, the VPD Max Race Vest builds on the trusted VPD Max backplate with a refined construction that enhances impact absorption, stability, and comfort when every second counts.

DETAILS

Ventilated protector
The VPD Max Race protector is highly ventilated for extra comfort.

Certified
The protector is certified to European standard EN1621-2, Level 2.

Thicker central backplate
V-shaped profile enhances flexibility and allows the vest to sit closer to the body, creating a smoother, more stable fit

Highly flexible
The back protector is designed to enhance flexibility while maintaining exceptional strength.

Highly breathable
Both the vest and protector are designed to allow maximum airflow, improving comfort and breathability.

Washable vest
The protector is sewn into the vest, and the whole vest is machine washable.

Recyclable protector
The back protector can be removed from the vest and recycled at end of life.

Lightweight mesh vest
The vest is constructed from a lightweight mesh that provides support and ventilation while keeping weight low.

POC LOFT JACKET

Optimised for even more warmth, the Loft Jacket gives a feeling of exceptional warmth and comfort, keeping you protected from the elements and always allowing you to move freely on the mountain.

ARTICLE NO.
51087 (M's)
51088 (W's)

DETAILS

Waterproof materials
The coat is constructed using a waterproof polyamide with a 10 000 mm water column. Seams and zips are not taped meaning that seepage may occur in the wettest conditions.

Thermore® insulation
The Ecodown Fibers Genius insulation from Thermore® is a synthetic loose-fibre insulation made using post-consumer recycled PET. It gives exceptional warmth, even if the fibres become wet.

Reinforced zones
Reinforced shoulder areas improve durability and reduce the chance of damage from carrying skis.

Pre-bent sleeves
The arms are shaped for optimal freedom of movement.

Helmet-compatible hood
The hood fits over a ski helmet and is easily adjustable with one hand. A reflective POC logo features.

Ski pass holder
The front-left chest pocket features an inner pocket to keep a lift pass secure.

Glove-friendly zips
The back protector can be removed from the vest and recycled at end of life.

Large inner pockets
Roomy mesh pockets on the inside of the coat give excellent storage.

Velcro cuff adjusters
The cuffs can easily be adjusted for a snug fit.

Watertight zips
The watertight main zipper and side pocket zippers keep your essentials dry.

POC LITE PADDED JACKET

Lightweight and versatile, the Lite Padded Jacket is designed for comfort and warmth across a wide range of cold-weather activities. With a streamlined silhouette and breathable construction, it delivers warmth without bulk, making it easy to wear alone or as a warming mid-layer.

ARTICLE NO.
51092 (M's)
51093 (W's)

DETAILS

Constructed with Thermore® Evodown
A hybrid insulation made of two layers of rolled padding with loose fibers in between traps air effectively without clumping, delivering high insulation with minimal bulk.

Fluorocarbon-free DWR
A fluorocarbon-free durable water repellent (DWR) treatment keeps light rain out.

Versatile wear
Can be worn either as a jacket or a warming layer under a shell.

Adjustable waist
Drawstring at the waist lets you get a more secure fit.

Highly breathable
Both the vest and protector are designed to allow maximum airflow, improving comfort and breathability.

Hidden cuffs
Wide, elasticated cuffs are hidden inside the sleeve, supporting both comfort and insulation.

TECH

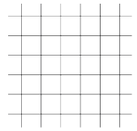

ICONS

PFC-FREE DVR
BIO TPU
RECYCLED POLYESTER
BIO-GRILAMID
RECYCLED POLYAMIDE

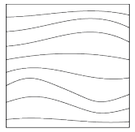

ENVIRONMENTALLY-CONSCIOUS_
Uses materials or techniques that have less impact on the environment than standard materials or techniques.

DURABLE_
Tougher materials designed to withstand scrapes and minimize the risk of tearing.

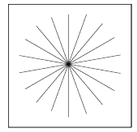

LIGHTWEIGHT_
Constructed in ways or from materials that give a lower weight than comparable products.

DYNAMIC FIT
Uses materials with four-way stretch for enhanced freedom of movement and exceptional comfort in the cycling position.

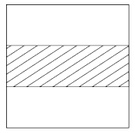

WIND RESISTANT_
Uses fabrics that do not let the wind pass through, giving an effective barrier against the wind.

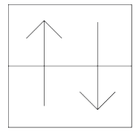

HIGHLY VISIBLE_
Uses materials or technology to ensure riders are easily noticeable.

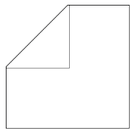

AERODYNAMIC_
Materials, design and construction that work to enhance the aerodynamic properties of the garment.

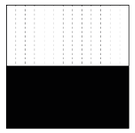

INSULATED_
Uses fabrics or construction methods that trap air to provide insulation.

THERMALLY REGULATIVE_
Uses fabrics with properties to aid thermal regulation.

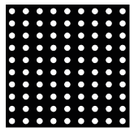

PACKABLE_
Designed and constructed in a way that allows the garment to be packed and stored in its own pocket.

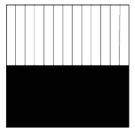

WATER RESISTANT_
Features a DWR (Durable Water Repellent) treatment for protection from light showers.

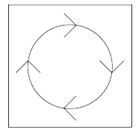

IMPACT PROTECTION_
Features materials that can absorb or dissipate impact forces to enhance protection.

BREATHABLE_
Fabric lets air and vapour pass through for exceptional ventilation.

WATERPROOF_
Made from waterproof fabrics and with taped seams for complete protection from the rain.

RECYCLED_
Made from majority post-consumer recycled materials.

TECH

GLOSSARY

HELMETS

ABS: ACRYLONITRILE BUTADIENE STYRENE

A very hard plastic used in the helmet shell. It is widely known for its impact resistance, strength and durability.

EPP: EXPANDED POLYPROPYLENE

A helmet liner material that can with-stand multiple impacts, dependent on the severity of the impact. EPP liners tend to be thicker than EPS liners.

CARBON FIBER

Exceptionally lightweight and very strong material used in the helmet shell.

EVA: ETHYLENE VINYL ACETATE

This thermoplastic offers rubber-like qualities, giving softness and flexibility.

PC: POLYCARBONATE

Stiff and strong material used in the helmet shell.
It is well suited to thermo-forming to give a secure bond with the helmet liner.

EPS: EXPANDED POLYSTYRENE

The traditional helmet liner material found in most helmets (from all manufacturers). Will compress under force, and tends to only be suitable for one crash. Lighter than EPP. EPS liners can be thinner than EPP liners because EPS has better impact resistance in terms of volume of material used.

ABS/PC

A blend of ABS and PC used in some of our helmet shells. It provides an ideal balance of durability and stiffness.

ARAMID

Exceptionally strong synthetic fibers that provide unsurpassed protection against penetration and enhance the structural stability of a helmet.

HELMETS & PROTECTION

VPD: VISCO-ELASTIC POLYME DOUGH

VPD is our highly flexible protective material, visco-elastic polymer dough. VPD retains its impact absorption ability regardless of number of impacts. VPD is malleable and shapes to the form of your body for a unique and flexible fit, only hardening on impact for enhanced protection.

APPAREL

DYNEEMA®

Dyneema® is one of the world's strongest materials. Around 15x stronger than steel, the material gives exceptional laceration protection. A new kind of Dyneema® with stretch, developed specifically for POC, allows us to create flexible armor.

GOGGLES

GRILAMID

Lightweight, highly impact resistant, strong and weather resistant plastic, making it suitable for goggle and sunglasses frames.

CP: CELLULOSE PROPIONATE

Highly durable plastic well suited to low temperatures and with excellent optical properties.

PC: POLYCARBONATE

Strong, highly durable material with superior optical properties, making it well suited to use in goggle lenses.

TPU: THERMOPLASTIC POLYURETHANE

Stiff and strong material used in the helmet shell. It is well suited to thermo-forming to give a secure bond with the helmet liner.
