TECHNOLOGY

HOLLOWTECH

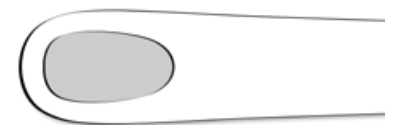

Das HOLLOWTECH ist die große Produktinnovation, die Kästle zum Wiedereinstieg der Marke 2007 präsentiert. Bei der patentierten Kerntechnologie werden nicht benötigte Schichten eingespart, um die Schaufel leichter zu machen. Schnelleres Rückstellverhalten, höhere Laufruhe, maximaler Kantengriff, präziseres Einlenken und nicht zuletzt reduziertes Gewicht sind das Resultat. Bis heute bildet das HOLLOWTECH das Wiedererkennungsmerkmal eines jeden Kästle Skis. Die Technologie ist vielfach weiterentwickelt und ebenso oft ausgezeichnet worden.

The HOLLOWTECH is the major product innovation that Kästle is presenting to mark the brand's return in 2007. The patented core technology eliminates unnecessary layers in the tip to make the shovel lighter and the ski damper. The result is quicker response, smoother handling, maximum edge grip, more precise steering and, last but not least, reduced weight. To this day, HOLLOWTECH is the most recognizable feature of every Kästle Ski. The technology has been refined many times and has received awards just as often.

Das HOLLOWTECH 2.0 ist die erste Adaption der Kerntechnologie. Dabei wird die Größe des HOLLOWTECHs individuell an das Schaufelkonzept jedes Skis angepasst.

HOLLOWTECH 2.0 is the first adaption of the core technology. The size of each HOLLOWTECH is uniquely adapted to the shovel design of each ski.

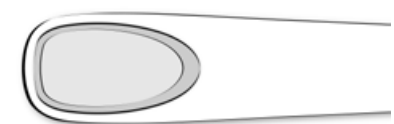

HOLLOWTECH 2.0

In der Version 3.0 wird das HOLLOWTECH zweistufig aufgebaut: Im äußeren Ring wird zusätzliches Material und damit noch mehr Gewicht eingespart, was eine weitere Verbesserung von Laufruhe und Stabilität des Skis bewirkt.

In version 3.0, the HOLLOWTECH is constructed with two stages: additional material is removed in the outer ring, saving even more weight. This further improves the smoothness and stability of the ski.

HOLLOWTECH 3.0

Speziell für die High-Performance-Pistenmodelle und für die Rennski wird das HOLLOWTECH 2.0 weiterentwickelt. Größer als zuvor sorgt es für noch mehr Laufruhe, selbst bei Spitzengeschwindigkeiten im Weltcup.

HOLLOWTECH 2.0 is being further developed especially for the high-performance piste models and racing skis. Larger than before, it ensures smoother handling, even at top speeds in the World Cup.

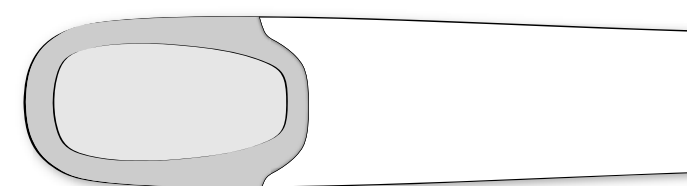

HOLLOWTECH RACE

Erstmals wird die Materialreduktion auf den gesamten Schaufelbereich ausgeweitet. Noch mehr Gewichtseinsparung, Performancesteigerung und die Optimierung der Fahreigenschaften für jeden Ski sind die Ziele in der Entwicklung. Es kommt im Allmountain- und Tourenbereich (leuchtend als HOLLOWTECH EVO LUMINOUS) zum Einsatz.

For the first time, the reduction of material is being extended to the entire shovel area. The development goals are to save even more weight, increase performance and optimize the handling characteristics for each ski. HOLLOWTECH EVO is used in the all-mountain and touring models (as glowing HOLLOWTECH EVO LUMINOUS).

HOLLOWTECH EVO

SYMBIO CORE

Der neue Kästle **SYMBIO CORE** verbindet drei Materialien in einer Symbiose:

- **TITANAL** im Obergurt verleiht Stabilität
- der **HOLZKERN** gewährleistet gewohnte Performance und Langlebigkeit
- der **SYNTHETIC ABSORBER** rundet die Fahreigenschaften des Skis ab und macht ihn 20 % leichter* bei gleichbleibender Leistung

* verglichen zu Vorjahresmodellen ohne Symbio Core

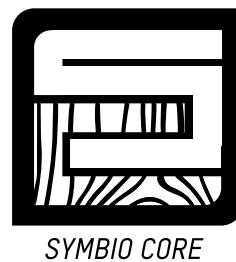

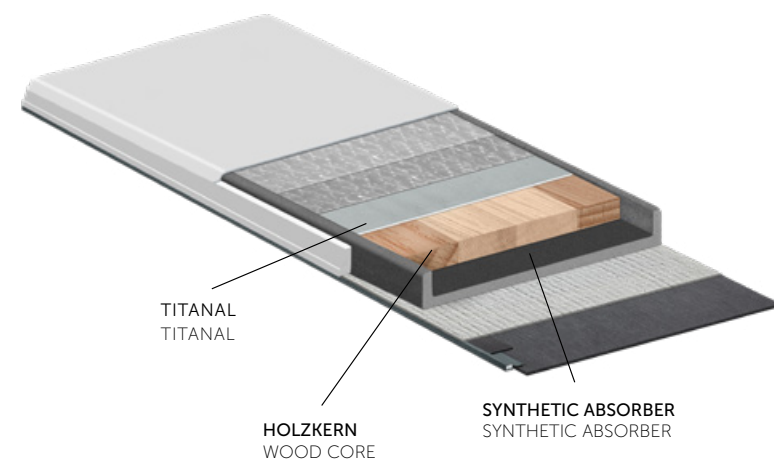

The new Kästle **SYMBIO CORE** blends three materials into one symbiosis:

- **TITANAL (METAL)** top-layer gives the ski its stability
- **CENTRAL WOOD CORE** ensures the familiar performance and durability
- **SYNTHETIC ABSORBER** material rounds off the ski's properties by making it 20% lighter* at equal performance

* compared to previous models without Symbio Core

Kombiniert mit weiteren, alt bewährten Kästle Technologien und Konstruktionen können so die unterschiedlichsten Fahreigenschaften erzielt werden.

Combined with other, tried and tested Kästle technologies and designs, a wide variety of performance characteristics can be achieved.

INFINI CORE

Unsere neuen Infini Cores besitzen vertikale, eng angeordnete Längsstreben aus Pappel und Buche, sogenannte Stringer. Diese verleihen dem Ski eine höhere Steifigkeit und damit einen optimierten Rebound sowie die maximale Performance. Je nach Einsatzgebiet sind diese Stringer im Holzkern unterschiedlich angeordnet:

Our new Infini Cores have impossibly-narrow poplar and beech vertical stringers, giving the ski greater rigidity, optimized rebound, a more consistent flex and maximum performance. The layout of stringers within the wooden core differs regarding the skis terrain:

INFINI CORE RACE

Unsere RX12-Modelle besitzen eine sehr hohe Dichte an Stringern, um sowohl bei hohen Geschwindigkeiten, als auch explosiven Kurzschwüngen die Energie perfekt in den Ski zu übertragen und am Ende der Kurve wieder freizugeben.

Our RX12 models have high density stringers, enabling power transfer perfectly into the ski – both at high speeds and during explosive, short turns – and releasing it again at the end of the turn.

INFINI CORE AMTN

Der Infini Core Allmountain ähnelt dem unserer Top-Racing Ski. Um aber vor allem bei den höheren Mittelbreiten die ideale Balance aus Flex und Torsion zu erzeugen, besitzen die Pappel-Buche Stringer eine geringere Dichte und sind zusätzlich von einer Pappel-Außenwange eingeschlossen.

The Infini Core all-mountain is inspired by our top racing skis. In order to create the ideal balance of flex and torsion, particularly with wider models, the poplar-beech stringers have a lower density and are flanked by outer layers of poplar.

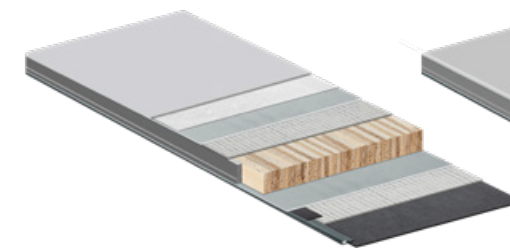

INFINI CORE FREE

Eingebettet zwischen Pappel- und Paulownia-Holz, finden sich hier zwei separate Längsstreben aus Pappel-Buche Stringern. Diese verlaufen genau dort, wo die Alpinbindung im Ski verschraubt ist, für eine maximale Kraftübertragung. Diese Konstruktion aus drei Hölzern verleiht dem Ski eine herausragende Stabilität, ohne an Wendigkeit einbüßen zu müssen, ganz egal bei welcher Mittelbreite.

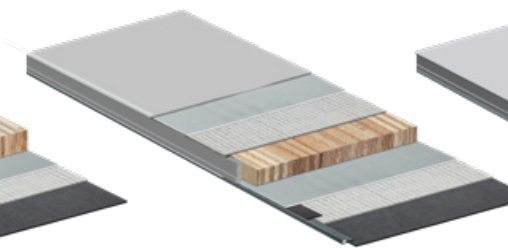

With three types of wood, InfiniCore Free is designed to meet the demands and variability of freeride terrain. Nestled between poplar and paulownia, there are two separate sections of poplar-beech stringers. These stringers are placed exactly where alpine bindings are mounted, allowing for nimbleness and maximum power transfer. This triple wood-core provides outstanding stability without sacrificing maneuverability, regardless of waist width.

Legendary Collection

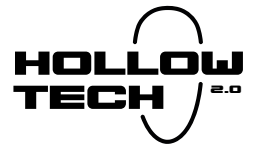

SPECIALS

Unsere Legendary Collection verkörpert die Meisterklasse des Skibaus. In liebevoller Handarbeit werden 30 Einzelteile in unserer Manufaktur verpresst.

Doch nicht nur die Werkstatt in Hohenems erinnert an vergangene Zeiten. Für die Legendary Collection haben wir unsere schönsten Designs aus den 1950er- und 1960er-Jahren wieder aufleben lassen. Selbstverständlich verfolgen wir aber auch hier unseren altbewährten Grundsatz „Form follows function“. So elegant die Ski auch glänzen, keiner muss hier auf die gewohnte Kästle Performance verzichten.

Our Legendary Collection embodies the master class of ski manufacturing: 30 individual parts are lovingly hand-pressed in our workshop.

Our legacy in Hohenems isn't the only thing that's representative of times gone by. For the Legendary Collection, we have revived our most beautiful designs from the 1950s and 1960s. Of course, we also follow our long-standing principle of „form follows function“. As elegant as the skis shine, no one has to go without the usual Kästle performance.

NEXT GENERATION

RACE | PISTE | KIDS & JUNIOR

Auch bei unseren Kinder- und Jugendmodellen gehen wir keine Kompromisse ein und lassen ihnen dieselbe Liebe zum Detail zukommen, die wir all unseren Produkten schenken. So statten wir auch jedes Junior Modell mit einem hochwertigen Holzkern aus.

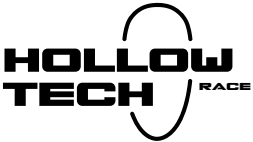

Unsere **RX12 Factory FIS** Line versorgt Athleten der Next Generation mit hochwertigen Materialien aus dem Skiweltcup. Eigens entwickelte Konstruktionen und Platten-Bindung Set-Ups von höchster Qualität und Performance helfen beim Erlernen des perfekten Race-Schwungs.

Die Kleinsten lernen mit dem **KX Holly** das Skivergnügen kennen. Ältere Kinder lässt der **RX12 Junior**, dem das Design unserer Weltcup-Modelle vererbt wurde, von großen Erfolgen träumen. Für mutige Nachwuchs-Entdecker ist der **ZX Alpha** die perfekte Wahl, um das Gelände und die Funparks zu erkunden.

We make no compromises with our junior models, giving these skis the same attention to detail that we give all our products. Thus, every junior model is also made with a high-quality wood core.

Our **RX12 Factory FIS** Line provides Next Generation athletes with high-quality materials from the World Cup. Specially developed constructions and plate/binding set-ups of the highest quality and performance help future stars learn the perfect race turn.

The rippers of tomorrow get to know the joys of skiing with the **KX Holly**. The **RX12 Junior**, which has inherited the design from our World Cup models, lets older children dream of future racing success. For brave young explorers, the **ZX Alpha** is the perfect choice for venturing into off-piste terrain or parks.

RX12

RACE | PISTE

Die RX-Line, fürs Rennen bestimmt und im Race-Design erschaffen, bietet World-Cup-Feeling für alle: egal ob bei explosiven Kurzschwüngen, langen Radien mit hoher Geschwindigkeit oder beim sportlichen Allround-Carven.

Der feine Grat zwischen Performance und Dynamik entscheidet im Weltcup über Sieg und Niederlage. Diese Erkenntnisse lassen wir auch unserem **RX12 GS Masters**, ausgestattet mit Materialien und Konstruktionen unseres Race Departments, zukommen. Das Ergebnis ist ein kompromissloser High-Performance Ski.

Der **RX12** ist das Top-Modell im Pistenbereich und überzeugt mit maximaler Performance. Perfekt für ambitionierte Pistenfahrer, die einen Race-Carver mit World-Cup-Feeling suchen.

Der **RX11** ist unser vielseitigster Race-Carver, für sportliche Kurzschwünge oder lange Radien mit hohen Geschwindigkeiten gleichermaßen. Seine Vollholz- und Doppel-Titanal-Konstruktion verleiht ihm ein Race-Feeling, das seinesgleichen sucht.

Der **RX9** ist die perfekte Wahl für alle Pistenliebhaber, die nach einem kompromissbereiten Ski suchen, aber keinesfalls auf die gewohnte Kästle Performance verzichten wollen.

The RX line, designed and created for racing, offers a World Cup feeling for everyone: whether for explosive short turns, long radius high-speed turns or sporty all-around carving.

The fine level between performance and dynamics decides on victory or defeat in the World Cup. These insights come in useful to our **RX12 GS Masters**, equipped with materials and constructions from our Race Department. The result is an uncompromising high-performance ski.

The **RX12** is the top model in our piste line-up and delivers maximum performance. Perfect for ambitious skiers who are looking for a race carver with that World Cup feel.

The **RX11** is our most versatile race-carver, for sporty short turns and long radius turns at high-speed equally. His solid wood and two titanal sheet construction provides him with a race-feeling that is unparalleled.

The **RX9** is the perfect choice for all piste lovers who are looking for a compromising ski but do not want to forego that classic Kästle performance.

ALL-MOUNTAIN

Mit unseren All-Mountain Modellen ist man bestens gerüstet für alles, was der Berg zu bieten hat. Wer liebt es nicht über frisch präparierte Pisten zu carven und zwischendurch einen Abstecher ins Gelände zu wagen?

Die **MX** Modelle sind unsere High Performance Ski im All Mountain Segment. Dank rennlaufinspirierter Konstruktion mit dem Hollowtech Evo und den modernen, breiteren Formen kommen sie in jedem Gelände zurecht.

Sportlich, aber etwas gemütlicher ist die **DX**-Line in ihrem Fahrverhalten. Der Symbio Core verleiht diesen Skiern die nötige Leichtigkeit und Drehfreudigkeit – auf und neben der Piste.

With our all-mountain models everyone is ready for anything the mountain has to offer. Who doesn't love carving over freshly groomed slopes or venturing off-piste every now and then?

The **MX** models are our high-performance, all-mountain skis. Thanks to race-inspired construction with Hollowtech Evo and modern, wider shapes, these skis can handle any terrain.

The **DX** line is sporty but a little easier going in its handling. The Symbio Core gives these skis optimal lightness and maneuverability – on and off-piste.

FREERIDE

Unberührte Pulverschneehänge, steile Rinnen oder leicht verspurtes Gelände – bei unseren Freeride Modellen ist für jeden etwas dabei.

Die **PARAGON**-Line ist unser neues Top-Produkt in Bezug auf Performance und Stabilität in der Sparte Freeride. Der Infini Core mit doppeltem Titanal Gurt und drei verschiedenen Hölzern machen diese Modelle zum ultimativen Powder-Tool, auch in schwierigstem Gelände.

Die spielerischen **ZX** Modelle sind vielseitige Skier für alle, die sich am liebsten im tiefen Pulverschnee austoben. Mit ihrer weicheren Konstruktion erzeugen sie perfekten Auftrieb im Powder und lassen sich agil steuern.

Untouched powder, steep couloirs or lightly tracked terrain – our freeride models offer something for everyone, and every condition.

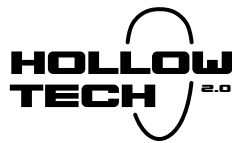

The **PARAGON** line sets new standards in performance and stability in the freeride category. Our Infini Core, with two titanal sheets and three different types of wood, makes these models the ultimate off-piste tool, built for the most demanding terrain and conditions.

The playful **ZX** models are versatile skis for anyone who loves to effortlessly float through deep powder. With a softer construction, these skis provide perfect buoyancy in powder and can be steered with ease.

TOUR

Unbegrenzte Möglichkeiten und die stille Weite der Bergwelt. Unsere Tourenski ermöglichen die ultimative Freiheit und außergewöhnliche Performance – sowohl im Aufstieg als auch in der Abfahrt.

Die **TX**-Line ist unser High End Tourenmodell. Dank des Glasfaser-Karbon Wickelkerns und der Vollholzkonstruktion überzeugt sie durch ihre Leichtigkeit und Performance. Das Hollowtech Evo Luminous ermöglicht leuchtende Momente in der Dämmerung und Dunkelheit.

Die **TX UP** Modelle sind die robusten Verwandten der TX-Line. Verlässliche Ski für jedes Gelände, die mit der notwendigen Stabilität und Sicherheit überzeugen.

Unlimited possibilities in the quiet expanse of the mountains. Our touring skis enable the ultimate freedom through exceptional performance – whether on the ascent or on the descent.

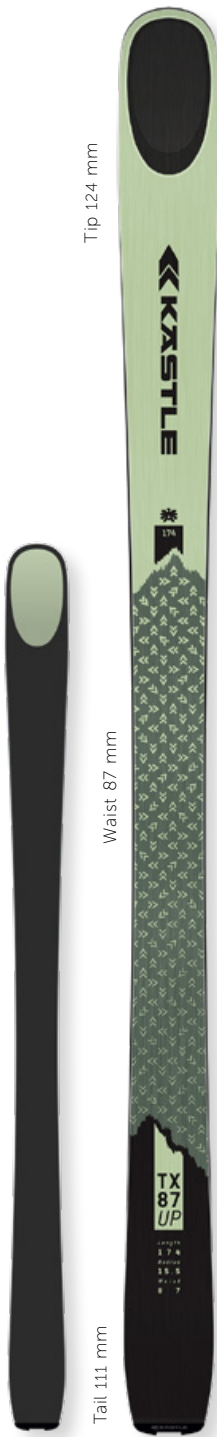

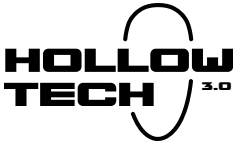

The **TX** ski are our top-of-the-line touring models. Thanks to the fiberglass-carbon wound core and solid wood construction, these skis turn heads with lightness and performance. Plus, the Hollowtech Evo Luminous provides glowing moments in the twilight and darkness.

The **TX UP** models are the more robust relatives of the TX-Line. Fun, approachable skis for any terrain and ability.

M-LINE

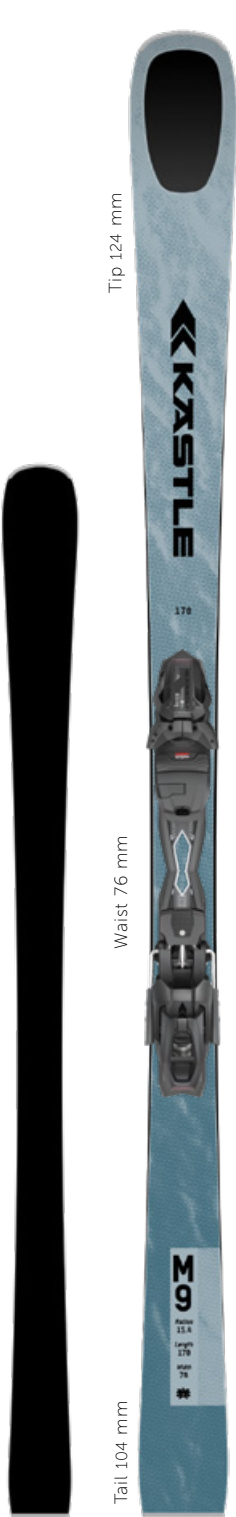

Die neue **M-Line** (Mountain-Line) wurde für besonders herausfordernde Bedingungen entwickelt. Sie bietet maximale Langlebigkeit und Widerstandsfähigkeit. Skier, die für die Piste genauso geeignet sind, wie für den All Mountain-Bereich.

Der **M9** ist das Top-Model der M-Line. Die neu entwickelte Konstruktion – mit Vollholzkern, doppelter Titanal-Begurtung und Powerzone-Sandwich Sidewall – vereint Langlebigkeit und Performance in diesem Ski.

The new **M-Line** (Mountain Line) is developed for extraordinary conditions. These skis offer maximum durability and performance. They are just as suitable for the piste as they are for all-mountain use.

The **M9** is the top model in the M-Line. The new developed construction with solid wood core, two titanal sheets and Powerzone Sandwich Sidewall unites durability and performance within this ski.

K_BOOTS

ALPINE

Der Fokus auf die beste Performance ist tief in unserer Geschichte verwurzelt. Ein vorausschauendes, unkonventionelles Mindset, das Streben nach Innovation, die Liebe zur Technologie und zum Detail – sie alle sind Teil des Kästle Ursprungs. Er ermutigt uns, die Geschichte fortzuschreiben und die wichtigsten Komponenten unserer Produkte neu zu gestalten.

Die Kästle Race & Performance Skischuhfamilie. Für ambitionierte und leidenschaftliche Skifahrer. Für diejenigen, die keine Grenzen kennen. Für die Fokussierten, die auf der Suche nach dem perfekten Schwung sind. Für diejenigen, die #FastAsEver sein wollen.

Focusing on top-performance is deeply rooted in our history. Forward, out of the box thinking, striving for innovation, cutting-edge technology and attention to detail are at the heart of Kästle. It empowers us to continue the story and rethink our product's most crucial components.

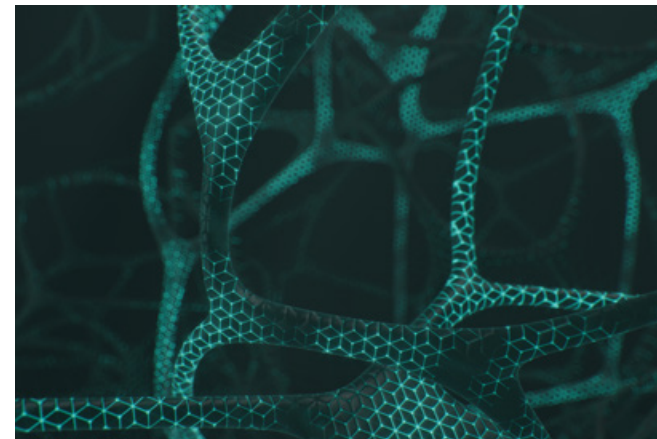

The Kästle race and performance ski boot family. For ambitious and passionate skiers. For those without limits. For the focused ones, who are always looking for the perfect turn. For those, who want to be #FastAsEver.

➤ K_RELEASE

Unsere innovativen "Ultra-Flat"-Schnallen mit ergonomischem Release-System ermöglichen steilste Aufkantwinkel.

Our innovative „Ultra-Flat“ buckles with an ergonomic release system enable the steepest of edge angles.

➤ K_BLEND

Die spezielle Materialkomposition der Schale und Manschette verleiht unseren Boots eine konstante Performance, bei allen Bedingungen und Temperaturen.

A unique material composition in the shell and cuff gives our boots consistent performance in all conditions and temperatures.

➤ K_TILT

Ein Heckspoiler, der zwischen Innen- und Außenschuh angebracht und individuell positioniert wird. Er verleiht unseren Boots durch einen stärkeren Lean-Angle und eine engere Passform das perfekte Maß an Kontrolle und Kraftübertragung.

A rear spoiler that is attached between the liner and the shell and positioned depending on the individual's needs. It gives our boots the perfect level of control and power transfer through a more aggressive stance and tighter fit.

➤ K_ACTIVE

Unsere stufenlos verstellbaren Power Straps ermöglichen die perfekte Kraftübertragung dank schrittweiser Lockerung.

Our continuously adjustable power straps enable perfect power transmission thanks to gradual stiffening.

LOW VOLUME BOOT

Alle K_Boots sind auch als Low Volume (LV) Variante verfügbar.
Unsere Low Volume (LV) Modelle verfügen über eine schmalere Konstruktion. Mit einer Leistenbreite von 97 mm (bei Standardgröße 26.5) bieten sie höhere Präzision und die ideale Passform für jede schlankere Fußform.

All K_Boots are also available in Low Volume (LV) versions.
Our Low Volume (LV) models feature a narrower construction. With a last width of 97 mm (for 26.5), they offer greater precision and an ideal fit for narrower foot shapes.

> K_FIT

Mit unseren „Performance“- und „Performance+“-Linern können unsere Boots jedem Fuß individuell, schnell und unkompliziert angepasst werden.

With our „Performance“ and „Performance+“ liners, our boots can be individually customized to each user quickly and easily.

PERFORMANCE

TERRA

BOOTS

Die Kästle Damenlinie Terra steht für Leidenschaft und Sinnlichkeit, aber auch für Stärke und Stabilität. Auf die Skimodelle folgen die Terra Boots K90 und K80, die mit den gleichen Eigenschaften aufwarten und für eine optimale Performance in allen Bedingungen sorgen.

The Kästle women's line Terra stands for passion and sensuality, but also for strength and stability. The ski models are followed by the Terra Boots K90 and K80, which offer the same features and ensure optimal performance in all conditions.

TECHNOLOGY

SCHAUFEL UND SKIENDE SHOVEL AND TAIL

Mit der Shovel-and-Tail-Konfiguration verfeinern wir die Abstimmung unserer Ski.
With the shovel and tail design, we can refine the aggressiveness of our skis.

Die FAST GRIP SHOVEL ist eine kurze Schaufel, bei der der Kontaktpunkt und die breiteste Stelle der Schaufel weit vorne liegen. Damit sorgen wir für ein direkteres Einlenkverhalten am Kurvenanfang.

The FAST GRIP SHOVEL is a short shovel in which the contact point and the widest part of the shovel are located far forward. This ensures a faster response at the beginning of the turn.

Die HOOK FREE SHOVEL ist eine längere Schaufel, die oft mit einem Rocker kombiniert wird. Dabei verschieben wir den Kontaktpunkt zum Schnee weiter in die Skimitte und sorgen so für ein verzeihendes, spielerisches Einlenkverhalten.

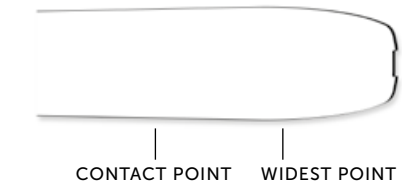

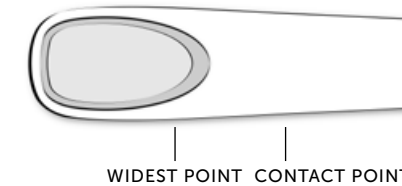

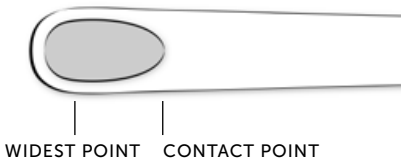

The HOOK FREE SHOVEL is a longer shovel that is often combined with a Rocker. With this design the contact point to the snow is moved toward the center of the ski, thus ensuring a more forgiving and playful performance.

Das FAST GRIP TAIL ist ein kurzes Skiende, wobei der Kontaktpunkt und die breiteste Stelle des Skiendes weit hinten liegen. So entsteht ein aggressiveres, direkteres Aussteuern aus der Kurve.

The FAST GRIP TAIL is designed with a contact point almost at the widest part of the tail, near the end of the ski. This results in a more aggressive and precise performance at the end of the turn.

Das HOOK FREE TAIL wird oft mit dem Double Rocker kombiniert und hat ein längeres Skiende, wobei der Kontaktpunkt weiter in der Skimitte liegt. Das Ergebnis ist ein verzeihendes, spielerisches Verhalten beim Aussteuern aus der Kurve.

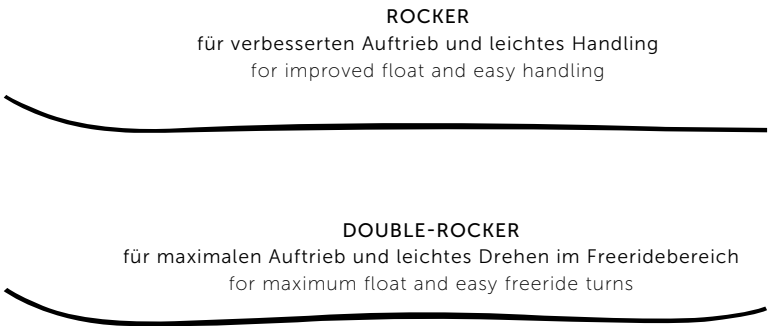

The HOOK FREE TAIL is often combined with a Double Rocker and a longer tail, with the contact point being moved toward the center of the ski. The result is a forgiving, playful performance when exiting a turn.

ROCKER

Mit dem Rocker optimieren wir die Schaufel des Skis und steuern seinen Auftrieb je nach Einsatzbereich. Dabei unterscheiden wir zwischen:

With rocker, we fine tune the tip of the ski and optimize the ski's buoyancy, or float, depending on the intended area of use. We differentiate between:

SANDWICH-SIDEWALL CONSTRUCTION

Die SANDWICH-SIDEWALL Konstruktion übernehmen wir aus dem alpinen Rennlauf, sie gilt als Qualitätsmerkmal unserer Modelle.

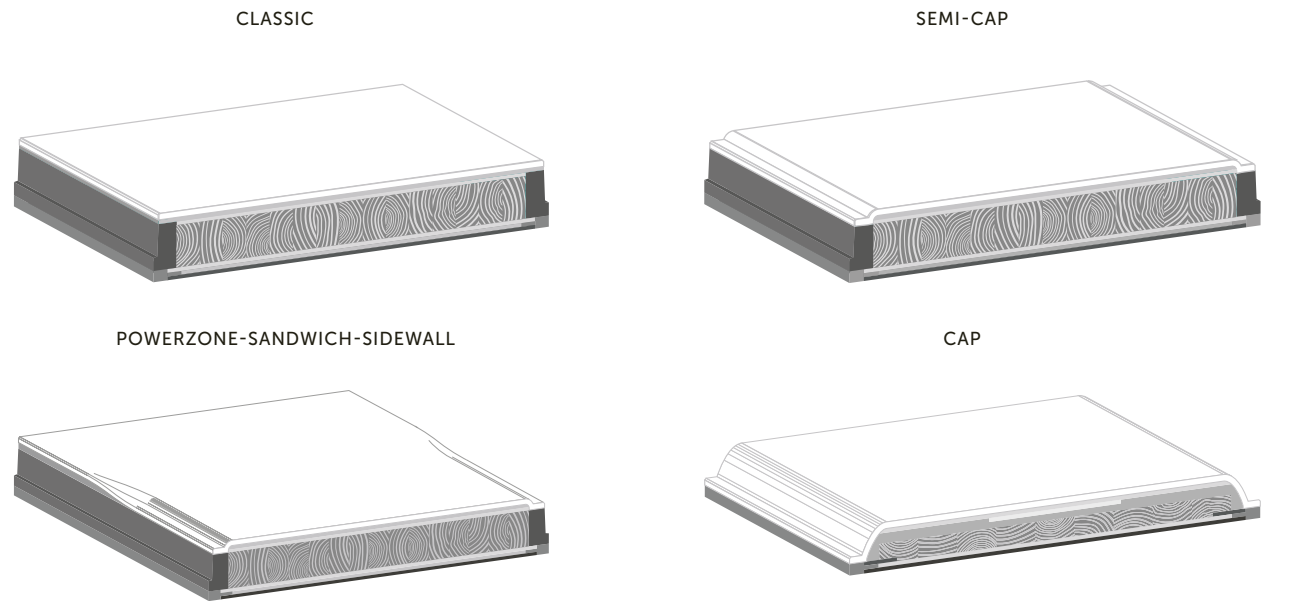

Diese Bauweise verleiht jedem Kästle Ski eine optimale Biege- und Torsionssteifigkeit, bringt ein sensitives, direktes Handling und sichert die volle Kontrolle über den Ski, auch bei hohem Tempo.

Wir unterscheiden zwischen der CLASSIC SANDWICH-SIDEWALL Konstruktion und der SEMI-CAP SANDWICH-SIDEWALL Konstruktion, bei der das Topsheet die Oberbegurtung schützt. Die Vorteile beider Varianten vereint die POWERZONE-SANDWICH-SIDEWALL Konstruktion in sich. Für die maximale Langlebigkeit sorgt unsere CAP Konstruktion

We have adopted our SANDWICH-SIDEWALL construction from alpine racing. This technology is the sign of quality of our models.

This method of construction gives every Kästle ski optimum flex and torsional rigidity, creates sensitive and direct transfer of power and ensures total control, even at high speeds.

We differentiate between the CLASSIC SANDWICH-SIDEWALL construction and SEMI-CAP SANDWICH-SIDEWALL construction, in which the topsheet protects the upper edge of the ski. Our POWERZONE-SANDWICH-SIDEWALL construction brings together the advantages of both. For the maximum durability we are using our CAP construction

RESPONSIBILITY

Die Natur ist unser wichtigstes Kapital – vom winterlichen Flachland, das wir mit Langlaufski durchkreuzen, über die tiefverschneiten Berge, die uns die schönsten Powdertage bereiten, bis hin zu den höchsten Gipfeln, die wir mit unseren Tourenski erklimmen. Sie ist nicht nur Garant für den wirtschaftlichen Erfolg unserer Industrie, sie ist auch unser Zuhause.

Nature is our most important resource. From the wintry flatlands that we cross with cross-country skis, to the snow-covered mountains that give us the most beautiful powder days, to the highest peaks that we climb with our touring skis. These landscapes not only guarantee the economic success of our industry, they're environments we call home.
