KJUS Orange Label

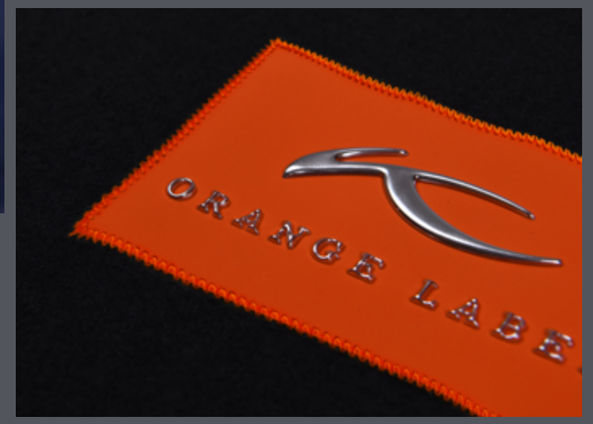

Experience the pinnacle of performance and luxury with the KJUS Orange Label—our most exclusive line, signifying the highest standard of quality. Meticulously crafted from the finest fabrics—including luxurious Loro Piana materials from Italy in select styles—each piece seamlessly integrates cutting-edge KJUS technologies to deliver superior temperature regulation.

The KJUS Orange Label is in honor of our brand roots and embodies uncompromising craftsmanship and innovation for those who demand the very best.

MENS

Cashmere Tech Jacket

K01132

Wrap yourself in opulent luxury and innovation with this KJUS Orange Label jacket, crafted from Loro Piana cashmere fabric made in Italy. Graphene lining enhances warmth, while four-way stretch ensures mobility. A Graphene-lined phone pocket preserves battery life, Moisture Renewal cuffs hydrate skin, and a Hideaway Snow Skirt System provides protection. Perfectly suited for both alpine slopes and village life.

MENS

Frozen Smoke Jacket

AEROGEL

Through an advanced process, a gel's liquid is replaced with gas, creating a lightweight solid that's 99% air. Originally developed for aerospace exploration, aerogel forms micro air pockets that trap heat and deliver exceptional warmth without bulk. Light and breathable, it redefines thermoregulation for peak performance.

MENS

Frozen Smoke Jacket

K01126

Part of the exclusive KJUS Orange Label line, this jacket features Aerogel membrane and Aerogel insulation, where a gel's liquid is replaced with gas to form micro air pockets that trap heat for lightweight warmth. A fixed hood with Sunfibre™ Wearable Active Lighting provides visibility when connected to a phone or portable charger. The integrated KJUS AC-Vent™ system allows customizable ventilation, while RidgeLogic Graphene technology delivers targeted warmth and superior stretch. Finished with Mineral Circulation cuffs and a removable and adjustable snow skirt, it offers complete performance on the slopes.

KJUS FRX Collection

Elevate your performance with the KJUS FRX Collection—an advanced range of shell jackets, pants, insulation, and layering styles co-designed with professional skier Lucas Swieykowski. Each piece is crafted for seamless layering and precise temperature regulation, allowing you to fine-tune your comfort.

The outer shells feature Hyper 3D Stretch and membranes that move effortlessly with you, delivering exceptional water- and windproof protection, 40k breathability, and strategic ventilation. Insulating layers are engineered with VaporTemp linings and premium down chambers to provide thermoregulating warmth. Working in perfect harmony, the FRX Collection ensures unmatched comfort, airflow, and performance—so you can push your limits in any condition.

MENS

FRX Lucas Shell Jacket

K01127

Amplify your performance with this advanced shell jacket, designed in collaboration with professional skier Lucas Swieykowski. Engineered to be soft and quiet yet highly protective, it exceeds expectations in water- and windproof performance. Hyper 3D Stretch technology adapts to every motion, offering over four times the stretch of our competitor. Volcanic-lined hand pockets provide warmth, while fully sealed seams deliver robust defense against the elements. The KJUS AC-Vent™ system on the forearms and adjustable center ventilation ensure optimal breathability and comfort.

KJUS FRX Collection

Elevate your performance with the KJUS FRX Collection—an advanced range of shell jackets, pants, insulation, and layering styles co-designed with professional skier Lucas Swieykowski. Each piece is crafted for seamless layering and precise temperature regulation, allowing you to fine-tune your comfort.

The outer shells feature Hyper 3D Stretch and membranes that move effortlessly with you, delivering exceptional water- and windproof protection, 40k breathability, and strategic ventilation. Insulating layers are engineered with VaporTemp linings and premium down chambers to provide thermoregulating warmth. Working in perfect harmony, the FRX Collection ensures unmatched comfort, airflow, and performance—so you can push your limits in any condition.

WOMENS

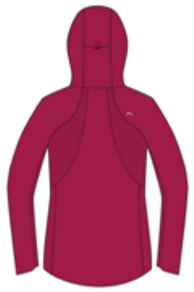

FRX Summit Shell Jacket

K01161

This high-performance women's shell jacket offers superior waterproof and windproof protection. Hyper 3D Stretch fabric ensures unrestricted movement, while the soft, quiet material enhances comfort. A helmet-compatible hood and fully sealed seams shield you from the elements, volcanic-lined hand pockets add warmth, and the KJUS AC-Vent™ system provides breathability for top performance.

Arabella Jacket

VAPORTEMP

A highly innovative, thermoregulating fabric treatment that uses the energy from your body to help accelerate its natural ability to evaporate perspiration, drawing it away from your skin and out of the garment. At the same time, it helps to regulate body temperature even when weather conditions change.

WOMENS

Capture Jacket

K01159

This standout jacket combines sustainability with high performance, crafted from innovative fabric made from carbon that was captured from the air during production. Advanced technologies—Graphene lining and recycled down—deliver regulated warmth without bulk. A Graphene-lined phone pocket helps extend battery life in cold conditions, while the Advance Ventilation System ensures optimal airflow on warmer ski days. Finished with a removable hood and snow skirt for versatile protection.

Glossary

3D Technology
Full stretch throughout all layers, from the lining, insulation, outer fabric, and seams to create the ultimate range of movement without sacrificing warmth.

3D TECHNOLOGY

AC-Vent™
This KJUS-patented forearm venting system speeds the body's natural cooling process. Vents located in the lower arm allow for fine-tune air circulation to microregulate your temperature.

AC-VENT™

Aerogel
Through an advanced process, a gel's liquid is replaced with gas, creating a lightweight solid that's 99% air. Originally developed for aerospace exploration, aerogel forms micro air pockets that trap heat and deliver exceptional warmth without bulk. Light and breathable, it redefines thermoregulation for peak performance.

AEROGEL

Anti-bacterial
Technical treatment that is blended into the fabrics, preventing the growth and spread of odor-causing bacteria.

ANTI BACTERIAL

Anti-Odor
This technology is applied to the fabric to absorb odor-causing bacteria.

ANTI-ODOR

Body Mapping
Special fabrics, structures, or insulations strategically placed in gender-specific anatomical locations to increase warmth or enhance breathability where it will be most effective for the body.

BODY MAPPING

Breathable
Breathability comes as standard in all KJUS products, even in waterproof pieces. The number indicates the amount of perspiration that can escape from the fabric over a specific period of time. The higher the number, the more breathable.

BREATHABLE

Bug Repellent
Our innovative bug repellent finish helps to repel mosquitoes for a more comfortable outdoor experience. This fabric is treated with all-natural micro-encapsulated citronella, offering a safer and non-toxic alternative to traditional repellents.

BUG REPELLENT

Carbon Capture
A textile produced by capturing carbon dioxide from the atmosphere and converting it into key polyester molecules through a distillation process. The result is a high-performance material while helping to reduce the fabric's carbon footprint, exemplifying KJUS's commitment to environmental innovation.

CARBON CAPTURE

Clo® Perforated
An innovative construction retains heat when the temperature drops while increasing breathability during activity. Perforations create an open structure, allowing moisture to easily evaporate when body heat increases. Stay active without compromising performance with this perfect balance of warmth and breathability.

Cooling
KJUS leverages two different technologies to cool the body. Innovative fiber structures increase the yarn's surface area to intensify natural evaporative cooling and prolong its effect. A permanent finish on the fabric's surface creates a cooling effect when in contact with the skin. These technologies work separately or together to provide cooling on hot days.

COOLING

DWR
Fabric is coated with a durable polymer barrier that reduces surface tension, ultimately repelling moisture and dirt. For optimal performance, wash garment and reapply treatment according to instructions.

DWR

Eco-Coffee
An innovative, energy-saving process fuses recycled coffee grounds to the yarn, changing the filament characteristics to create a performance-enhancing fabric that is eco-friendly. Micropores fight against odor-causing bacteria and provide moisture-wicking while coffee grounds naturally infuse UV ray reflection into the yarn.

ECO-COFFEE

Exhale
Waterproof fabric engineered with the highest level of breathability to support optimal regulation of body temperature as activity levels intensify. The exceptionally high rating means a substantial amount of water vapor can escape from the fabric due to the high-performing membrane. When paired with highly breathable insulation, this combination helps to keep the interior microclimate stays dry and comfortable.

EXHALE

FREELITE
Innovative knit construction provides superior mobility. Engineered zonal body-mapping is specifically designed for the garment's use, delivering unparalleled breathability and temperature management.

FREELITE

Graphene
Specialized materials engineered with highly conductive graphene absorb body heat and evenly transports it throughout the fabric, reducing cold spots and regulating heat.

GRAPHENE

HeiQ Fresh Tech
Anti-odor technology that enhances fabrics with natural, long-lasting freshness by eliminating body and other environmental odors. Effective for up to 100 washes.

HEIQ FRESH

Hydraulic
A high-performance fabric with unique fiber structures designed to vigorously draw moisture away from the skin's surface, swiftly transporting it to the exterior for rapid evaporation. This process contributes to effective moisture management and body temperature regulation during increased activity.

HYDRAULIC

Hyper 3D Stretch
Highly waterproof stretch panels with built-in 3D expansion channels are strategically placed within our already stretchy fabric. These panels are designed to follow the body's natural movement, reducing drag, and enhancing mobility.

HYPER 3D STRETCH

KJUS Fast Thermo Core
High-performance stretch insulation that traps warm air and wicks moisture away, adding warmth while regulating body temperature in cold conditions.

FAST THERMO CORE

KJUS Growth System
A built-in system to accommodate a quick-growing junior athlete. Special construction at the hem, arms or waist allows you to easily increase the garment's size at different intervals.

KJUS GROWTH SYSTEM

KJUS Premium Cashmere
Crafted from the world's finest fibers, premium cashmere provides unrivaled softness, inherent performance, and enduring warmth.

PREMIUM CASHMERE

KJUS Premium Down
Our premium down is responsibly sourced, carefully selected and thoroughly cleansed of allergens. This process creates an extremely lightweight down that provides maximum heat retention.

PREMIUM DOWN

KJUS Premium Leather
This new generation of leather is abrasion-resistant, flexible, soft and durable.

PREMIUM LEATHER

KJUS Premium Wool
A blend of the finest natural wool fibers that are intrinsically moisture-wicking and luxuriously warm.

PREMIUM WOOL

Laser cut
Laser cut technology prevents fraying of open edges, which are bonded with the highest precision.

LASERCUT

Lifestyle
Our lifestyle apparel incorporates key KJUS technologies and premium craftsmanship in everyday wear, culminating in high-performance and luxurious style.

LIFESTYLE

Lightweight
Lightweight is a signature feature that distinguishes KJUS products. We use light materials that out-perform others in warmth-to-weight ratio.

LIGHTWEIGHT

Loro Piana
Made from the finest Italian yarns, Loro Piana fabrics are the epitome of luxury. Specializing in the processing of cashmere and extra fine wool for impeccable quality and softness, delivering a unique sensory experience for the wearer.

Loro Piana

Mineral Circulation
Natural minerals woven into the fabric convert infrared and visible light into energy close to your body, increasing your tissue's transfer of oxygen. This aids your body's recovery by increasing blood flow and oxygen levels, which helps soothe joint and muscle soreness and promotes faster healing.

MINERAL CIRCULATION

Moisture Renewal
Ultra-soft, breathable yarn engineered to replenish moisture, leaving your skin smooth and hydrated even in harsh conditions.

MOISTURE RENEWAL

Orange Label
When you choose Orange Label, you are selecting the very best KJUS has to offer—a perfect fusion of elegance and cutting-edge functionality. This exclusive distinction is reserved for products that combine the world's finest materials with our most advanced technologies.

ORANGE LABEL

Packable
Folds down into an ultra-compact size that can be packed into its own pocket for easy portability.

PACKABLE

Hollow Pima Cotton
Engineered cotton utilizing cutting-edge yarn technology to create a hollow inner core. This innovative design ensures maximum moisture-wicking and thermoregulation properties, keeping you cool and dry. The process not only enhances performance but also keeps the yarns lightweight, while maintaining a luxurious softness.

HOLLOW PIMA COTTON

Phase-Change Material
This phase-change material actively equalizes extreme temperatures and provides balanced inner climate at multiple temperatures. Wax within the fabric trap excess heat. When the temperature drops, the stored heat is released back to body.

Polartec® Alpha®
This military-grade fleece keeps you warm, even when the body is wet. It is quick drying, highly durable and has a high warmth-to-weight ratio.

POLARTEC® Alpha®

Quick-drying
An innovative technology in the fabric or its construction that quickly wicks moisture away from the body, facilitating improved evaporation.

QUICK-DRYING

Reactive Climate Control
Create the optimal environment as your body heat fluctuates. High-performance fabrics are combined with thermodynamic materials that trap body heat during peak performance and are released after you cool down, helping to regulate your body temperature.

REACTIVE CLIMATE CONTROL

Reversible
Designed with uniquely different performance-enhancing technologies engineered for each side of the garment. This allows you to get specific technologies supporting your body's microclimate, flexibility and more depending on what side is facing out.

REVERSIBLE

Stretch
Stretchable fabric that expands and retracts in sync with the body and provides unrestricted freedom of movement.

STRETCH

SpheraTEMP
Maximum insulation warmth with extremely low mass, this new generation of synthetic down alternative is comprised of tiny spheres that mimic down at a fraction of the weight. It is highly water resistant and continues to insulate even when wet. Developed to be hypoallergenic and free from animal derived materials.

SpheraTEMP

Synthetic Down
A high-performance alternative to natural down, made from specialized fibers that mimic its loft, softness, and insulation. Lightweight, quick-drying, and hypoallergenic, it maintains warmth even in wet conditions.

SYNTHETIC DOWN

Toray 3DeFX+™
Synthetic insulation fabric consisting of four different spiral-shaped microfibers with high elasticity and thermal retention.

3DeFX+™

Ultra-soft
Exceptionally smooth, ultra-stretch fabric that is extremely soft against the skin.

ULTRA - SOFT

Ultra-Sonic Bonding
Technical technique used to bond materials using ultra-sonic vibrations for a thin, longer lasting and precise seam.

BONDING

Ultra-stretch
Highly stretchable fabric that expands and retracts in sync with the body and provides unrestricted freedom of movement.

ULTRA - STRETCH

UPF Protection
The Ultraviolet Protection Factor (UPF) rating system measures how well a fabric prevents UVA and UVB rays from penetrating through the fabric to the skin. The higher the rating, the greater the protection.

UPF PROTECTION

VaporTemp

A highly innovative, thermoregulating fabric treatment that uses the energy from your body to help accelerate its natural ability to evaporate perspiration, drawing it away from your skin and out of the garment. At the same time, it helps to regulate body temperature even when weather conditions change.

Volcanic Yarns

Refined volcanic sand and carbonized materials embedded into the fabric reflect infrared waves for quick warmth. These active particles also work together to help create the optimal humidity level on the surface of the skin. Simultaneously, antibacterial properties help to eliminate odor when activity levels intensify.

Waterproof

Engineered with sealed seams and water-resistant zippers. The higher the number rating, the more waterproof the fabric.

Windproof

Specially engineered coating applied to the outer fabric that provides wind blocking properties to the garment.
