HiPER Lens Technology

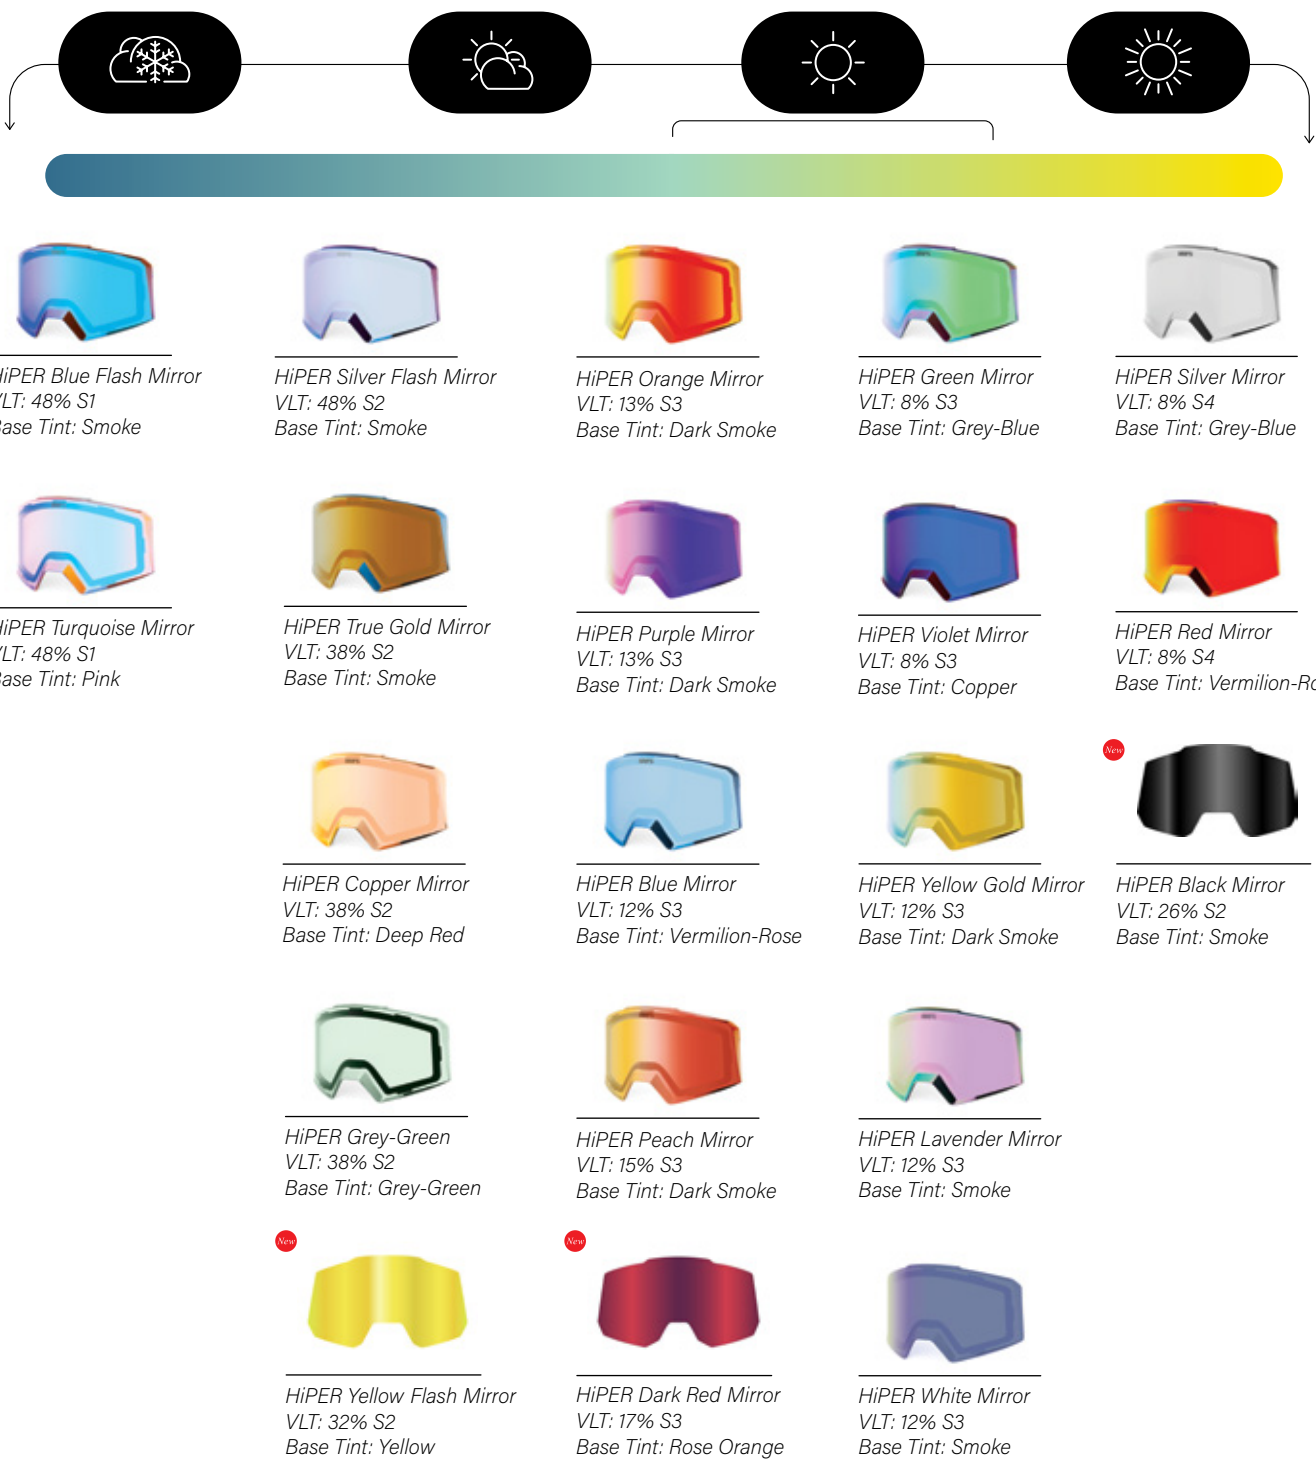

M-NS 100 KNOW®

HiPER LENS

HiPER lenses filter out certain color wavelengths to create more contrast. You can compare it with a grayscale image that you make more black and white. We filter out the light frequencies that are 'grey' areas, bringing out the more vibrant colors and create more contrast and sharper details by doing so.

↑↑ VLT M-NS Lens Guide

Norg

Our Flagship Norg goggle is equipped with our proprietary 3DPlane™ Molded Lens Technology, which harnesses the power of the technology from our revolutionary Armega goggle. The unique lens design provides unparalleled structural integrity, enabling the frame to remain soft and comfortable. Coupled with our Gravit8™magnetic quick change lens system, enabling quick adaptation in every condition mother nature can throw at them.

Features:

- Gravit8™ — 8 Magnetic touch-points provide a secure fit while ensuring easy lens changing and unrivaled performance
- 3DPlane™ Molded Lens Technology provides seamless lens-to-goggle chasis fit
- UltraHD® Optical Clarity Lens Technology - maximum protection with uncompromised optics
- HiPER® Contrasting Lens Technology filters out certain color wavelengths to create more contrast
- High Altitude Lens Technology alleviates lens distortion by releasing pressure at higher altitudes
- Scratch and Impact Resistant Lens with hydro and oleophobic coatings keep your lens smudge, scratch, and moisture free
- Dual Pane Anti-Fog Lens keeps your vision clear by regulating the temperature of the space between two lenses
- Flexible goggle frame with multi-layer face foam with moisture wicking micro-fleece, for maximum comfort, next to skin
- OTG compatible — The goggle frame fits comfortably over Rx glasses, without compromising the fit, form, or function of the snow goggle
- Adjustable 50mm strap with slip resistant grippers strategically placed allows the goggle to remain secure in variable terrain and volatile environments
- Spare lens included with magnetic protective cover, which adheres to the goggle chassis over the attached goggle — protecting both lenses at once during storage
- Microfiber goggle bag with segmented pocket for extra lens carrying, lens cleaning, and protection off the hill

Signature Series

The next generation of athletes usher in a new wave of style and innovation. The 100% design and creative teams collaborated with Nico Porteous, Zoi Sadowski-Synnott, and Dusty Henricksen to represent their individual personalities in each of their new Signature models.

Snowcraft S

The 100% Snowcraft S Goggle reduces the overall size of the frame without sacrificing field of vision. Developed with Olympic Champion Zoi Sadowski-Synnott, built to take on all terrain and weather conditions.

Features:

- Premium Injection-molded 2mm impact-rated, shatter-resistant lens
- UltraHD® Optical Clarity Lens Technology - maximum protection with uncompromised optics
- HiPER® Contrasting Lens Technology filters out non-essential color wavelengths and enhances the ones needed for optimal detail
- High Altitude Lens Technology alleviates lens distortion by releasing pressure at higher altitudes
- Scratch and Impact Resistant Lens with hydro and oleophobic coatings keep your lens smudge, scratch, and moisture free
- Dual Pane Anti-Fog Lens keeps your vision clear by regulating the temperature of the space between two lenses
- Flexible goggle frame with multi-layer face foam with moisture wicking micro-fleece, for maximum comfort, next to skin
- OTG compatible — The goggle frame fits comfortably over Rx glasses, without compromising the fit, form, or function of the snow goggle
- Adjustable 45mm goggle strap with slip resistant grippers strategically placed allows the goggle to remain secure in variable terrain and volatile environments
- Spare HiPER lens included
- Microfiber goggle bag with segmented pocket for extra lens carrying, lens cleaning, and protection

Snowcraft XL

The Snowcraft XL is an oversized option of it’s sibling — for those looking to turn up the volume on the style dial. The Snowcraft XL lens is compatible with the 100% Snowcraft goggle, so you can pack less and focus more on what matters; giving 100% on the mountain.

Features:

- Premium Injection-molded 2mm impact-rated, shatter-resistant lens
 - UltraHD® Optical Clarity Lens Technology - maximum protection with uncompromised optics
 - HiPER® Contrasting Lens Technology filters out certain color wavelengths to create more contrast
 - High Altitude Lens Technology alleviates lens distortion by releasing pressure at higher altitudes
 - Scratch and Impact Resistant Lens with hydro and oleophobic coatings keep your lens smudge, scratch, and moisture free
 - Dual Pane Anti-Fog Lens keeps your vision clear by regulating the temperature of the
- space between two lenses

 - Flexible goggle frame with multi-layer face foam with moisture wicking micro-fleece, for maximum comfort, next to skin
 - OTG compatible — The goggle frame fits comfortably over Rx glasses, without compromising the fit, form, or function of the snow goggle
 - Adjustable 50mm strap with slip resistant grippers strategically placed allows the goggle to remain secure in variable terrain and volatile environments
 - Spare lens included — compatible with the Snowcraft Goggle by 100%
 - Microfiber goggle bag with segmented pocket for extra lens carrying, lens cleaning, and protection

Packaging

100% is taking the first steps in working toward eliminating plastics from our packaging, in addition to reducing the packaging size, therefore excess materials used for shipping individual packaging and containers. Also, the nesting capacity of the bonus lens packaging increases efficiency in transportation and provides cohesion in our overall package messaging.

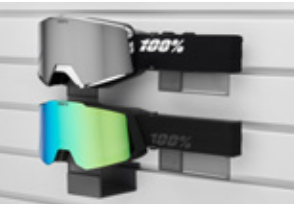

Features:

- Plastic Free
- Molded Pulp
- Slim Profile
- Accessory Lens Nesting
