Men's Pro 3L 3.0 Jacket

K00451

K0045103
Steel Blue

Climate Rating

K0045102
Black

K0045101
Atlanta Blue

The Pro 3L 3.0 ushers in a new generation of breathable, stretch, and lightweight rainwear. Swing freely in a full stretch jacket body-mapped with our new Hyper 3D Stretch material strategically placed to reinforce the full freedom of motion. Find innovative technologies throughout like the KJUS Rain Gutter System which redirects water in extreme downpours, KJUS Drawcord Waist System to get the jacket out of the way when chipping and putting, and volcanic mineral lined hand pockets to keep your hands ultradry to play strong in the rain. Designed for cool to cold days.

Features & Benefits

- Hyper 3D Stretch on shoulders, sides and back
- Hand pockets lined with brushed volcanic mineral fabric for moisture absorption
- Ergonomic stand up collar with chin guard
- Ultra-high collar back for protection
- K logo on collar and right shoulder
- KJUS Rain Gutter System
- KJUS Drawcord Waist Adjustment System
- KJUS Drawcord Hem Adjustment System

Details

Composition: 100% Polyester

The Pro 3L 3.0 ushers in a new generation of breathable, stretch, and lightweight rainwear with innovative enhancements. Move freely and perform your best with the four-way stretch technology, and keep dry with the fully seam-sealed construction. Utilize the magnetically hidden shoe flap to prevent rain intrusion through your shoelaces. Easily slip the Pro 3L 3.0 on or off over your pants or shorts, and regulate body temperature with its long two-way ventilation side zippers. It is time to upgrade to the Pro 3L 3.0 to keep up with the unpredictable weather.

Features & Benefits

- Snap closure waistband
- K logo on front leg and back calf
- Shoe rain visor with magnetic/hook closure
- Back pocket with magnetic button closure
- Standard and pass through pockets
- High side seam zipper for ease and ventilation
- KJUS Waist Adjustment System
- KJUS Hem Adjustment System
- Abrasion resistant bottom hems

Imagine, playing golf in a pant that acts and feels like an everyday trouser but keeps you dry in the rain. Gone are the days when intermittent rain during a round has a golfer uncertain if they should leave on or take off their rain pant. The Breton 3L Pant: a pant that can be proudly worn during an entire round of rain, even if it dissipates midway through.

Features & Benefits

- Waterproof, breathable, and windproof trouser
- Button closure waistband
- K logo above back pocket
- Additional pocket with concealed zipper

Details

Composition: 73% Polyamide, 22% Polyester, 5% Elastane

Reach Jacket

Interior Graphene Lining

GRAPHENE

Specialized materials are engineered with extremely light, durable, and highly conductive graphene to trap and disperse heat evenly across the surface. This reduces cold spots and creates the ideal temperature when you need it most.

The Reach Jacket features quilted insulation with an extremely high warmth-to-weight ratio, on both the front and back with a thermoregulating graphene lining for added warmth. The stretch side panels and arms provide excellent freedom of movement without compromising warmth. Designed for cold to very cold days.

Features & Benefits

- Graphene lining
- Ergonomic stand up collar with chin guard
- K logo on collar and right shoulder
- Stretch side panels and sleeves
- Insulated front and back
- Warm brushed sleeves
- Moisture-wicking interior lining
- Y-Tech cut for freedom of movement

Andrews Cooling Polo

COOLING

KJUS leverages two different technologies to cool the body. Innovative fiber structures increase the yarn's surface area to intensify natural evaporative cooling and prolong its effect. A permanent finish on the fabric's surface creates a cooling effect when in contact with the skin. These technologies work separately or together to provide cooling on hot days.

STRETCH

| | |
|---|--|
| 3D Technology Full stretch throughout all layers, from the lining, insulation, outer fabric, and seams to create the ultimate range of movement without sacrificing warmth. |  3D TECHNOLOGY |
| AC-Vent™ This KJUS-patented forearm venting system speeds the body's natural cooling process. Vents located in the lower arm allow for fine-tune air circulation to microregulate your temperature. |  AC-VENT™ |
| Anti-bacterial Technical treatment that is blended into the fabrics, preventing the growth and spread of odor-causing bacteria. |  ANTI BACTERIAL |
| Anti-Odor This technology is applied to the fabric to absorb odor-causing bacteria. |  ANTI-ODOR |
| Body Mapping Special fabrics, structures, or insulations strategically placed in gender-specific anatomical locations to increase warmth or enhance breathability where it will be most effective for the body. |  BODY MAPPING |
| Breathable Breathability comes as standard in all KJUS products, even in waterproof pieces. The number indicates the amount of perspiration that can escape from the fabric over a specific period of time. The higher the number, the more breathable. |  BREATHABLE |
| Bug Repellent Our innovative bug repellent finish helps to repel mosquitos for a more comfortable outdoor experience. This fabric is treated with all-natural micro-encapsulated citronella, offering a safer and non-toxic alternative to traditional repellents. |  BUG REPELLENT |
| Clo® Perforated An innovative construction retains heat when the temperature drops while increasing breathability during activity. Perforations create an open structure, allowing moisture to easily evaporate when body heat increases. Stay active without compromising performance with this perfect balance of warmth and breathability. |  CLO® |
| Cooling KJUS leverages two different technologies to cool the body. Innovative fiber structures increase the yarn's surface area to intensify natural evaporative cooling and prolong its effect. A permanent finish on the fabric's surface creates a cooling effect when in contact with the skin. These technologies work separately or together to provide cooling on hot days. |  COOLING |
| Dermizax® EV A non-porous, stretchable and soft membrane with high moisture permeability, waterproofness and breathability. |  DERMIZAX EV |

| | |
|--|---|
| Dermizax® NX A non-porous, stretchable and soft membrane with high moisture permeability, waterproofness and extremely high breathability. |  DERMIZAX NX |
| DWR Fabric is coated with a durable polymer barrier that reduces surface tension, ultimately repelling moisture and dirt. For optimal performance, wash garment and reapply treatment according to instructions. |  DWR |
| Eco-Coffee An innovative, energy-saving process fuses recycled coffee grounds to the yarn, changing the filament characteristics to create a performance-enhancing fabric that is eco-friendly. Micropores fight against odor-causing bacteria and provide moisture-wicking while coffee grounds naturally infuse UV ray reflection into the yarn. |  ECO-COFFEE |
| Eco-Friendly This product contains fabrics, trims, and/or insulations obtained from varying amounts of recycled materials that are designed to have a reduced environmental impact. |  ECO-FRIENDLY |
| Exhale Waterproof fabric engineered with the highest level of breathability to support optimal regulation of body temperature as activity levels intensify. The exceptionally high rating means a substantial amount of water vapor can escape from the fabric due to the high-performing membrane. When paired with highly breathable insulation, this combination helps to keep the interior microclimate stays dry and comfortable. |  EXHALE |
| Extra warmth Specially engineered materials provide exceptional warmth in extremely cold to cold temperatures. |  EXTRA WARMTH |
| FREELITE Innovative knit construction provides superior mobility. Engineered zonal body-mapping is specifically designed for the garment's use, delivering unparalleled breathability and temperature management. |  FREELITE |
| Graphene Specialized materials engineered with highly conductive graphene absorb body heat and evenly transports it throughout the fabric, reducing cold spots and regulating heat. |  GRAPHENE |
| HeiQ Fresh Tech Anti-odor technology that enhances fabrics with natural, long-lasting freshness by eliminating body and other environmental odors. Effective for up to 100 washes. |  HEIQ FRESH |

| | |
|---|---|
| Hydraulic A high-performance fabric with unique fiber structures designed to vigorously draw moisture away from the skin's surface, swiftly transporting it to the exterior for rapid evaporation. This process contributes to effective moisture management and body temperature regulation during increased activity. |  HYDRAULIC |
| Hyper 3D Stretch Highly waterproof stretch panels with built-in 3D expansion channels are strategically placed to provide extra stretch throughout the swing. Its placement follows the natural flow of the golf swing to help reduce drag and enhance the energy transferred from the body to the ball. |  HYPER 3D STRETCH |
| KJUS Fast Thermo Core High-performance stretch insulation that traps warm air and wicks moisture away, adding warmth while regulating body temperature in cold conditions. |  FAST THERMO CORE |
| KJUS Growth System A built-in system to accommodate a quick-growing junior athlete. Special construction at the hem, arms or waist allows you to easily increase the garment's size at different intervals. |  KJUS GROWTH SYSTEM |
| KJUS Premium Down Our premium down is responsibly sourced, carefully selected and thoroughly cleansed of allergens. This process creates an extremely lightweight down that provides maximum heat retention. |  PREMIUM DOWN |
| KJUS Premium Leather This new generation of leather is abrasion-resistant, flexible, soft and durable. |  PREMIUM LEATHER |
| KJUS Premium Wool A blend of the finest natural wool fibers that are intrinsically moisture-wicking and luxuriously warm. |  PREMIUM WOOL |
| Laser cut Laser cut technology prevents fraying of open edges, which are bonded with the highest precision. |  LASERCUT |
| Lifestyle Our lifestyle apparel incorporates key KJUS technologies and premium craftsmanship in everyday wear, culminating in high-performance and luxurious style. |  LIFESTYLE |
| Lightweight Lightweight is a signature feature that distinguishes KJUS products. We use light materials that out-perform others in warmth-to-weight ratio. |  LIGHTWEIGHT |
| Light warmth Specially engineered materials provide warmth in mild temperatures. |  LIGHT WARMTH |

| | |
|---|---|
| Loro Piana Storm System Made from the finest Italian yarns, Loro Piana fabrics are the epitome of luxury. Specializing in the processing of cashmere and extra fine wool for impeccable quality and softness, delivering a unique sensory experience for the wearer. |  LORO PIANA |
| Mineral Circulation Natural minerals woven into the fabric convert infrared and visible light into energy close to your body, increasing your tissue's transfer of oxygen. This aids your body's recovery by increasing blood flow and oxygen levels, which helps soothe joint and muscle soreness and promotes faster healing. |  MINERAL CIRCULATION |
| Moisture Renewal Ultra-soft, breathable yarn engineered to replenish moisture, leaving your skin smooth and hydrated even in harsh conditions. |  MOISTURE RENEWAL |
| Packable Folds down into an ultra-compact size that can be packed into its own pocket for easy portability. |  PACKABLE |
| Hollow Pima Cotton Engineered cotton utilizing cutting-edge yarn technology to create a hollow inner core. This innovative design ensures maximum moisture-wicking and thermoregulation properties, keeping you cool and dry. The process not only enhances performance but also keeps the yarns lightweight, while maintaining a luxurious softness. |  HOLLOW PIMA COTTON |
| Phase-Change Material This phase-change material actively equalizes extreme temperatures and provides balanced inner climate at multiple temperatures. Wax within the fabric trap excess heat. When the temperature drops, the stored heat is released back to body. |  PHASE-CHANGE MATERIAL |
| Polartec® Alpha® This military-grade fleece keeps you warm, even when the body is wet. It is quick drying, highly durable and has a high warmth-to-weight ratio. |  POLARTEC® Alpha® |
| Quick-drying An innovative technology in the fabric or its construction that quickly wicks moisture away from the body, facilitating improved evaporation. |  QUICK-DRYING |
| Reactive Climate Control Create the optimal environment as your body heat fluctuates. High-performance fabrics are combined with thermodynamic materials that trap body heat during peak performance and are released after you cool down, helping to regulate your body temperature. |  REACTIVE CLIMATE CONTROL |

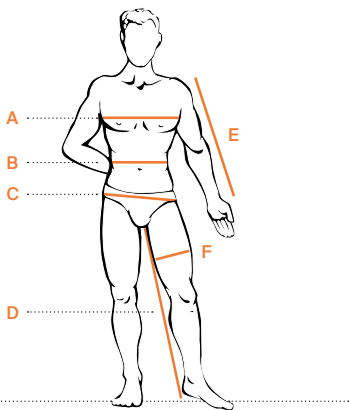

| | |
|--|--|
| Reversible Designed with uniquely different performance-enhancing technologies engineered for each side of the garment. This allows you to get specific technologies supporting your body's microclimate, flexibility and more depending on what side is facing out. |  REVERSIBLE |
| Stretch Stretchable fabric that expands and retracts in sync with the body and provides unrestricted freedom of movement. |  STRETCH |
| SpheraTEMP Maximum insulation warmth with extremely low mass, this new generation of synthetic down alternative is comprised of tiny spheres that mimic down at a fraction of the weight. It is highly water resistant and continues to insulate even when wet. Developed to be hypoallergenic and free from animal derived materials. |  SpheraTEMP |
| Toray 3DeFX+™ Synthetic insulation fabric consisting of four different spiral-shaped microfibers with high elasticity and thermal retention. |  3DeFX+™ |
| Ultra-soft Exceptionally smooth, ultra-stretch fabric that is extremely soft against the skin. |  ULTRA - SOFT |
| Ultra-Sonic Bonding Technical technique used to bond materials using ultra-sonic vibrations for a thin, longer lasting and precise seam. |  BONDING |
| Ultra-stretch Highly stretchable fabric that expands and retracts in sync with the body and provides unrestricted freedom of movement. |  ULTRA - STRETCH |

| | |
|---|---|
| UPF Protection The Ultraviolet Protection Factor (UPF) rating system measures how well a fabric prevents UVA and UVB rays from penetrating through the fabric to the skin. The higher the rating, the greater the protection. |  UPF PROTECTION |
| VaporTemp A highly innovative, thermoregulating fabric treatment that uses the energy from your body to help accelerate its natural ability to evaporate perspiration, drawing it away from your skin and out of the garment. At the same time, it helps to regulate body temperature even when weather conditions change. |  VAPORTEMP |
| Volcanic Yarns Refined volcanic sand and carbonized materials embedded into the fabric reflect infrared waves for quick warmth. These active particles also work together to help create the optimal humidity level on the surface of the skin. Simultaneously, antibacterial properties help to eliminate odor when activity levels intensify. |  VOLCANIC YARNS |
| Warm Specially engineered materials provide additional warmth in cold to mild temperatures. |  WARM |
| Waterproof Engineered with sealed seams and water-resistant zippers. The higher the number rating, the more waterproof the fabric. |  WATERPROOF |
| Windproof Specially engineered coating applied to the outer fabric that provides wind blocking properties to the garment. |  WINDPROOF |
