„LASST UNS 100 JAHRE LEIDENSCHAFT FEIERN“

„LET`S CELEBRATE 100 YEARS OF PASSION“

In Hohenems, dem Ort, an dem 1924 mit und durch Anton Kästle alles begann, befindet sich auch heute – im Jahr 2024 – der Hauptsitz des Unternehmens. Kästle ist ein Unternehmen, das in einem Jahrhundert Höhen und Tiefen durchschreiten musste: vom gefeiereten Marktführer und Seriensieger im Weltcup bis zum zeitweiligen Verschwinden der Marke haben wir alles erlebt. Revolutionäre Innovationen wie das CPM (Compound-Plastic-Metal), das den Skibau bis heute nachhaltig beeinflusst, stehen für den Pioniergeist der Marke, der unabhängig von den Eigentümern stets ungebrochen war, meist verbunden mit der Idee, die Bühne des SkirennSports mit besonderen Athleten zu betreten und unvergessliche Momente zu feiern. Ende der 60er- Jahre übernahmen Josef Fischer und Selma Sturmberger die Vorarlberger Skifirma, um sie nach sehr erfolgreichen Jahren 1991 an die italienische Benetton-Gruppe zu verkaufen. Es entstand „Benetton Sportsystems“ mit zahlreichen Sportmarken. Im Laufe der Geschichte wurden zu Höchstzeiten am Vorarlberger Standort bis zu 400.000 Paar Ski jährlich gebaut und weltweit vertrieben – eine Zahl, die beim heute viel geringeren, aber qualitätsorientierteren Skibedarf nicht mehr zum Vergleich dienen kann, jedenfalls aber eine beeindruckende Bilanz darstellt.

Heute, 100 Jahre nachdem Anton Kästle den ersten Ski fertigte, gehört die Marke zur Unternehmensgruppe ConsilTech, verfügt über zwei eigene Produktionsstätten in Hohenems und im tschechischen Nové Město na Moravě und produziert in Summe 200.000 Paar Alpin- und Langlaufski pro Jahr. Der Pioniergeist – damals wie heute – und die Leidenschaft für den Skisport motivieren uns jeden Tag, die besten Ski für ihren jeweiligen Einsatz und die schnellsten Ski für Medaillen und Podien zu bauen, um noch mehr unvergessliche Momente zu erleben, seien sie im Tiefschnee, auf frisch gewalzten Pisten oder den eisigen Hängen des Skiweltcups. Davon können wir nicht genug bekommen.

Großer Dank an alle, die diese Leidenschaft seit Jahren mit uns teilen und damit gemeinsam die Zukunft gestalten!

Hohenems, the place where it all began in 1924 with Anton Kästle's vision, is still the company's headquarters today—in 2024. Kästle is a company that has gone through ups and downs over the past century. From being celebrated as the market leader and serial winner on the World Cup to the brand temporarily disappearing, we have experienced it all. Revolutionary innovations such as CPM (Compound-Plastic-Metal), which continues to have a lasting influence on ski construction today, represent the brand's pioneering spirit, which has always remained unbroken regardless of ownership. Kästle's leadership has always focused on the idea of ski racing, partnering with world class athletes and celebrating unforgettable moments. At the end of the 1960s, Josef Fischer and Selma Sturmberger took over the Vorarlberg ski company and, after many successful years, sold the world-renowned brand to the Italian Benetton Group in 1991. Benetton Sportsystems owned numerous sports brands and, at its peak, up to 400,000 pairs of skis were built at the Vorarlberg location and sold worldwide. While this figure can no longer be used for comparison given today's much smaller but more quality-oriented ski market, it is nonetheless an impressive statistic.

Today, 100 years after Anton Kästle made his first ski, the brand belongs to the ConsilTech group of companies, has two of its own production facilities in Hohenems and in Nové Město na Moravě in the Czech Republic and produces a total of 200,000 pairs of alpine and cross-country skis. The pioneering spirit—then as now—and the passion for skiing motivate us every day to build the best skis for their respective uses and the fastest skis for World Cup medals and podiums to add to our collection of unforgettable moments. Be it in deep snow, on freshly groomed slopes or on the icy courses of the World Cup, we can't get enough of this.

Thank you so much for sharing this passion and for continuing to create the future together!

CEO Alexander Lotschak

100 JAHRE LEIDENSCHAFT

100 YEARS OF PASSION

Wir schreiben das Jahr 1924. Die ersten Olympischen Winterspiele finden in Chamonix statt und Anton Kästle fertigt in seiner Wagnereiwerkstatt sein erstes Paar Ski.

Getrieben von Pioniergeist und Innovationslust erschafft er unter seinem Namen eine Sportmarke, die sich in den nächsten 100 Jahren einen weltweiten Ruf in puncto Qualität, Performance und technischem Fortschritt erarbeitet. Über Jahrzehnte wird Kästle zur Referenz im alpinen Skirennlauf mit unerreichter Leistungsbilanz und die Marke schlechthin für den ambitionierten Ski-Enthusiast. Es ist diese ursprüngliche Leidenschaft für den Sport, die uns bis heute antreibt, Bestehendes und Bewährtes zu verbessern, Grenzen zu verschieben und Neues zu wagen.

The year is 1924. The first Winter Olympics are taking place in Chamonix and Anton Kästle is making his first pair of skis in his wainwright workshop.

Driven by a pioneering spirit and desire for innovation, he created a sports brand under his name that would develop a global reputation for quality, performance and innovation over the next 100 years. For decades, Kästle set the benchmark in alpine ski racing with an unrivaled performance record and became the brand of choice for the discerning skier. It is this original passion for skiing, that still drives us to this day, to improve upon what has been tried and tested and to continue to push boundaries and dare to try new things.

100 YEARS

Legendary Collection

SPECIALS

Unsere Legendary Collection verkörpert die Meisterklasse des Skibaus.
In liebevoller Handarbeit werden 30 Einzelteile in unserer Manufaktur verpresst.

Doch nicht nur die Werkstatt in Hohenems erinnert an vergangene Zeiten.
Für die Legendary Collection haben wir unsere schönsten Designs aus den
1950er- und 1960er-Jahren wieder aufleben lassen. Selbstverständlich
verfolgen wir aber auch hier unseren altbewährten Grundsatz „Form follows
function“. So elegant die Ski auch glänzen, keiner muss hier auf die gewohnte
Kästle Performance verzichten.

Our Legendary Collection embodies the master class of ski manufacturing:
30 individual parts are lovingly hand-pressed in our workshop.

Our legacy in Hohenems isn't the only thing that's representative of times
gone by. For the Legendary Collection, we have revived our most beautiful
designs from the 1950s and 1960s. Of course, we also follow our long-
standing principle of „form follows function“. As elegant as the skis shine,
no one has to go without the usual Kästle performance.

K_BOOTS

ALPINE

Der Fokus auf die beste Performance ist tief in unserer Geschichte verwurzelt. Ein vorausschauendes, unkonventionelles Mindset, das Streben nach Innovation, die Liebe zur Technologie und zum Detail – sie alle sind Teil des Kästle Ursprungs. Er ermutigt uns, die Geschichte fortzuschreiben und die wichtigsten Komponenten unserer Produkte neu zu gestalten.

Die Kästle Race & Performance Skischuhfamilie. Für ambitionierte und leidenschaftliche Skifahrer. Für diejenigen, die keine Grenzen kennen. Für die Fokussierten, die auf der Suche nach dem perfekten Schwung sind. Für diejenigen, die #FastAsEver sein wollen.

Focusing on top-performance is deeply rooted in our history. Forward, out of the box thinking, striving for innovation, cutting-edge technology and attention to detail are at the heart of Kästle. It empowers us to continue the story and rethink our product's most crucial components.

The Kästle race and performance ski boot family. For ambitious and passionate skiers. For those without limits. For the focused ones, who are always looking for the perfect turn. For those, who want to be #FastAsEver.

LOW VOLUME BOOT

Alle K_Boots sind ab sofort auch als Low Volume (LV) Variante verfügbar.

Unsere Low Volume (LV) Modelle verfügen über eine schmalere Konstruktion. Mit einer Leistenbreite von 97 mm (bei Standardgröße 26.5) bieten sie höhere Präzision und die ideale Passform für jede schlankere Fußform.

All K_Boots are now also available in Low Volume (LV) versions.

Our Low Volume (LV) models feature a narrower construction. With a last width of 97 mm (for 26.5), they offer greater precision and an ideal fit for narrower foot shapes.

Die Kästle Damenlinie Terra steht für Leidenschaft und Sinnlichkeit, aber auch für Stärke und Stabilität. Auf die Skimodelle folgen nun die neuen Terra Boots K90 und K80, die mit den gleichen Eigenschaften aufwarten und für eine optimale Performance in allen Bedingungen sorgen.

The Kästle women's line Terra stands for passion and sensuality, but also for strength and stability. Now the ski models are followed by the new Terra Boots K90 and K80, which offer the same features and ensure optimal performance in all conditions.

RACE

Ein stets vorausschauendes, unkonventionelles Denken, die Liebe zur Technologie und ungebrochener Pioniergeist sind der Schlüssel zum Erfolg – das haben uns die letzten 100 Jahre gelehrt. Dafür dürfen wir stolz auf eine stark im Rennlauf verwurzelte Historie zurückblicken. Toni Sailer, Pirmin Zurbriggen, Anita Wachter, Hubert Strolz, Kjetil André Aamodt, Tom Stiansen sind einige von den zahlreichen Meistern ihres Faches, die auf Kästle Ski bei Großevents in Summe 133 Medaillen gewonnen haben.

Racing liegt uns im Blut und ist wesentlicher Bestandteil der Kästle DNA. Daher findet jegliche Entwicklung bei allen unseren Ski ihren Ursprung im Rennsport.

Always looking forward, unconventional thinking, a love of technology and an unbroken pioneering spirit are the key to success—that's what the last 100 years have taught us. We can proudly look back on a history that is strongly rooted in racing. Toni Sailer, Pirmin Zurbriggen, Anita Wachter, Hubert Strolz, Kjetil André Aamodt, and Tom Stiansen are some of the numerous masters in their fields who have won a total of 133 medals at major events on Kästle Skis.

Racing is in our blood and is an essential part of Kästle's DNA. As such, all of our skis can trace their origins to racing.

1950

Trude Beiser holt bei den Weltmeisterschaften in Aspen den Sieg und gewinnt zum ersten Mal Edelmetall für Kästle.

Trude Beiser wins the first ever gold medal on Kästle skis at the Alpine World Championships in Aspen, Colorado.

1956

Cortina wird zu Kästle Spielen. Neben dreimal Gold für Toni Sailer gibt es weitere 18 Olympische Medaillen auf Kästle Ski.

The Cortina Games turn into the Kästle Games. Aside from 3 golds for Toni Sailer, a further 18 Olympic medals are secured on Kästle skis.

1970

Karl Cordin gewinnt mit Kästle Ski den Abfahrtsweltcup. Der Vorarlberger Skiläufer wird im gleichen Jahr auch Vize-Weltmeister.

Karl Cordin wins Downhill World Cup on Kästle skis. The ski racer from Vorarlberg is also ranked number 2 in the world that same year.

1987

Nach 1985 wird Pirmin Zurbriggen auch 1987 Doppel-Weltmeister. Auf Kästle Ski lässt er sich in Crans Montana feiern.

Following his 1985 World title, Pirmin Zurbriggen secures the title again in 1987, making him two-time World Champion. He celebrates in Crans Montana on Kästle skis.

1985

Pirmin Zurbriggen bringt nach dem zweiten Gesamt-weltcup auch gleich zwei Weltmeister-Titel für Kästle aus Bormio mit.

After securing a second overall World Cup title for Kästle, Pirmin Zurbriggen brings back two World Championship titles from Bormio.

1980

Der Liechtensteiner Andreas Wenzel holt sich bei den Herren auf Kästle Ski den ersten Gesamt-weltcup für die Hohenemser Marke.

Kästle takes home the overall World Cup Men's title for the first time, thanks to Liechtensteiner Andreas Wenzel.

1978

Mit 7 Medaillen ist Kästle bei den alpinen Weltmeisterschaften in Garmisch-Partenkirchen die erfolgreichste Skimarke.

Kästle is the most successful ski brand at the World Championships in Garmisch-Partenkirchen, securing 7 medals.

1988

Neben 4 Gold- sowie 6 Silber- und Bronzemedaillen in Calgary holt Kästle durch Pirmin Zurbriggen den dritten Gesamt-weltcup.

In addition to 4 gold, 6 silver and 6 bronze medals won on Kästle skis at the Calgary Olympics, Pirmin Zurbriggen wins the overall World Cup title for a third time.

2021

Comeback in den Weltcup mit den ersten Punkten durch Alex Tilley.

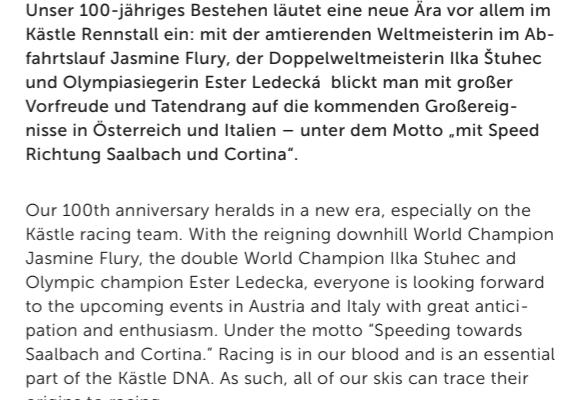

Comeback into the World Cup with the first points by Alex Tilley.

2022/23

Ilka Štuhec gewinnt die Abfahrt von Cortina. Es folgt ein weiterer Abfahrtssieg beim Weltcupfinale in Soldeu.

Ilka Štuhec wins the Cortina downhill. Another downhill victory follows at the World Cup final in Soldeu.

Unser 100-jähriges Bestehen läutet eine neue Ära vor allem im Kästle Rennstall ein: mit der amtierenden Weltmeisterin im Abfahrtsweltcup Jasmine Flury, der Doppelweltmeisterin Ilka Štuhec und Olympiasiegerin Ester Ledecká blickt man mit großer Vorfreude und Tatendrang auf die kommenden Großereignisse in Österreich und Italien – unter dem Motto „mit Speed Richtung Saalbach und Cortina“.

Our 100th anniversary heralds in a new era, especially on the Kästle racing team. With the reigning downhill World Champion Jasmine Flury, the double World Champion Ilka Štuhec and Olympic champion Ester Ledecká, everyone is looking forward to the upcoming events in Austria and Italy with great anticipation and enthusiasm. Under the motto "Speeding towards Saalbach and Cortina." Racing is in our blood and is an essential part of the Kästle DNA. As such, all of our skis can trace their origins to racing.

PISTE

KX

Kinder sind die Zukunft – darum haben sie auch nur das Allerbeste verdient.

Bei Kästle verbauen wir deswegen sogar in unserem KX-Kinderski einen echten Pappel-Holzkern. Der steht nicht nur für Qualität und Hochwertigkeit, sondern verlängert auch die Lebensdauer des Skis. In Kombination mit dem robusten Top-Sheet und der Cap-Konstruktion haben auch Mini-Kenner lange Freude an ihren Kästle Ski.

Weil bei Kästle niemand Abstriche in puncto Performance machen soll – auch nicht die Kleinsten.

Children are the future – that's why they only deserve the very best.

As such, at Kästle we use a real poplar wood core even in our KX children's skis. This not only stands for quality and high value, but also extends the life of the ski. In combination with the robust top sheet and cap construction, even mini shredders will enjoy their Kästle skis for a long time.

At Kästle, no one has to compromise on performance – not even the smallest ones.

DX

Ein wahrer Genießer! Der DX überzeugt mit Komfort und einfacher Geschwindigkeitskontrolle und ermöglicht sicheres Fahrverhalten. Doch stille Wasser sind bekanntlich tief. Durch die Semi-Cap Sandwich-Sidewall Konstruktion hat er genug Reserven für kraftvolle Carvingschwünge.

Ausgeglichen, aber zugleich dynamisch – bereit für alles, was der Winter zu bieten hat.

A true pleasure! The DX has won skiers the world over with comfort, easy speed control and always stable handling. However, don't be fooled by the DX's relaxed persona. With Semi-Cap Sandwich Sidewall construction, it has plenty of potential for powerful carving turns.

Balanced, but dynamic at once - ready for everything the winter has to offer.

ZX ALPHA

Unser ZX Alpha – robust und stabil konstruiert, ist er der treue Begleiter aller Mini-Draufgänger. Perfekt für die ersten Powder-Days oder die Wahl, wenn es um das Erklimmen der Berggipfel geht. Denn auch das ist mit dem unkonventionellen Ski für Young Guns machbar, die schon früh ihre Lines in den Schnee zaubern wollen. Tourenbindung montiert, Fell aufgezogen und schon steht den Abenteuern nichts mehr im Wege.

Our ZX Alpha – with its robust and sturdy construction, it is the faithful companion of all mini daredevils. Perfect for the first powder days or when climbing mountain peaks. After all, even that is possible with the unconventional ski for young guns who want to draw their lines in the snow at an early age. Touring binding mounted, skin attached and nothing stands in the way of adventures.

TERRA

SOUL OF EARTH

Die Elemente der Erde sind ein wesentlicher Teil unseres Seins, Fühlens und Denkens und bilden wohl die Seele der Erde. Sie beeinflussen unser tägliches Handeln. Die Kraft und die Sinnlichkeit dieser Elemente finden sich in der Kästle Damenlinie Terra wieder.

Schimmernd und leuchtend stehen die Steine Quartz, Marble und Obsidian als Namens- und Symbolgeber für die Skimodelle.

Biafo und Pika erweitern die Terra Linie um zwei Tourenmodelle. Standhaft, imposant und ehrwürdig, genauso wie das Gletschereis, dessen Namen sie angenommen haben.

Zeigt eure Seele! Seid die, die ihr sein wollt. Gefühlvoll, echt, leidenschaftlich.

The soul of the earth and the elements of the earth, representing a significant part of our being, feeling and thinking. They influence our daily actions. The power and sensuality of these elements are reflected in the Kästle women's line Terra.

Iridescent and luminous, the stones Quartz, Marble and Obsidian stand as namesakes and symbols for the ski models.

Biafo and Pika expand the Terra line with two touring models. Steadfast, imposing and venerable, just like their glacier namesakes.

Show your soul! Be who you want to be. Emotional, pure, passionate.

TERRA

TECHNOLOGY

HOLLOWTECH

Das patentierte HOLLOWTECH bildet das Herzstück unserer technologischen Komponenten. Die Grundidee: Im vorderen Bereich des Skis werden nicht benötigte Schichten ausgespart, damit wird die Schaufel leichter. Schnelleres Rückstellverhalten, höhere Laufruhe, maximaler Kantengriff, präziseres Einlenken und nicht zuletzt reduziertes Gewicht sind das Resultat.

Apart from the wood core, the patented HOLLOWTECH forms the heart of our technological components. The basic idea: removing unnecessary layers in the front of the ski to make the whole thing lighter. Therefore, the ski becomes up to 30 % damper, feels more stable, provides a more powerful edge-grip, and more precise steering, all at a lower weight.

HOLLOWTECH 2.0

Das Hollowtech 2.0 bildet die Basis unserer Kerntechnologie. Die Größe wird dabei individuell an das Schaufelkonzept jedes Skis angepasst. Für die optimale Performance bei jedem Schwung.

Hollowtech 2.0 is one of our tried and true core technologies. The size of each Hollowtech is uniquely adapted to the shovel design of each ski for optimal performance in every turn.

HOLLOWTECH 3.0

In der Version 3.0 haben wir das HOLLOWTECH zweistufig aufgebaut: Im äußeren Ring sparen wir zusätzlich Material und damit noch mehr Gewicht ein.

The version 3.0 has a two-tier construction: a outer ring cuts out even more material and therefore even more weight.

HOLLOWTECH RACE

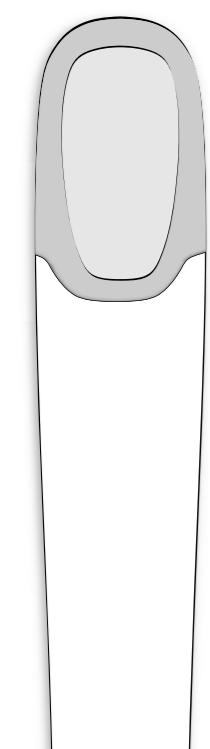

Speziell für unsere High-Performance-Pistenmodelle sowie die Rennski haben wir das Hollowtech 2.0 weiterentwickelt. Noch größer als zuvor sorgt es für noch mehr Laufruhe, selbst bei Spitzengeschwindigkeiten im Weltcup.

Especially for our high-performance piste models and racing skis, we have further developed the Hollowtech 2.0. Even larger than before, it ensures greater stability, even at top speeds in the World Cup.

HOLLOWTECH LUMINOUS

Als weiteres zusätzliches Feature kommt phosphoreszierendes Material zum Einsatz, für leuchtende Augenblicke im Dunkeln.

This Hollowtech is highlighted with a luminous material, creating a glow-in-the-dark effect.

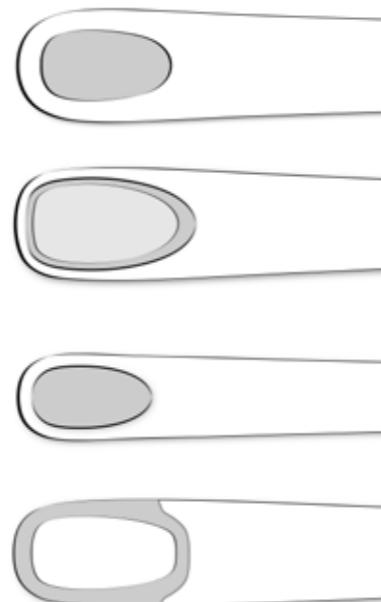

HOLLOWTECH EVO

Unser Tatendrang ermutigt uns, auch diese Schlüsseltechnologie stetig weiterzuentwickeln. Darum präsentieren wir für 24|25 die neueste Evolution, das HOLLOWTECH EVO:

Mit dem Ziel, die Schwingungen in der Schaufel noch weiter zu reduzieren, haben wir das HOLLOWTECH erstmals auf den gesamten Schaufelbereich ausgeweitet. Somit sparen wir noch mehr Masse ein und erreichen die optimalen Fahreigenschaften für die jeweiligen Ski.

Hochwertige Ski fordern hochwertige Technologien, daher kommt das neue HOLLOWTECH EVO bei unseren Top-Modellen im Allmountain- & Tourenbereich zum Einsatz.

Our spirit of innovation drives us to further improve this key technology. We proudly present the latest evolution of this Kästle mainstay for 24|25, the HOLLOWTECH EVO:

With the aim of reducing the vibrations in the shovel even further, we have expanded the HOLLOWTECH to the entire shovel area for the first time. This means we save even more mass and optimize the desired handling characteristics for respective ski models.

High-quality skis require cutting-edge technologies, which is why the new HOLLOWTECH EVO is used on our top models in our all-mountain and touring lines.

ROCKER

Mit dem Rocker optimieren wir die Schaufel des Skis und steuern seinen Auftrieb je nach Einsatzbereich. Dabei unterscheiden wir zwischen:

With rocker, we fine tune the tip of the ski and optimize the ski's buoyancy, or float, depending on the intended area of use. We differentiate between:

ROCKER
für verbesserten Auftrieb und leichtes Handling
for improved float and easy handling

DOUBLE-ROCKER
für maximalen Auftrieb und leichtes Drehen im Freeridebereich
for maximum float and easy freeride turns

SCHAUFEL UND SKIENDE

SHOVEL AND TAIL

Mit der Shovel-and-Tail-Konfiguration verfeinern wir die Abstimmung unserer Ski. With the shovel and tail design, we can refine the aggressiveness of our skis.

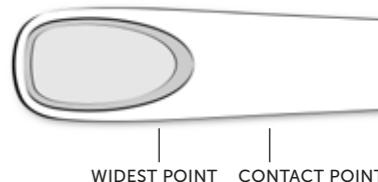

Die FAST GRIP SHOVEL ist eine kurze Schaufel, bei der der Kontaktspunkt und die breiteste Stelle der Schaufel weit vorne liegen. Damit sorgen wir für ein direkteres Einlenkenverhalten beim Kurvenanfang.

The FAST GRIP SHOVEL is a short shovel in which the contact point and the widest part of the shovel are located far forward. This ensures a faster response at the beginning of the turn.

Die HOOK FREE SHOVEL ist eine längere Schaufel, die oft mit einem Rocker kombiniert wird. Dabei verschieben wir den Kontaktspunkt zum Schnee weiter in die Skimitte und sorgen so für ein verziehendes, spielerisches Einlenkenverhalten.

The HOOK FREE SHOVEL is a longer shovel that is often combined with a Rocker. With this design the contact point to the snow is moved toward the center of the ski, thus ensuring a more forgiving and playful performance.

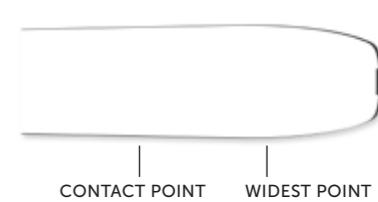

Das FAST GRIP TAIL ist ein kurzes Skienteil, wobei der Kontaktspunkt und die breiteste Stelle des Skientes weit hinten liegen. So entsteht ein aggressiveres, direkteres Aussteuern aus der Kurve.

The FAST GRIP TAIL is designed with a contact point almost at the widest part of the tail, near the end of the ski. This results in a more aggressive and precise performance at the end of the turn.

Das HOOK FREE TAIL wird oft mit dem Double Rocker kombiniert und hat ein längeres Skienteil, wobei der Kontaktspunkt weiter in die Skimitte liegt. Das Ergebnis ist ein verziehendes, spielerisches Verhalten beim Aussteuern aus der Kurve.

The HOOK FREE TAIL is often combined with a Double Rocker and a longer tail, with the contact point being moved toward the center of the ski. The result is a forgiving, playful performance when exiting a turn.

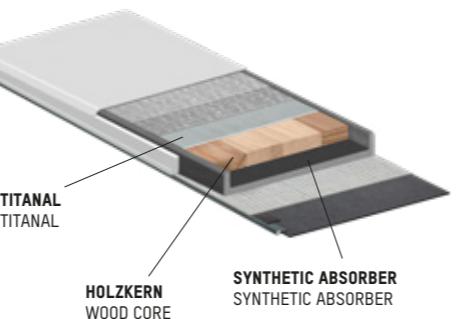

SYMBIO CORE

Der neue Kästle SYMBIO CORE verbindet drei Materialien in einer Symbiose:

- TITANAL im Obergurt verleiht Stabilität
- der HOLZKERN gewährleistet gewohnte Performance und Langlebigkeit
- der SYNTHETIC ABSORBER rundet die Fahreigenschaften des Skis ab und macht ihn 20 % leichter* bei gleichbleibender Leistung

* verglichen zu Vorjahresmodellen ohne Symbio Core

The new Kästle SYMBIO CORE blends three materials into one symbiosis:

- TITANAL top-layer gives the ski its stability
- CENTRAL WOOD CORE ensures the familiar performance and durability
- SYNTHETIC ABSORBER material rounds off the ski's properties by making it 20% lighter* at equal performance

* compared to previous models without Symbio Core

Kombiniert mit weiteren, alt bewährten Kästle Technologien und Konstruktionen können so die unterschiedlichsten Fahreigenschaften erzielt werden.

Combined with other, tried and tested Kästle technologies and designs, a wide variety of performance characteristics can be achieved.

RESPONSIBILITY

Die Natur ist unser wichtigstes Kapital – vom winterlichen Flachland, das wir mit Langlaufski durchkreuzen, über die tiefverschneiten Berge, die uns die schönsten Powdertage bereiten, bis hin zu den höchsten Gipfeln, die wir mit unseren Tourenski erklimmen. Sie ist nicht nur Garant für den wirtschaftlichen Erfolg unserer Industrie, sie ist auch unser Zuhause.

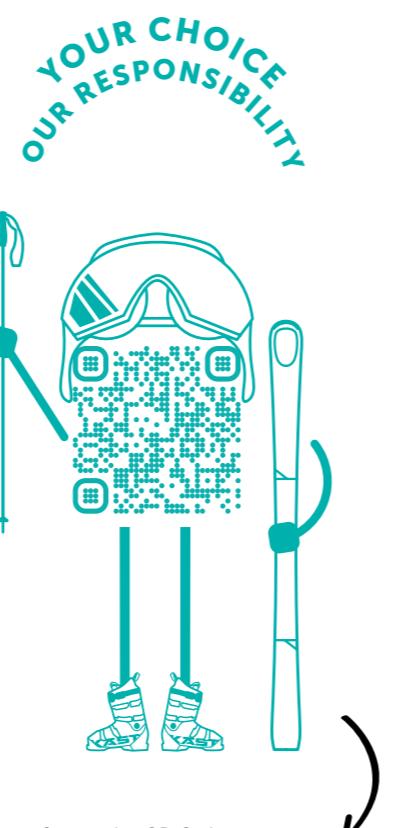

Darum sehen wir es nicht nur als unsere Pflicht, sondern auch als persönliches Anliegen, sie zu erhalten und nachhaltig zu stärken. Unsere Verantwortung, die Kästle „Responsibility“, umfasst dabei eine Vielzahl an Bereichen: von der sorgfältigen Auswahl unserer Materialien, über die Investition in neue Technologien zur ressourcenschonenden und -wiederverwertenden Verarbeitung, bis hin zum finalen Produkt. Außerdem umfasst sie faire und gleichberechtigte Arbeitsbedingungen für unsere Mitarbeiter, sowie die fruchtbare Zusammenarbeit und Kommunikation auf Augenhöhe mit unseren Vertriebspartnern, Athleten und Markenbotschaftern.

Für sie alle lautet das Credo: transparent, ehrlich und lösungsorientiert arbeiten und wirken. Schließlich glauben wir daran, dass die Kombination aus Innovation und Verantwortung der Schlüssel für eine nachhaltige Zukunft ist – für uns alle.

Nature is our most important resource. From the wintry flatlands that we cross with cross-country skis, to the snow-covered mountains that give us the most beautiful powder days, to the highest peaks that we climb with our touring skis. These landscapes not only guarantee the economic success of our industry, they're environments we call home.

That's why we see it not only as our business duty, but also as a personal obligation to maintain and protect them. Our responsibility, the "Kästle Responsibility", covers a variety of areas: from the careful selection of our materials, to investing in new technologies for resource-saving and recycling, to the final product. It also includes fair and equal working conditions for our employees, as well as fruitful collaboration and communication with our sales partners, athletes and brand ambassadors.

The credo for all of them is: work and act transparently, honestly and in a solution-oriented manner. Ultimately, we believe that the combination of innovation and responsibility is the key to a sustainable future—for all of us.
